Between Strategic
Design and
Transition Studies
**With advancement
in modern
technology human
life span in 21st
century has
significantly
improved as
compared to past
centuries. Indeed,
the manufacturing**

and household wastes have also boosted in the same era, presenting a hazardous condition to the various living beings. However, through smart methodologies, it can be possible to recycle/reuse of the different types of wastes as a feedstock

convenient for specialized manufacturing technologies, such as 3D printing. This means that through proper facilities the waste can be used as the raw material for the printing technologies with characteristic at par with the virgin feedstock.

**Furthermore,
producing the
feedstock using
waste materials will
help to reduce the
cost of the
processing material,
productivity and eco-
friendliness of this
manufacturing
technology. This
book will cover a
boarder aspect of
such efforts wherein**

This book gathers the latest advances, innovations, and applications in the field of innovative biosystems engineering for sustainable agriculture, forestry and food production. Focusing on the challenges of implementing sustainability in various contexts in the fields of biosystems engineering,

it shows how the research has addressed the sustainable use of renewable and non-renewable resources. It also presents possible solutions to help achieve sustainable production.

The Mid-Term Conference of the Italian Association of Agricultural Engineering (AIIA) is part of a series of

File Type PDF
Econcept 50 A
Ferrolli

conferences, seminars and meetings that the AIIA organizes, together with other public and private stakeholders, to promote the creation and dissemination of new knowledge in the sector. The contributions included in the book were selected by means of a rigorous peer-review process, and

File Type PDF
Econcept 50 A
Ferrolli

offer an extensive and multidisciplinary overview of interesting solutions in the field of innovative biosystems engineering for sustainable agriculture. Organised as a dialogue between nature and design, this book explores design ideas, opportunities, visions and practices through relating and uncovering
