

Eccn Export Control Classification Number Albert Castel

The importance of export control laws and regulations in international trade continues to grow, not only because of the increase in world trade and technology dispersion, but also due to concerns surrounding national and regional stability and the risk of terrorism. Accordingly, familiarity with export control laws and regulations around the world has become extremely important for those involved in the international trade of dual-use or military goods, technology, and services. In this preeminent handbook, now in its third edition, two experienced professionals have gathered contributions from expert practitioners and academics. The third edition adds three new country chapters (Brazil, Israel, and Sweden) and a new separate chapter on sanctions and embargoes. In addition to chapters on the international regime in general, the book provides a practical overview of the export/import control regimes covering defence and dual-use goods and services in fourteen key jurisdictions. Country reports each follow the same structure for easy comparison. Issues and topics covered include the following and much more: □ import/export legal and regulatory requirements for controlled goods and services; □ sanctions for breach of such requirements (civil, administrative, or criminal); □ licence application processes; □ arms, dual-use and other

Where To Download Eccn Export Control Classification Number Albert Castel

products embargo (including chemical and biological materials and technology); and enforcement measures. The Handbook also makes available, through an online application, all important standard export control-related forms, templates, and other related documents, all of which readers can use to draft their own documents. The Handbook is invaluable to any professional (such as lawyers, compliance key players, procurement, logistics, finance and customs practitioners) working in relation to an organisation with a need to know the specific requirements to be followed for the efficient - and legally compliant - import or export of controlled military or dual-use goods, technologies or services.

The book provides the statutory authority for export controls on sensitive dual-use goods and technologies, items that have both civilian and military applications, including those items that can contribute to the proliferation of nuclear, biological and chemical weaponry. This new book examines the evolution, provisions, debate, controversy, prospects and reauthorisation of the EAA.

Provides practical easy-to-implement advice on how to comply with the latest rules and regulations. Shows how to recoup money spent on duty drawbacks. Shows how to get around trade barriers in foreign countries. Shows how to use the internet and other technologies to reduce the cost of exporting. Provides insights into reducing export risk exposures.

Updated as of May 29, 2018 This rule adds to the Export Administration Regulations (EAR) controls on military vehicles and related items; vessels of war and related items; submersible vessels, oceanographic equipment and related items; and auxiliary and miscellaneous items that the President has determined no longer warrant

Where To Download Eccn Export Control Classification Number Albert Castel

control on the United States Munitions List (USML). This rule also adds to the EAR controls on items within the scope of the Munitions List (WAML) of the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies (Wassenaar Arrangement) that are not specifically identified on the USML or the Commerce Control List (CCL) but that were subject to USML jurisdiction. Finally, this rule moves certain items that were already subject to the EAR to the new Export Control Classification Numbers (ECCNs) created by this rule. This rule is being published in conjunction with the publication of a Department of State, Directorate of Defense Trade Controls rule revising USML Categories VII, VI, XX, and XIII to control those articles the President has determined warrant control in those Categories of the USML. Both rules are part of the President's Export Control Reform Initiative. The revisions in this final rule are also part of Commerce's retrospective regulatory review plan under Executive Order (EO) 13563. Implementation, Removal of Foreign National Review Requirements, and Information Security Updates (US Bureau of Industry and Security Regulation) (BIS) (2018 Edition). Updated as of May 29, 2018 The Bureau of Industry and Security (BIS) maintains, as part of its Export Administration Regulations (EAR), the Commerce Control List (CCL), which identifies certain items subject to Department of Commerce jurisdiction. This final rule revises the CCL, as well as corresponding parts of the EAR, to implement changes made to the Wassenaar Arrangement's List of Dual-Use Goods and Technologies (WA List) maintained and agreed to by governments participating in the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies (Wassenaar Arrangement, or WA) at the December 2015 WA Plenary Meeting (the Plenary). The Wassenaar Arrangement advocates implementation of effective export controls on strategic items with the objective of improving regional and international security and stability. This rule harmonizes the CCL with the changes made to the WA List at the Plenary by revising Export

The Export Control and Embargo Handbook, Third Edition is a comprehensive examination of export administration regulations. While most currently available titles covering export control and embargo law carry a broader international focus, U.S. regulations are the central topic of this book. The Export Control and Embargo Handbook provides the very latest information on the embargo, transaction, and currency controls administered by the Commerce, State, Energy, and Treasury Departments, as well as the Nuclear Regulatory Commission. This fully updated third edition is useful for individuals involved in issues surrounding both the exporting from the U.S. and re-exporting U.S.-origin goods and technology, as well as for transactions involving embargoed countries and their products. Offering a detailed analysis of licensing requirements and exceptions from a well-known expert in the field, the book also provides

