Collective Labour Law focuses on those aspects of labour law commonly designated 'collective', as opposed to 'individual' (dealt with in Dismissal, Discrimination and Unfair Labour Practices). The book sheds light on the forums, institutions and processes of collective bargaining and its ancillary, industrial action.

"The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with Personeregbronnebundel / Law of Persons Sourcebook"--Provided by publisher.

Provides challenging, practical cases for students studying auditing and assurance. Martinov-Bennie and Soh, Macquarie University; Roebuck, University of New South Wales.

"Economics for South African students is a comprehensive introduction to economics in general, set against a contemporary South African background. The easy style and many practical examples make this publication extremely accessible. The book covers all the material usually prescribed for introductory courses, and it lays a solid foundation for intermediate and advanced studies in economics. The fifth edition is a restructured, thoroughly revised and updated version of the popular fourth edition. As in the previous editions, the emphasis is on the application of economic theory. A wealth of relevant information about the South African economy is also provided. This book is also available in Afrikaans. South African workbook for economics is an additional resource that students can purchase at their local bookstore or online retailer. Please visit www.vanschaiknet.com for information on core and supplementary Economics I products."--Publisher's description.

This fifth edition of International Law: A South African Perspective is now titled Dugard's International Law: A South African Perspective, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. Dugard's International Law: A South African Perspective presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.

Praise for the Fifth Edition of The Responsible Administrator "Cooper's fifth edition is the definitive text for students and practitioners who want to have a successful administrative career. Moral reasoning, as Cooper so adeptly points out, is essential in today's rapidly changing and complex global environment."—Donald C. Menzel, president, American Society for Public Administration, and professor emeritus, public administration, Northern Illinois University "The Responsible Administrator is at once the most sophisticated and the most practical book available on public sector ethics. It is conceptually clear and jargon-free, which is extraordinary among books on administrative ethics."—H. George Frederickson, Stone Distinguished Professor of Public Administration, University of Kansas "Remarkably effective in linking the science of what should be done with a prescriptive for how to actually do it, the fifth edition of Cooper's book keeps pace with the dynamic changes in the field, both for those who study it and those who practice it. The information presented in these pages can be found nowhere else, and it is information we cannot ethically afford to ignore."—Carole L. Jurkiewicz, John W. Dupuy Endowed Professor, and Woman's Hospital Distinguished Professor of Healthcare Management, Louisiana State University, E. J. Ourso College of Business Administration, Public Administration Institute

Financial Management for Non-Financial Managers is an accessible, practical and easy to understand guide that will allow any manager to gain confidence in understanding financial matters, managing a budget and dealing with bankers, accountants and finance professionals. A source of invaluable expert advice on all the essential aspects of financial management within the context of running a business, it covers: business structures, accounting and financial statements, analysis and ratios, planning, budgeting, product and service costing, setting selling prices, investment appraisal, finance and working capital, taxation and international transactions. This book explains financial literacy in the context of management, showing how improved awareness of finances can lead to increased value creation and protection for your business. Aimed at the practicing business manager, Financial Management for Non-Financial Managers includes case studies, spreadsheets and worked examples to accompany key skills and practices explained in the book.

Money Talks explores the ways the financial concepts of money and capital are understood and talked about by a range of people, from traders to ordinary investors, and how these accounts are framed and represented across a range of media. This collection brings together leading writers and emerging researchers to demonstrate how work in media and cultural studies can contribute to debates around the meanings of money, the operations of capital, and the nature of the current crisis. Drawing on a range of work from across disciplines, Money Talks offers a provocative and path-breaking demonstration of the value of incorporating approaches from media and cultural studies into an understanding of economic issues.

This edition includes a number of new topics, updated examples, and improved exposition of existing materials

Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings - all in the same volume. The innovative and flexible 'two-dimensional' structure is built around four sections - introduction, development, exploration and extension - which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. *Introducing English Language*: is the foundational book in the Routledge English Language Introductions series, providing an accessible introduction to the English language contains newly expanded coverage of morphology, updated and revised exercises, and an extended Further Reading section comprehensively covers key disciplines of linguistics such as historical linguistics, sociolinguistics and psycholinguistics, as well as core areas in language study including acquisition, standardisation and the globalisation of English uses a wide variety of real texts and images from around the world, including a Monty Python sketch, excerpts from novels such as Virginia Woolf's *To the Lighthouse*, and news items from Metro and the BBC provides updated classic readings by the key names in the discipline, including Guy Cook, Andy Kirkpatrick and Zoltán Dörnyei is accompanied by a website with extra activities, project ideas for each unit, suggestions for further reading, links to essential English language resources, and course templates for lecturers. Written by two experienced teachers and authors, this accessible textbook is an essential resource for all students of the English language and linguistics. The contents of this text book cover markets and prices; producers, consumers and competitive markets; market structure and competitive strategy; and information, market failure and the role of government.

