*The Minimalist Vegan* by Masu and Michael Ofei is less of a how-to book, and more of a why-to book. A manifesto on why to live with less stuff and with more compassion. They explore the intersection of minimalism and veganism and all that each complimentary lifestyle has to offer. They dive deep into conscious living and what it actually means. With chapters on topics such as *"The More Virus"* and *Courageously Simple to The Superior Species* and *A Plastic World*. Masu and Michael cover every aspect to help challenge your way of thinking. Their hope is that by the end of it, you'll have the thirst and passion to architect your life in a way that brings you purpose and joy each and every day. *They have written this book to be read within a few hours. Yes, even if you'd consider yourself to be a slow reader! Each chapter can be read independently, so you can jump ahead to a section that resonates with you. However, reading the book from start to finish is a great way to build momentum as you manifest your ideas and dive into a more conscious way of living.*

*A practical guide to the dynamic revival of contemporary knitting, Knitwear Design is also a source of inspiration and advice on the latest techniques and practices. Packed with diagrams, knitwear samples and images from a wide range of contemporary designers, the book offers a practical approach to designing garments from initial research, finding sources of inspiration and developing the design, through an exploration of color, texture, and knitting techniques to constructing a garment and creating and writing a pattern. Knitwear Design also showcases the techniques that are transforming knitted textiles, such as heat treatments and painting and printing knit, and profiles the fusing of knitting, art, and craft. The book includes case studies from international designers, offering students a unique insight into the industry. Knitting is a tactile and versatile craft and Knitwear Design gives readers the knowledge and inspiration they need to create innovative and eye-catching fashion.*

**The fundamental values central to the Messias/Glover/Prawitt text include: student engagement, a systematic approach, and decision making. Student Engagement: The authors believe students are best served by acquiring a strong understanding of the basic concepts that underlie the audit process and how to apply those concepts to various audit and assurance services. The text is accessible to students through straightforward writing and the use of engaging, relevant real-world examples, illustrations, and analogies. The text explicitly encourages students to “stop and think” at important points in the text to help them apply principles covered and also helps students see the application of concepts in a practical setting through “practice insight” boxes. A Systematic Approach: The authors first introduce the three underlying concepts of audit risk, materiality, and evidence, then follow with a discussion of audit planning, the assessment of control risk, and a discussion of the nature, timing, and extent of evidence necessary to reach the appropriate level of detection risk. These concepts are then applied to each major business process and related account balances using a risk-based approach, (in following with the new standards adopted by the various auditing boards). Decision Making: Since much of auditing practice involves the application of auditor judgment, the authors focus on critical judgments and decision-making processes. If a student understands these basic concepts and how to apply them to an audit engagement, he or she will be more effective in today's dynamic audit environment. The new edition even includes a full advanced module on Professional Judgment.**

**The edited book Pesticides - Toxic Aspects contains an overview of attractive researchers of pesticide toxicology that covers the hazardous effects of common chemical pesticide agents employed every day in our agricultural practices. The combination of experimental and theoretical pesticide investigations of current interest will make this book of significance to researchers, scientists, engineers, and graduate students who make use of those different investigations to understand the toxic aspects of pesticides. We hope that this book will continue to meet the expectations and needs of all interested in different aspects of pesticide toxicity.**

The Phantom of the Opera (1910) is a novel by French writer Gaston Leroux. Originally serialized in Le Galois, the novel was inspired by legends revolving around the Paris Opera from the early nineteenth century. Originally a journalist, Leroux turned to fiction after reading the works of Arthur Conan Doyle and Edgar Allan Poe. Despite its lack of success relative to Leroux's other novels, The Phantom of the Opera has become legendary through several adaptations for film, theater, and television, including Andrew Lloyd Webber's celebrated 1886 Broadway musical of the same name. In 1880s Paris, the legendary Palais Garnier Opera House is rumored to be haunted by a malignant entity. Known as the Phantom of the Opera, he has been linked to the hanging death of a stagehand in addition to several strange and mysterious occurrences. Just before a gala performance, a young Swedish soprano named Christine is called on to replace the opera's lead, who is suffering from a last-minute illness. From the audience, the Vicomte Raoul de Chagny recognizes Christine, his childhood sweetheart, and goes backstage after the opera has ended to reintroduce himself. While waiting by her dressing room, he hears her talking to an unknown man, but upon entering finds himself alone with Christine. Pressing her for information, she reveals that she has been receiving lessons from a figure she calls the Angel of Music, prompting suspicion and terror in Raoul, who is familiar with the legend of the Phantom. As Raoul makes his feelings for Christine known, the Phantom professes his love for his protégé, and a battle for her affection ensues. Caught in this love triangle, threatened on all sides by jealousy and pursuit, Christine struggles to hold on as her star in the Paris Opera rises. With a beautifully designed cover and professionally typeset manuscript, this edition of Gaston Leroux's The Phantom of the Opera is a classic of French literature reimagined for modern readers.

