Here is some BAD news first; trying to make money on Ebay selling Brand Name products is NOT the way to make money! Here's why, even if you could manage to locate a source of genuine products you would have to spend \$1,000's just to get enough discount to make even a small profit. You see there are just too many sellers competing for the same business. Brand name products are just too expensive to buy, the margins are slim and there is too much competition. There must be an easier way to make money? Well there is, the market for non branded and private label products on eBay is huge and this approach works in any market, it costs a tiny amount to set up and the profit margins are outrageous and it is much easier than most people would believe. In this comprehensive book I show you step by step how to build your own eBay empire selling Private Label and Non Branded stock. The profit margins on private label products and non branded products are massive. The Advantage Of Private Label Products Are: • No one can directly compete with you as you own the brand. • Your customers will know where you sourced product from. • Private labelling is widespread across many industry sectors as is none branded products. • Small minimum orders allow us to test products for a tiny risk. • You can build an entire business using Private Label & Non Branded Products • Compete with household name products at a fraction of the price of stocking branded items. • You are almost always dealing directly with the manufacturer so no wholesalers cut. As no one is selling exactly the same product as yourself and no one will know where you bought it from, you can sell at your own price. I even provide a list of Private Label Suppliers and Manufacturers who stock a massive range of product that you can sell in multiple niche markets these are the exact same sources I use in my eBay businesses. This is your COMPLETE blueprint to building your own profitable eBay business on a small scale.

Unlike many other eBay guides, this handbook is based on the personal experiences of an established Power Seller. Everything is covered; from the practical concerns of international sales to the purchase of packing materials. With a fresh, common sense approach to selling, there are many hints, tips and personal recommendations that can be applied to all of your eBay activities. One of the most valuable sections is dedicated to where to find stock to sell. Where traders obtain their stock is a closely guarded secret and often finding a source of stock can be quite daunting. This guide tells you where to look, how to buy from different sources and, perhaps most interesting of all, how to use eBay as a source of goods. New for the fourth edition: -- Understand and work with the new seller defect process. -- Take best advantage of recent developments and turn them into hard cash. -- Maximise your selling potential across all media, including mobile. -- How to work with the latest eBay fee structure, so you retain the most of your revenue. -- Share in the knowledge gleaned from over 100,000 eBay transactions. Discover how the author went from zero to over 53,000 positive feedbacks (and counting). From the very first LP record to the family car, he has sold items into almost every corner of the globe and taken every form of payment known to man. Anybody can do this, just follow the simple steps in this guide, dedicate the time, and soon you too could be living the eBay dream.**
