Passport's Direct from Ireland series brings you all the charm of Dublin, the Wicklow hills, and the Boyne Valley. Its authors, Paul Cullen and Ken Boyle, native Dubliners, write about the city with humor and affection.

The magnitude of investment, the long time-frames involved and the influence of pre-existing infrastructure on urban infrastructure provision make a co-ordinated approach to forward-planning, policy development and implementation essential. There are major challenges in making decisions on urban infrastructure and getting management structures and processes in place. Getting it right generates long-term dividends; getting it wrong involves major costs, often borne by taxpayers. Urban Infrastructure: finance and management is positioned on a strong belief that the physical structure of cities and the efficiency of infrastructure services delivered are driven by efficiencies within individual infrastructure sectors, lessons learnt across these sectors and the ability to co-ordinate and integrate sectors to generate economies of scale. This necessitates an interdisciplinary approach, integrating knowledge from finance, governance, planning and management as well as the characteristics of the individual urban infrastructure sectors involved. Here it is not only about getting the initial decisions and policy settings right, but also ensuring effective implementation. A major theme running through the book is the nature of institutions and the governance structures responsible for delivery and management of urban infrastructure and the decision making processes involved. The editors have taken a deliberately pragmatic approach to the finance and management of urban infrastructure; chapters are cross-sectorial and present both theory and practice. This book is for students and practitioners in policy, planning, urban management, infrastructure finance and management.

A Growth Profession

Youth Work in the Commonwealth: A Growth Profession establishes a baseline to inform the planning and implementation of initiatives to professionalise youth work in Commonwealth member

countries. The study was conducted in 35 countries in the Africa, Asia, the Caribbean/Americas, Europe and Pacific regions. It catalogues the extent to which the youth work profession is formally recognised in these countries and examines the qualities and rights-based ethos of the various forms of youth work promoted and practised in the Commonwealth. The report aims to help countries learn from good practices, and assess gaps in establishing youth work as a recognised profession in diverse contexts.

Combines classic and cutting-edge scholarship on personal social networks. A must-have resource for both newcomers and seasoned experts.

For almost fifty years the Jewish Travel Guide has been the essential reference book for all Jewish travellers worldwide - whether travelling on business, for pleasure or to seek their historical roots. Rigorously edited and updated every year, each country has a short commentary including demographic details, emergency numbers and dialing codes. Other information includes restaurants, mikvaot, synagogues, theatres, embassies, museums, hotels, booksellers, cultural festivals, media, community organizations, groceries, bakeries, kosher food, butchers, delicatessens, libraries and tourist sites. There's even a guide to kosher fish across the world. The Jewish Travel Guide is universally recognized as the ultimate source of information for the Jew abroad. The Jewish Review says, "It is a must for every traveller", the Jewish Chronicle observes, "The book validates its motto: 'Don't go without it'", while The Jerusalem Post comments, "The Guide offers a well-rounded demographic portrait of world Jewry today, serving as much as a handbook and resource for professionals in the Jewish world, as a travel guide." The Jewish Travel Guide is the essential travelling companion, making your journey even easier and more pleasurable!

EIR RELEASES ROAD-MAP TO THE NEW WORLD ECONOMIC ORDER: THE NEW SILK ROAD BECOMES THE WORLD LAND-BRIDGE EIR's comprehensive study of the progress of the Eurasian Land-Bridge project which Lyndon and Helga LaRouche have championed for over 20 years, has finally been completed. The official release date is Dec. 1. The 374-page report, entitled The New Silk Road Becomes the World Land-Bridge, "is nothing less than a conceptual, and often physical, road-map" to a New World Economic Order. This path is currently being charted by the nations of the BRICS (Brazil, Russia, India, China, and South Africa), who are leading a dynamic of global optimism toward real economic development, complete with new credit institutions and major high-technology projects for uplifting all mankind. After an introduction by Helga Zepp-LaRouche, the report lays out the "Metrics of Progress," based on the

economic scientific principles developed by renowned physical economist Lyndon LaRouche. It then proceeds region by region, beginning with China and Russia, to present the stunning progress, and plans, which have been made toward the Eurasian Land-Bridge design that the Chinese government laid out in 1996, and other nations have begun to rally behind in recent years. The report, complete with many full-color maps of its featured development corridors, is available in paperback for \$50 and hard cover bound for \$75.

