*This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.*

*This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.*

*This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.*

*Ladybugs, snails, and butterflies! Oh my! This charming introduction to ten garden bugs, paired with friendly text and bold, basic patterns, provides a great high-*

contrast experience for young developing eyes. Newborns cannot fully recognize colors, so the sharp contrast between black and white patterns and illustrations allows babies to follow along and make connections to the real world, an important building block for communication skills. Using simple greetings like "Hello, bumblebee" and "Good to see you, dragonfly" alongside black-and-white art by Julissa Mora, *Hello, Garden Bugs* is the perfect board book for babies just beginning to look around and learn about their world. Featured in *Omnivoracious*. Also available: *Hello, Baby Animals* and *Hello, Ocean Friends*. Coming soon: *Hello, My World*.

Emphasizing sustainability, balance, and the natural, green dominates our thinking about ecology like no other color. What about the catastrophic, the disruptive, the inaccessible, and the excessive? What of the ocean's turbulence, the fecundity of excrement, the solitude of an iceberg, multihued contaminations? *Prismatic Ecology* moves beyond the accustomed green readings of ecotheory and maps a colorful world of ecological possibility. In a series of linked essays that span place, time, and discipline, Jeffrey Jerome Cohen brings together writers who illustrate the vibrant worlds formed by colors. Organized by the structure of a prism, each chapter explores the coming into existence of nonanthropocentric ecologies. "Red" engages sites of animal violence, apocalyptic emergence, and activism; "Maroon" follows the aurora borealis to the far North and beholds in its shimmering alternative modes of world composition; "Chartreuse" is a meditation on postsustainability and possibility within sublime excess; "Grey" is the color of the undead; "Ultraviolet" is a potentially lethal force that opens vistas beyond humanly known nature. Featuring established and emerging scholars from varying disciplines, this volume presents a collaborative imagining of what a more-than-green ecology offers. While highlighting critical approaches not yet common within ecotheory, the contributions remain diverse and cover a range of topics including materiality, the inhuman, and the agency of objects. By way of color, Cohen guides readers through a reflection of an essentially complex and disordered universe and demonstrates the spectrum as an unfinishable totality, always in excess of what a human perceives. ## Safe Strategies for Financial Freedom McGraw Hill Professional

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

In 1985 Ingrid Croce opened Croce's Restaurant and Jazz Bar as a tribute to her late husband, singer and songwriter Jim Croce. Attempting to recreate the warmth and energy from their early days of entertaining together, Ingrid infused Croce's with great food, live music and an inviting, casual atmosphere. She has since parlayed the success of this unbeatable combination into a group of popular restaurants and clubs as one of the pioneers in the rejuvenated Gaslamp district of downtown San Diego. Now many of the recipes that have made her restaurants famous are available here. Current culinary trends are reflected in the seasonal American cuisine and Southwestern fare of Ingrid's Cantina and Sidewalk Cafe in recipes such as Santa Barbara Sea Bass with Caramelized Onions and Fig, Ricotta Gnocchi with Wild Mushrooms and Sage, and Pacific Rim Tamales. Drawing on Ingrid's multicultural background and interests, Thyme in a Bottle features Italian favorites as interpreted by the Croce family, like Roasted Pepper on a Salad and Fried Zucchini Blossoms, as well as the Russian and Jewish classics of her childhood, such as brisket and tzimmes with kasha and varnishkas. Ingrid also reveals the secrets behind her own signature blitzes and "poppers." Interpreted with the recipes is Ingrid's own inspired story. She writes

openly about her intense romance with Jim Croce, their happy but occasionally troubled marriage. She tells of the difficult repercussions of Jim's early death, from battles with the music industry to rearing a young son on her own. And she shares the challenges of starting a restaurant and becoming a real player in a notoriously competitive business. It is all told with such candor, warmth, and enthusiasm that by the time Ingrid concludes her story with personal and professional triumphs, we are cheering the heartening success of such a vibrant spirit. Fans of the late Jim Croce will delight in this collection of recipes and memoirs by his wife, Ingrid. Ingrid's inspiration comes from memories of the exceptional food and music that her and Jim created in their Pennsylvania farmhouse in the late sixties and early seventies. As proprietor of five award-winning San Diego restaurants and clubs, Ingrid has garnered an enviable reputation in the culinary world. In *Thyme in a Bottle* she serves up the delicious recipes that make her restaurant so successful as well as anecdotes about her life and times. With its wonderful diversity of menus--from traditional Italian and Russian favorites to contemporary American and Southwestern cuisine--this warm and engaging cookbook is an excellent addition to any cook's library.

This new Beginner Book about manic skiing squirrels—by J. Hamilton Ray with illustrations by Pascal Lemaitre—has the feeling of an old classic read-aloud.

"Nobody knew how the mania grew. First there was one, and then there were two. Three more came gliding from under the trees. LOOK! On the hill. Those are squirrels on skis! Below lay the town, snow-covered and still. Not a sound could be heard. All was silent, until . . . Swwwishhhh swooped the skiers, all dressed for play. Eighty-five squirrels and more on the way!" As you can imagine, the townsfolk are NOT amused. Can intrepid reporter Sally Sue Breeze find out where the squirrels are getting their skis-and make them stop skiing long enough to eat

lunch-before pest-control guy Stanley Powers sucks them up in his vacuum device? (Don't worry—Sally triumphs in a most unexpected way.) With delightfully understated, funny illustrations by Pascal Lemaitre, this is the perfect book for beginning readers to curl up and chill out with on a snow day—or any day! Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning. Younglings can draw, color, and create with all their favorite characters from the Marvel films. From Guardians of the Galaxy to Spider-Man, every page is packed with doodles. Readers can use their artistic powers to bring these sensational scenes to life!