Organized topically rather than historically, this book provides an excellent introduction to the subject of African Philosophy. Samuel Oluoch Imbo synthesizes the ideas of key African philosophers into an accessible narrative. The author focuses on five central questions: What are the definitions of African philosophy? Is ethno-philosophy really philosophy? What are the dangers of an African philosophy that claims to be 'unique'? Can African philosophy be done in foreign languages such as English and French? Are there useful ways to make connections between African philosophy, African American philosophy, and women's studies? By making cross-disciplinary and transnational connections, Imbo stakes out an important place for African philosophy. Imbo's book is an invaluable introduction to this dynamic and growing area of study.

Written by Hennie Swanepoel and Frik de Beer (both based in South Africa) this development studies text, first published in 1997, is suitable for all introductory-level courses.

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Microeconomics presents a complete discussion of microeconomic theory for those students who wish to gain an intermediate knowledge of the subject, but it is written in such a way that it is accessible to anyone who has no previous knowledge of microeconomics. A non-mathematical approach is used to explain basic principles as well as more advanced study material. The models are explained by means of diagrams. Theoretical analysis is done in explicit language and to the point discussions, and is augmented with practical examples and explanations. The attractive and functional layout makes the material clear and un intimidating. Each chapter is summarised and includes model questions.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the "elephant in the room". These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum' [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the "gap" that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Contemporary Criminological Issues tackles some of today's most pressing social issues, from the criminalization of Indigenous peoples to interpersonal violence, border control, and armed conflicts. This book advances cutting-edge theories and methods, with the aim of moving beyond the scholarship that reproduces insecurity and exclusion. The breadth of approaches encompasses much of the current critical criminological scholarship, serving as a counterpoint to the growth of managerial and administrative criminologies and the rise of explicitly exclusionary and punitive state policies and practices with respect to 'crime' and 'security.' This edited collection featuring two books, one in English and one in French, includes important contributions to knowledge and public policy by eminent experts and emerging scholars. This book is published in English.

Research in macroeconomics in the last thirty years has featured, almost exclusively on two characteristics: an emphasis on the microfoundations of macroeconomics and secondly, intertemporal economics, that is, the behavior of economic actors over time. Curiously, textbooks in intermediate macroeconomics have been very slow to adopt these traits. The aim of this book is to bring intermediate instruction in macroeconomics fully into line with the direction taken by the research community. Key hallmarks of the text include: a full introduction to the microfoundations of consumption and investment a complete model of the labor market with profit maximization for firms to determine labor demand and a utility maximization model to determine labor supply an analysis of the Baumol-Tobin model to determine money demand accompanied by a discussion of traditional money supply Possessing a full range of additional learning features including a companion website, test bank and instructor's manual, the book takes an international view of macroeconomics with case studies and examples from the United States and beyond.

In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

This brand new textbook on child and adolescent development reflects a scientist's understanding of key research, a psychologist's understanding of people, and a teacher's understanding of students. It features significant new findings, a broad-based global perspective, and enhanced media offerings. With all of this, the book itself is at just the right length and level of coverage to fit comfortably in a single-term, undergraduate-level Developmental Psychology course. With its clear presentation and integration of detailed real-world examples, this acclaimed core textbook accessibly illustrates the relevance of social sciences research without sacrificing key content. This book can be purchased with

the breakthrough online resource, LaunchPad, which offers innovative media content, curated and organised for easy assignability. LaunchPad's intuitive interface presents quizzing, flashcards, animations and much more to make learning actively engaging.

Refined and streamlined, SYSTEMS ANALYSIS AND DESIGN IN A CHANGING WORLD, 7E helps students develop the conceptual, technical, and managerial foundations for systems analysis design and implementation as well as project management principles for systems development. Using case driven techniques, the succinct 14-chapter text focuses on content that is key for success in today's market. The authors' highly effective presentation teaches both traditional (structured) and object-oriented (OO) approaches to systems analysis and design. The book highlights use cases, use diagrams, and use case descriptions required for a modeling approach, while demonstrating their application to traditional, web development, object-oriented, and service-oriented architecture approaches. The Seventh Edition's refined sequence of topics makes it easier to read and understand than ever. Regrouped analysis and design chapters provide more flexibility in course organization. Additionally, the text's running cases have been completely updated and now include a stronger focus on connectivity in applications. Victimology, Seventh Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition uses the theoretical foundation of victimology to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue. Online supplements are available for both professors and students. A new chapter on explaining victimization provides context and a backdrop for examining emerging trends A new chapter on hate crimes delves into the complexities faced by victims as they negotiate the reporting process The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and call-outs to related Internet sites

