This country profile reviews the drivers of deforestation and forest degradation in Indonesia, sets out the institutional, political and economic environment within which REDD+ is being implemented in Indonesia, and documents the process of national REDD+ policy development during the period 2007 – early 2012. While Indonesia is committed at the national and international level to addressing climate change through the forestry sector, there are clearly contextual challenges that need to be addressed to create the enabling conditions for REDD+. Some of the major issues include inconsistent legal frameworks, sectoral focus, unclear tenure, consequences of decentralisation, and weak local governance. Despite these challenges, however, REDD+ opens up an opportunity for improvements in forest governance and, more broadly, in land use governance. More democratic political-economic processes in general, greater freedom of civil society and the press, and heightened awareness of environmental issues can help build support and solidify policies in this direction.

"In this Very Short Introduction Storm Dunlop explains what weather is, what causes it, and how we measure it. Analysing the basic features of the atmosphere, its major wind systems and ocean currents, he shows how these drive the weather we experience."--Book cover.

In this groundbreaking novel, Fumiko Hayashi tells a powerful story of tormented love and one woman's struggle to navigate the cruel realities of postwar Japan. Spare, affecting prose recounts Japanese colonialism and the harshness of Japan's postwar experience from the rare perspective of a woman, and a rich cast of characters, drawn from the back alleys of urban Japan and the bottom? rungs of society, offers an unforgettable portrait of Japanese society after the war. The novel's characters, particularly its resilient heroine Yukiko Koda, find themselves trapped in their own drifting, unable to break free from the morass of indecisiveness. Yukiko moves from the lush and beautiful surroundings of Japanese-occupied French Indochina to the desolation and chaos of postwar Japan, and must now find her way through a radically changed landscape and society. We also follow her tortured relationship with Tomioka, a minor official working for the

Department of Agriculture and Forestry. Though Tomioka returns to his wife after the war, he refuses to end his affair with Yukiko. As the two continue to cross paths, their passion and desperation grow, reflecting the intense upheaval of the times in which they live.

There Is Hope . . . When a patient is diagnosed with dementia, it impacts not only the patient but also those who care for them. It can be devastating to watch loved ones lose the independence, personality, and abilities that once defined them, knowing there is no cure. How should Christians respond to a diagnosis of dementia? Experienced geriatrician Dr. John Dunlop wants to transform the way we view dementia—showing us how God can be honored through such a tragedy as we respect the inherent dignity of all humans made in the image of God. Sharing stories from decades of experience with dementia patients, Dunlop provides readers,

particularly caregivers, with a biblical lens through which to understand the experience and challenge of this life-altering disease. Finding Grace in the Face of Dementia will help you see God's purposes as you love and care for those with dementia.

for getting past Sam's defenses, comforting his daughters, arousing his suppressed emotions, and forcing him to remember he's a man... Both Sam and Jasmine need each other, but can they trust in Christmas magic to bring their hearts together?

Many children's teaching programs resemble carnivals instead of productive environments where a child can learn about Jesus Christ. This is often the result of having untrained teachers teaching Sunday school. Experienced Sunday school teacher, Cheryl Dunlop, fills this void by providing a practical teaching manual designed to ensure all those teaching Sunday school are equipped and motivated to do their best for the Lord. Follow Me as I Follow Christ explores issues like how to tell a story, methods of effective discipline, and interacting with individual needs of children. Divided into 52 weekly entries, it is designed to be read along with and help in teachers' class preparation.

This is the first work to set one of the great bloodless revolutions of the twentieth century in its proper historical context. John Dunlop pays particular attention to Yeltsin's role in opposing the covert resurgence of Communist interests in post-coup Russia, and faces the possibility that new institutions may not survive long enough to sink roots in a traditionally undemocratic culture.

as comets, variable stars and novae serve to complement work done with expensive instrumentation by professionals. They fill gaps left by big science and often contribute significantly to astronomical knowledge. The book covers: - historical contributions by amateurs, - observational methods, problems and instrumentation, - results of amateur observations, - popularization. Overall, an exciting and enthusiastic account of stargazing, the hobby that can turn into science.