Where To Download Eccn Export Control Classification Number Albert Castel

convenient access to the relevant excerpts from the Export Administration Regulations (EAR) and the International Traffic in Arms Regulations (ITAR). Blending information with practical application, Eric L. Hirschorn's in-depth analysis of the key U.S. export restrictions on 'dual use' goods, software and technology, defense articles, technology and services, and nuclear equipment and technology, along with the rules governing dealings with embargoed countries, make this an invaluable asset for legal practitioners in the export industry. Any lawyer or government official involved in embargo issues can easily access necessary information using the detailed Table of Contents and thorough index. Law students preparing for a career in trade law will also benefit from the book's accessible style.

Security Regulation) (BIS) (2018 Edition). Updated as of May 29, 2018 The Bureau of Industry and Security (BIS) is amending the Export Administration Regulations (EAR) to reflect changes to the Missile Technology Control Regime (MTCR) Annex that were agreed to by MTCR member countries at the October 2016 Plenary in Busan, South Korea, and the March 2016 Technical Experts Meeting (TEM) in Luxembourg City, Luxembourg. This final rule revises thirteen Export Control Classification Numbers (ECCNs), adds one ECCN, revises two EAR defined terms (including making other EAR conforming changes for the use of these two terms) and makes conforming EAR changes where needed to implement the changes that were agreed to at the meetings and to better align the missile technology (MT) controls on the Commerce Control List (CCL) with the MTCR Annex. Regulations - Export Control Classification Number 0Y521 Series, Items Not Elsewhere Listed on Commerce Control List (US Bureau of Industry and Security Regulation) (BIS) (2018 Edition). Updated as of May 29, 2018 The Bureau of Industry and Security (BIS) publishes this final rule, which amends the Export Administration Regulations (EAR) by establishing a new Export Control Classification Number (ECCN) series, 0Y521, on the Commerce Control List (CCL) and makes corresponding changes to the EAR. The ECCN 0Y521 series will be used for items that warrant control on the CCL but are not yet identified in an existing ECCN. As BIS explained in the proposed rule issued on July 15, 2011 (76 FR 41958), this new temporary holding classification is equivalent to United States Munitions List (USML) Category XXI (Miscellaneous Articles), but with a limitation that while an item is temporarily classified under ECCN 0Y521, the U.S. Government works to adopt a control through the relevant multilateral regime(s); to determine an appropriate longer-term control over the item; or determines that the item does not warrant control on the CCL. Items will be added to the 0Y521 ECCNs by the Department of Commerce, with the concurrence of the Departments of Defense and State, when it identifies an item that should be controlled because it provides a significant military or intelligence advantage to the United States or because foreign policy reasons justify such control. Updated as of May 29, 2018 This final rule describes how articles the President determines no longer warrant control under Category XII (Fire Control, Laser, Imaging, and Guidance Equipment) of the United States Munitions List (USML) of the International Traffic in Arms Regulations (ITAR)

Where To Download Eccn Export Control Classification Number Albert Castel

will be controlled under the Commerce Control List (CCL) of the Export Administration Regulations (EAR) by amending Export Control Classification Number (ECCN) 7A611 and creating new "600 series" ECCNs 7B611, 7D611, and 7E611. In addition, for certain dual-use infrared detection items, this final rule expands controls for certain software and technology, eliminates the use of some license exceptions, revises licensing policy, and expands license requirements for certain transactions involving military end users or foreign military commodities. This final rule also harmonizes provisions within the EAR by revising controls related to certain quartz rate sensors. This book contains:

Column 2 Controls (US Bureau of Industry and Security Regulation) (BIS) (2018 Edition). Updated as of May 29, 2018 The Bureau of Industry and Security (BIS) publishes this final rule to amend the Export Administration Regulations (EAR) to remove nuclear nonproliferation (NP) Column 2 license requirements from certain pressure tubes, pipes, fittings, pipe valves, pumps, numerically controlled machine tools, oscilloscopes, and transient recorders on the Commerce Control List (CCL). These changes are intended to revise the EAR controls on these items by making them more consistent with the export controls of other countries that manufacture these items and that, together with the United States, are participating countries in the Nuclear Suppliers Group (NSG). As a result of the changes made by this rule, some of these items are no longer listed under an Export Control Classification Number (ECCN) on the CCL. However, such items remain subject to the EAR under the designation EAR99. This rule also creates four new ECCNs to maintain anti-terrorism (AT) controls on certain affected commodities and related "software" and "technology." All items subject to the EAR, regardless of whether they are listed on the CCL, may require a license for reasons described elsewhere in the EAR (e.g., license requirements