Discusses the ways in which parental attitudes shape the child's concept of himself and offers guidelines for creating positive relationships

This fully updated second edition of Teaching English, Language and Literacy is an essential introduction for anyone learning to teach English at primary school level. Designed for students on initial teacher training courses, but also of great use to those teachers wanting to keep pace with the latest developments in their specialist subject. Each chapter has a specific glossary to explain terms and gives suggestions for further reading. This second edition covers key areas that students, teachers and English co-ordinators have to manage, and includes advice on: developing reading, including advice on choosing texts, and the role of phonics improving writing skills, including advice on grammar and punctuation planning and assessing speaking and listening lessons working effectively with pupils who are multilingual understanding historical developments in the subject the latest thinking in educational policy and practice, the use of multimedia maintaining good home-school links. gender and the teaching of English language and literacy All these chapters include clear examples of practice, coverage of key issues, analysis of research, and reflections on national policy to encourage the best possible response to the demands of the National Curriculum.

Now you can offer your students a structured, applied approach to behavioral finance with the first academic text of its kind--Ackert/Deaves' BEHAVIORAL FINANCE: PSYCHOLOGY,

DECISION MAKING, AND MARKETS. This comprehensive text--ideal for your behavioral finance elective-- links finance theory and practice to human behavior. The book begins by building upon the established, conventional principles of finance that students have already learned in their principles course. The authors then move into psychological principles of behavioral finance, including heuristics and biases, overconfidence, emotion and social forces. Students learn how human behavior influences the decisions of individual investors and professional finance practitioners, managers, and markets. Your students gain a strong understanding of how social forces impact people's choices. The book clearly explains what behavioral finance indicates about observed market outcomes as well as how psychological biases potentially impact the behavior of managers. Students learn the implications of behavioral finance on retirement, pensions, education, debiasing, and client management. This book is unique as it spends a significant amount of time examining how behavioral finance can be used effectively by practitioners today. The book's solid academic approach provides opportunities for students to utilize theory and complete applications in every chapter. A wide variety of end-of-chapter exercises, discussion questions, simulations and experiments reinforce the book's applied approach, while useful instructor supplements ensure you have the resources to clearly present theories of behavioral finance and their applications. **Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.**

Business Law and the Regulation of Business

An Introduction to African Philosophy

Most students, regardless of their major, need to understand information systems and technologies and their importance to the success of business organizations. While many of today's students have lived with technology their whole lives, they do not see the connection between what they use every day and what they need to understand to be successful in the business world. *Introduction to Business Information Systems, Third Canadian Edition* by James Norrie, Michelle Nanjad and Mark Huber focuses on IT as a source of business value and outlines the innovative technologies, as well as the innovative ways to use technology, that help businesses excel. The goal of this book is to teach students that the effective integration of IS with knowledge can drive the creation of significant business value. *Introduction to Business Information Systems, Third Canadian Edition* is written for both the IT and non-IT major. It is written in a friendly, accessible style that will draw students in and engage them with the content. Expanded coverage of highly technical concepts is included in the Technology Core box found in each chapter as well as the TechGuides.

This fully revised third edition brings a fresh approach to the fundamentals of mass media and communication law in a presentation that undergraduate students find engaging and accessible. Designed for students of communication that are new to law, this volume presents key principles and emphasizes the impact of timely, landmark cases on today's media world, providing an applied learning experience. This new edition offers expanded coverage of digital media law and social media, a wealth of new case studies, expanded discussions of current political, social, and cultural issues, and new features focused on ethical considerations and on international comparative law. *Communication Law* serves as a core textbook for undergraduate courses in communication and mass media law. Online resources for instructors, including an Instructor's Manual, Test Bank, and PowerPoint slides, are available at: www.routledge.com/9780367546694

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

Conveyancing is designed for law students and new lawyers studying applied land law on the Irish Professional Practice Course. As the fourth edition is published at a time when major reform and modernisation of land law and conveyancing is proposed, the text has been fully revised and updated to include reference to proposed reforms, recently published bills and new legislation enacted. This includes new coverage on the Land Act 2005, the Title Act 2006 and the fundamental changes proposed by the Land and Conveyancing Law Reform Bill 2006. In two volumes, the fourth edition also features

updated sample documentation and precedents to enable students to consider the procedural aspects of conveyancing. It includes complete coverage of all the essential knowledge needed when practicing conveyancing, including the legal concept of property, and the protection, acquisition and movement of proprietary interests. The principles of conveyancing practice are clearly explained, ensuring that this is an essential text for apprentices and practitioners in this field.
