

Emerging Trends In Teaching Of Computer Science

"This book provides a forum for researchers and practitioners to discuss the current and potential impact of online learning and training and to formulate methodologies for the creation of effective learning systems"--Provided by publisher. Cyber environments have become a fundamental part of educational institutions, causing a need for understanding the impact and general principles of ethical computer use in academia. With the rapid increase in the use of digital technologies in classrooms and workplaces worldwide, it is important that part of the training that takes place for students is how to be good cyber citizens, who are ethical in the decisions that they make and in their interactions with others across digital platforms. Emerging Trends in Cyber Ethics and Education is a pivotal reference source that provides vital research on the application of ethics and education within online environments. While highlighting topics such as computer simulation, corporate e-learning, and plagiarism detection, this publication explores effective ways of utilizing digital landscapes for online education, as well as the methods of improving cyber security frameworks. This book is ideally designed for educators, IT developers, education professionals, education administrators, researchers, and upper-level graduate students seeking current research on secure and educational interactions in digital landscapes.

As classrooms across the globe become increasingly more diverse, it is imperative that educators understand how to meet the needs of students with varying demographic backgrounds. Emerging Issues and Trends in Education presents case studies from academics who have all at one point been teachers in K–12 classrooms, addressing topics such as STEM as well as global issues related to race, gender education, education policy, and parental engagement. The contributors take an international approach, including research about Nigerian, Chinese, Native American, and Mexican American classrooms. With a focus on multidisciplinary perspectives, Emerging Issues and Trends in Education is reflective of the need to embrace different ways of looking at problems to improve education for all students.

Higher education has a vital role to play in the social and economic development of all countries. The sector, however, faces a significant number of critical issues to be addressed, major challenges to be met and overcome, and significant opportunities to be grasped and consolidated. Higher education institutions are now expected to operate, manage, compete, be creative and innovative, and provide intellectual leadership in a world characterized by increasingly rapid, pervasive and fundamental change. The question of how to maximize the performance of the higher education sector in the context of such an environment is the focus of the chapters in this book, which provide perspectives, analyses and examples relating to some of the major issues and challenges confronting higher education, both now and in the future. The information presented is drawn from recent research, as well as critical analyses of existing theory and practice. Authors are drawn from ten different countries: Australia; Brazil; Belgium; China; Israel; The Netherlands; Portugal; Turkey; the United Kingdom; and the USA. The topics addressed include: the role of higher education; government policy agendas; skills for the 21st Century; the role of higher education in addressing poverty; higher education and the labor market; the future of Brazilian higher education; higher education cost-sharing policy; the impact of political culture on higher education reform; accreditation; quality assurance; improving teaching and learning; promoting technology integration; creating inclusive higher education institutions; English for academic purposes; the relationship between learning style preference and academic disciplines; quality work-integrated learning; student learning in research-based doctorates; and developing emotional intelligence in higher education students.

Recognizing the need to ensure education for all especially in a developing nation like India, Emerging Trends in Higher Education: Concepts and Practices provides critical insights in the field of Education to achieve this goal. The essays in this volume present a comparative perspective of national and global education policies. It is useful for policy makers and the concepts and practices discussed will be of help to students and scholars of sociology and educational studies.

Teaching and Learning Chinese as a Second or Foreign Language, edited by Ko-Yin Sung, addresses three emerging themes in the field of Chinese language teaching and learning. (1) Increasingly ubiquitous in all language learning and teaching, and for the learning of Chinese as a second language in particular, information and communication technology (ICT) can serve as an important and effective tool. Several chapters focus on how certain emerging ICT tools are applied in teaching and learning Chinese as a second language. (2) Due to China’s economic and political influence, the number of students of all ages studying Chinese as a second language—but especially young learners—has increased in many parts of the world. Despite this, the research into teaching Chinese to young learners has lagged behind. Several chapters investigate young learners’ motivations and effective methods for assisting them to master the Chinese language. (3) The writing system of the Chinese language poses many challenges for learners, especially those more familiar with alphabetical languages. In light of this difficulty in learning Chinese characters, some of the chapters identify effective teaching and learning strategies to master the Chinese language.