The dark side of the Gilded Age is revealed in this richly narrated new view of turn-of-the-century New York. American culture scholar M. H. Dunlop penetrates the psyche of New York City in the pivotal years made famous by Edith Wharton and by families like the Vanderbilts and the Rockefellers, unveiling a Gilded Age that was not genteel and proper but dangerous and predatory. She shows us a society whose drives and desires speak familiarly to our own. Drawing on rare primary sources, Dunlop

focuses each chapter on an event—whether infamous or near-forgotten—that showcases a singular facet of America as reflected in its most prominent city. The passions and preoccupations of the time emerge in Dunlop's edgy portraits of sensational events that riveted the public, including a wealthy society wedding where locals were trampled in their frenzy to watch; a bachelor dinner during which men sliced off the girl dancers' dresses; the harrowing nine-hour execution of a zoo elephant diagnosed with sexual frustration; and more. No other book makes comparable use of the vivid and varied newspapers of the day to reveal the everyday behaviors of a broad spectrum of city people. Dunlop's account is embedded in these and other primary sources, from decorators' manuals to vice commission reports. The result is a mesmerizing story that upends familiar generalizations about the late nineteenth century and uncovers the fixations, fads, and fears of the time—the real hum of city life. Spiced with cameos of such characters as exotic dancer Little Egypt, Stanford White, William Merritt Chase, art-collecting ex-con Eddie Stokes, the Midnight Band of Mercy (women who chloroformed cats on the streets after 8:00 P.M.), and Grover Cleveland's "mutton-fat diet" doctor, *Gilded City* brings to life a key era that saw the city rise to dominance in America. With her unerring eye for the vivid details that expose the truth of the time, M. H. Dunlop has shone a spotlight on the American mind.

Of those raised Catholic, just 13% still attend Mass weekly, and 37% say they have 'no religion'. But is this all the fault of Vatican II, and its runaway reforms? Or are wider social, cultural, and moral forces primarily to blame? In 1962, Pope John XXIII opened the Second Vatican Council with the prophecy that 'a new day is dawning on the Church, bathing her in radiant splendour'. Desiring 'to impart an ever increasing vigour to the Christian life of the faithful', the Council Fathers devoted particular attention to the laity, and set in motion a series of sweeping reforms. The most significant of these centred on refashioning the Church's liturgy—the source and summit of the Christian life—in order to make 'it

pastorally efficacious to the fullest degree'. Over fifty years on, however, the statistics speak for themselves. In America, only 15% of cradle Catholics say that they attend Mass on a weekly basis; meanwhile, 35% no longer even tick the 'Catholic box' on surveys. In Britain, the signs are direr still. Catholicism is not the only Christian group to have suffered serious declines since the 1960s. If anything Catholics exhibit higher church attendance, and better retention, than most Protestant churches do. If Vatican II is not the cause of Catholicism's crisis, might it instead be the secret to its comparative success? Mass Exodus is the first serious historical and sociological study of Catholic lapsation and disaffiliation. Drawing on a wide range of theological, historical, and sociological sources, Stephen Bullivant offers a comparative study of secularization across two famously contrasting religious cultures: Britain and the USA.

How would you like to discover a comet? Or be the first person to recognize a new star? This book will tell you how, and more! Writing for amateur astronomers using backyard equipment, noted astronomer, Bill Liller, describes exactly how to search the night skies for the unexpected, and what techniques work best for making astronomical discoveries. Author Liller covers all kinds of objects, such as comets, asteroids, novae, and supernovae that an amateur can hope to find as a result of systematic searching. One chapter also includes sage advice from successful amateurs, such as David Levy and Minoru Honda (comets), Bob Evans (supernovae), and Eleanor Helin and Brian Manning

(asteroids), who share the secrets of their methods. The use of electronic technology is included, as well as instructions on how to publicize a discovery. Extensive appendices contain a wealth of essential data for every new discoverer of cosmic events. William Liller is the coauthor (with Ben Mayer) of the Cambridge Guide to Astronomy (1985) and has had a minor planet (3222) named after him.