Now in its second edition, this manual prepares students for careers in public policy development by exploring both the factors involved in recognizing and resolving public problems and the dynamics that affect the development process. Siu presents six principles for developing good policy and outlines the various approaches used to determine issues, conduct research, formulate policy options and recommendations, and derive intelligent decisions. *Developing Public Policy* connects the abstract idea of policy with the practical reality of creating it, providing the reader with the necessary knowledge, tools, and skills to navigate the complexities of policy development in Canada. Thoroughly updated, this second edition details newly developed policy topics and areas, including a new chapter on post-policy considerations and more than double the amount of exercises to practice policy writing and consultations. Featuring questions for critical thought and real-life case examples grounded in the author's experience as a civil servant, *Developing Public Policy* is an essential guide for students of public policy, public administration, political science, health policy, and human rights and equity.

Monthly magazine devoted to topics of general scientific interest.

Over the last decade or so, private-sector financing through public-private partnerships (PPPs) has become increasingly popular around the world as a way of procuring and maintaining public-sector infrastructure, in sectors such as transportation (roads, bridges, tunnels, railways, ports, airports), social infrastructure (hospitals, schools, prisons, social housing) public utilities (water supply, waste water treatment, waste disposal), government offices and other accommodation, and other specialised services (communications networks or defence equipment). This book, based on the author's practical experience on the public- and private-sector sides of the table, reviews the key policy issues which arise for the public sector in considering whether to adopt the PPP procurement route, and the specific application of this policy approach in PPP contracts, comparing international practices in this respect. It offers a systematic and integrated approach to financing PPPs within this public-policy framework, and explains the project-finance techniques used for this purpose. The book deals with both the Concession and PFI models of PPP, and provides a structured introduction for those who are new to the subject, whether in the academic, public-sector, investment, finance or contracting fields, as well as an aide memoire for those developing PPP policies or negotiating PPPs. The author focuses on practical concepts, issues and techniques, and does not assume any prior knowledge of PPP policy issues or financing techniques. The book describes and explains: * The different types of PPPs

and how these have developed * Why PPPs are attractive to governments * General policy issues for the public sector in developing a PPP programme * PPP procurement procedures and bid evaluation * The use of project-finance techniques for PPPs * Sources of funding * Typical PPP contracts and sub-contracts, and their relationship with the project's financial structure * Risk assessment from the points of view of the public sector, investors, lenders and other project parties * Structuring the investment and debt financing * The key issues in negotiating a project-finance debt facility. In addition the book includes an extensive glossary, as well as cross-referencing. *Reviews the PPP policy framework and development from an international perspective *Covers public- and private-sector financial analysis, structuring and investment in PPPs *No prior knowledge of project financing required

This is a book that you gives you a lot of reference knowledge about Canada (#917 at the library) and a lot of contact information for the education industry, schools and colleges. Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content, and online surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks, surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a combination of technical interrogation and field research methods.

For the US Army to succeed in the 21st Century, Soldiers of all ranks must understand and use Mission Command. Mission Command empowers leaders at all levels, allowing them to synchronize all warfighting functions and information systems to seize, retain, and exploit the initiative against a range of adversaries. This collection of historical vignettes seeks to sharpen our understanding of Mission Command philosophy and practice by providing examples from the past in which Mission Command principles played a decisive role. Some vignettes show junior officers following their commander's intent and exercising disciplined initiative in very chaotic combat operations. Others recount how field grade officers built cohesive teams that relied on mutual trust to achieve key operational objectives. Each historical account is complemented by an annotated explanation of how the six Mission Command principles shaped the action. For this reason, the collection is ideal for leader development in the Army school system as well as for unit and individual professional development. Mission Command places great responsibility on our Soldiers.

landmarks, gardens, and much more-with the lowdown on low-cost nightlife, from Spanish tapas bars to German beer gardens and British pubs. You'll even get a color fold-out map and an online directory that makes trip-planning a snap! Collaboration has emerged as a central concept in public policy circles in Australia and a panacea to the complex challenges facing Australia. But is this really the cure-all it seems to be? In this edited collection we present scholarly and practitioner perspectives on the drivers, challenges, prospects and promise of collaboration. The papers, first presented at the 2007 ANZSOG Conference, draw on the extensive experience of the contributors in either trying to enact collaboration, or studying the processes of this phenomenon. Together the collection provides important insights into the potential of collaboration, but also the fiercely stubborn barriers to adopting more collaborative approaches to policy and implementation. The collection includes chapter from public servants, third sector managers, and both Australian and international academics which together make it a stimulating read for those working with or within government. It adds considerably to the debate about how to address current challenges of public policy and provides a significant resource for those interested in the realities of collaborative governance.