The Sarbanes-Oxley Act (SOX) is a mandatory requirement for all listed corporations in the US, whether foreign or not. Compliance is not an option. Other countries are developing similar legislation so the books value is international in scope. SOX is a hot topic and the effects are just beginning to be felt world-wide. This new book goes beyond the implementation phase of SOX and looks at the reaction to the Act in terms of costs, benefits and business impacts. This book is for Senior Managers in the Business and Financial/Accounting Communities who want/need to know what the reaction of business and government is to the SOX legislation, what it is costing and how the effects are penetrating through the business environment. Mike Holt presents a comprehensive review of the impact that Sarbanes-Oxley legislation has had on business, the financial community, governments and the public since its inception in 2002. The Sarbanes-Oxley Act has been somewhat successful, but not completely and the cost (well over a trillion dollars) might be considered too high a price to pay for the gains. This book takes a hard look at the costs, benefits and other impacts as well as at what influential and prominent financial, government and business leaders think about it now. \* International in scope and content and including interviews with prominent business leaders, CEOs and CFOs of large and small corporations. \* Compliance with The Sarbanes-Oxley Act is now mandatory for every listed US corporation and overseas corporations listed on US stock markets. \* Covers the reaction of business and government to this legislation, what it is costing and how the effects are penetrating through the business environment.

Although glial tissue is emphasized, additional groups of chapters deal with neurons in the central nervous system and with the retina.**

**The authors believe students are best served by acquiring a strong understanding of the basic concepts that underlie the audit process and how to apply those concepts to various audit and assurance services. The primary purpose for an auditing text is not to serve as a reference manual but to facilitate student learning, and this text is written accordingly. The text is accessible to students through straightforward writing and the use of engaging, relevant real-world examples, illustrations, and analogies. The text explicitly encourages students to think through fundamental concepts and to avoid trying to learn auditing through rote memorization. Students are prompted by the text to “stop and think,” at important points in the text, in order to help them apply the principles covered. The text continues to take a systematic approach to the audit process by first introducing the three underlying concepts: audit risk, materiality, and evidence. This is followed by a discussion of audit planning, the assessment of control risk, and a discussion of the nature, timing, and extent of evidence necessary to reach the appropriate level of detection risk. These concepts are then applied to each major business process and related account balances using a risk-based approach. In covering these important concepts and their applications, the book focuses on critical judgments and decision-making processes followed by auditors. Much of auditing practice involves the application of auditor judgment. If a student understands these basic concepts and how to apply them to an audit engagement, he or she will be more effective in today's dynamic audit environment.**

Human geographers have been at the forefront of research that examines the relationships between space, culture and society. This volume contains twenty-one essays, published over the past thirty years, that are iconic instances of this investigative field. With a focus on four broad themes - landscape, identity, colonialism, nature - these essays represent some of the best and most innovative interventions that geographers have made on these topics. From the visual to the corporeal, from rural Ceylon to urban America and from the sixteenth century to the twenty-first, this volume brings together a set of theoretically sophisticated and empirically grounded works.

This book examines the Buddhist responses to the Neo-Confucian critiques of their tradition. It presents full translations of two dominant Buddhist apologetic essays—the Hufa lun, written by a Chinese politician, and the Yusök chirüi non, authored by a Korean monk.