Research universities are critical contributors to our national research enterprise. They are the principal source of a world-class labor force and fundamental discoveries that enhance our lives and the lives of others around the world. These institutions help to create an educated citizenry capable of making informed and crucial choices as participants in a democratic society. However many are concerned that the unintended cumulative effect of federal regulations undercuts the productivity of the research enterprise and diminishes the return on the federal investment in research. Optimizing the Nation's Investment

Commerce Control List - United States Munitions List Category XIV (Toxicological Agents) or Category XVIII (Directed Energy Weapons) (US Bureau of Industry and Security Regulation) (BIS) (2018 Edition) The Law Library presents the complete text of the Commerce Control List - United States Munitions List Category XIV (Toxicological Agents) or Category XVIII (Directed Energy Weapons) (US Bureau of Industry and Security Regulation) (BIS) (2018 Edition).

Updated as of May 29, 2018 This final rule implements changes described in a proposed rule that the Bureau of Industry and Security (BIS) published on June 17, 2015. Specifically, this final rule describes how articles the President has determined no longer warrant control under Category XIV (Toxicological Agents, Including Chemical Agents, Biological Agents, and Associated Equipment) or Category XVIII (Directed Energy Weapons) of the United States Munitions List (USML) are now controlled under the Commerce Control List (CCL). The affected Category XIV articles consist primarily of dissemination, detection, and protection "equipment" and related articles, such as production and test "equipment," and are controlled under new Export Control Classification Numbers (ECCNs) 1A607, 1B607, 1C607, 1D607, and 1E607, as added to the CCL by this final rule. The affected Category XVIII articles consist primarily of tooling, production "equipment," test and evaluation "equipment," test models, and related articles and are controlled under new ECCNs 6B619, 6D619 and 6E619, as added to the

Regulation) (BIS) (2018 Edition) The Law Library presents the complete text of the Wassenaar Arrangement 2013 Plenary Agreements Implementation - Commerce Control List, Definitions, and Reports (US Bureau of Industry and Security Regulation) (BIS) (2018 Edition). Updated as of May 29, 2018 The Bureau of Industry and Security (BIS) maintains, as part of its Export Administration Regulations (EAR), the Commerce Control List (CCL), which identifies certain of the items subject to Department of Commerce jurisdiction. This final rule revises the CCL to implement changes made to the Wassenaar Arrangement's List of Dual-Use Goods and Technologies (Wassenaar List) maintained and agreed to by governments participating in the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies (Wassenaar Arrangement, or WA) at the December 2013 WA Plenary Meeting (the Plenary). The Wassenaar Arrangement advocates implementation of effective export controls on strategic items with the objective of improving regional and

Where To Download Eccn Export Control Classification Number Albert Castel

international security and stability. This rule harmonizes the CCL with the changes made to the WA List at the Plenary by revising Export Control Classification Numbers (ECCNs) controlled for national security reasons in each category of the CCL, as well as amending the General Technology Note, WA reporting requirements, and definitions section in the EAR. However, BIS intends to publish a separate rule in September setting forth changes to the CCL resulting from the WA agreements for cybersecurity. These changes agreed to at the Plenary include raising the Adjusted Peak Performance (APP) for digital computers in ECCN 4A003. The President's report for High Performance Computers was sent to Congress on July 1, 2014 to set forth the new APP in accordance with the National Defense Authorization Act (NDAA) for FY1998. This rule also makes corresponding revisions to the de minimis rule, and post shipment verification reporting requirements in the Export Administration Regulations. This rule also extends the controls on specified fly-by-wire source code

Where To Download Eccn Export Control Classification Number Albert Castel

software and technology until June 20, 2015, as BIS continues to negotiate for multilateral controls for this software and technology. This rule also revises the license requirements for Mexico on the Commerce Country Chart, because of its recent membership in multiple multilateral export control regimes. In addition, this rule makes changes to the EAR resulting from previous rules issued as part of BIS's export control reform initiative and makes minor editorial corrections to the CCL.
