Using an inquiry-based approach to learning, Oxford Discover develops the communication skills and thinking skills students need for success in the 21st century. Who are your family and friends? Where can we see colors? How can we make music? Oxford Discover uses Big Questions such as these to tap into students' natural curiosity. It enables them to ask their own questions, find their own answers, and explore the

world around them. This approach to language learning and literacy, supported by a controlled grammar and skills syllabus, helps students achieve near-native fluency in English. Oxford Discover gives teachers the tools to develop children's 21st century skills, creating young thinkers with great futures. Use with Show and Tell as part of 9-level course.

A Co-publication of the National Council of Teachers of English and Routledge. How can teachers make sound pedagogical decisions and advocate for educational policies that best serve the needs of students in today's diverse classrooms? What is the pedagogical value of providing culturally and linguistically diverse students greater access to their own language and cultural orientations? This landmark volume responds to the call to attend to the unfinished pedagogical business of the NCTE Conference on College Composition and Communication 1974 Students' Right to Their Own Language resolution. Chronicling the interplay between legislated/litigated education policies and language

and literacy teaching in diverse classrooms, it presents exemplary research-based practices that maximize students' learning by utilizing their home-based cultural, language, and literacy practices to help them meet school expectations. Pre-service teachers, practicing teachers, and teacher educators need both resources and knowledge, including global perspectives, about language variation in PreK-12 classrooms and hands-on strategies that enable teachers to promote students' use of their own language in the classroom while also addressing mandated content and performance standards. This book meets that need. Visit <http://www.ncte.org> for more information about NCTE books, membership, and other services.

Since the publication of the still very valuable Biblioteca histórica de la filología by Cipriano Muñoz y Manzano, conde de la Viñaza (Madrid, 1893), our knowledge of the history of the study of the Spanish language has grown considerably, and most manuscript and secondary sources had never been tapped before Hans-Josef Niederehe of the University of Trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings, scattered in libraries, journals and other places. The resulting Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español: Desde los principios hasta el año 1600 (BICRES) began appearing

in 1994. BICRES I covered the period from the early beginnings to 1600), followed by BICRES II (1601–1700), BICRES III (1701–1800), and together with Miguel Ángel Esparza Torres of Madrid there followed BICRES IV (1801 to 1860). Now, the fifth volume, has become available, covering the years from 1861 to 1899. Access to the bibliographical information of altogether 5,272 titles is facilitated by several detailed indexes, such as a short title index, a listing of printers, publishers and places of production, and an author index. More than twenty years of research in the major libraries of Spain and other European countries have gone into this unique work — relative sources of the Americas have also been covered — making it exhaustive source for any serious scholar of any possible aspect of the Spanish language.

cero; de hecho, halla su carta de naturaleza en la necesidad de mejorar el medio que la nutre y por y para el que existe: la sociedad. Rompiendo las viejas membranas de la enseñanza imperante hasta el siglo XX, las nuevas (r)evoluciones de contenidos y fórmulas, como lo fuera el EEES (o Plan Bolonia) o las TIC, suponen la respuesta a esas actualizadas necesidades docentes y curriculares. Las Humanidades, las Artes, las Ciencias sociales y la Docencia se reescriben, hibridando, gracias a los nuevos lenguajes y herramientas, contenidos otrora lejanos. La nueva Academia es poliédrica, ínter y multi disciplinar, dialógica y colaborativa. En este estado de cosas la colección Herramientas universitarias se erige como atalaya para agrupar bajo su égida al más amplio conjunto de autores internacionales que iluminen, con sus investigaciones, la panoplia de contenidos que conforman el mundo científico donde nace el futuro. La calidad intelectual queda refrendada mediante la rigurosa implantación del habitual proceso garante, basado en la revisión o arbitraje por pares ciegos (peer review) de estos capítulos, sin renunciar a la más antigua tradición universitaria que obliga al opositor de lo publicado, a soportar