Current Issues and Trends in Education synthesizes political, theoretical, social, and practical topics in a 21st Century context and addresses multicultural education, technology, and gender issues. This text is accessible enough to be used in an introductory education class and yet sophisticated enough to serve as a graduate textbook. It is comprehensive in dealing with issues facing educators today, such as demographics, changing perceptions and research in human development and learning, and education in nontraditional settings. **NEW** to this Edition: New chapter (6) on assessment includes discussion of questionable testing practices. New chapter (7) reflects current events such as the impact of No Child Left Behind, including Highly Qualified Teachers, PRAXIS and teacher testing). Chapter on developmentally appropriate practice (8)has been updated and expanded to include best practice guidelines for a wider age range of students. Discusses the pros and cons of technology as it relates to education, including topics ranging from assistive technology to Internet abuse and iPod mania. Addresses teachers', students', and parents' rights and responsibilities, including attitudes and dispositions, effective communication, and active participation versus passive/victim mentality. Provides new ways of looking at the organization of schools, including the pros and cons of various issues related to teacher education. Covers current theories related to education, including change theory and attribution theory. Educational Trends Exposed explains and critically reviews eighteen of the most prevalent trends sweeping schools, colleges and universities over the last decade and beyond. Amid the buzz from news outlets, websites and social media peddling ‘this works’ approaches and ‘quick fix’ solutions, this book provides educators with a practical tool to help answer important questions such as: what does this trend actually involve? Is it worth the investment of time and resources? Does it work - what does research say? Do the claimed benefits to students outweigh any downsides? In this timely book, David Armstrong and Gill Armstrong cast a critical, expert eye over these trends, referencing the latest research and offering a framework for considering educational trends, empowering readers as informed critical consumers. They argue that trends disclose deeper truths about the state and direction of contemporary public education in Australia, England and the US and provide original, thought-provoking analysis. This book demonstrates that a greater understanding of trends can teach some important lessons, including how parents, teachers and educational decisions makers can agitate and collaborate for a modernised and more socially equitable education system. **Educational Trends Exposed** is essential reading for pre- and in-service teachers, and all educational decision makers who are faced with a choice of which trend, if any, to follow.

In Indian context.

Field experience is one of the most important elements of teacher education. It provides a pivotal opportunity for the student teacher to combine learned theories with the everyday realities of the classroom. Until now, directors of field experience programs and others responsible for teacher education have had very few resources to help them create the best possible programs for education students. To fill this need, Gloria Slick has brought together the best thinkers and doers in the field today to provide a comprehensive look at all aspects of the field experience. They discuss topics such as multicultural education for an increasingly multicultural population, using technology in teacher preparation programs, developing teacher leadership abilities for site-based decision making, and developing habits of reflective practice in teachers. Also addressed are international perspectives in teacher education, the psychology of supervision, preparing teachers for legal workplace issues in an increasingly litigious society, and supervising and mentoring new teachers from field experiences through the first 5 years of teaching. The chapter titled "Bits and Pieces" presents an encapsulation of the points made in the book and includes additional relevant comments.

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

Advancing technologies are rapidly modifying the current state of business and society causing an expansion of possible career opportunities. In order to stay competitive, institutions of education must provide an emphasis on the wide-range of skills and experiences needed to contribute to a 21st century workforce. As new technologies emerge and even disrupt, there will be a demand for new forms of education and deeper learning. **Disruptive and Emerging Technology Trends Across Education and the Workplace** is a collection of innovative research on the latest instructive methods being utilized in classrooms and organizations as well as the benefits and challenges of adopting these technologies. While highlighting topics including mobile learning, augmented reality, and cryptocurrencies, this book is ideally designed for developers, professionals, educators, managers, researchers, scientists, stakeholders, strategists, practitioners, and students seeking current research on new forms of educational techniques in relation to the continued application of new technologies in the workplace.

Understanding new educational innovations is essential for the improvement of the training and learning process. In order to effectively implement these new tools in the classroom, teachers and trainers need access to real-life cases in which these methods were successfully used. Innovative Trends in Flipped Teaching and Adaptive Learning is a critical scholarly resource that examines current advances in educational innovation and presents cases that allow for the improvement of personalized and active learning. Featuring a wide range of topics such as higher education, teacher education, and learning strategies, this book is ideal for educators, instructional designers, academicians, researchers, and students.

Language teaching approaches, methods and procedures are constantly undergoing reassessment. New ideas keep emerging as the growing complexity of the means of communication and the opportunities created by technology put language skills to new uses. In addition, the political, social and economic impact of globalisation, the new demands of the labour market that result from it, the pursuit of competitiveness, the challenges of intercultural communication and the diversification of culture have opened new perspectives on the central role that foreign languages have come to play in the development of contemporary societies. This book provides an insight into the latest developments in the field and discusses the new trends in foreign language teaching in four major areas, namely methods and approaches, teacher training, innovation in the classroom, and evaluation and assessment.

This book documents recent attempts to conduct systematic, prodigious and multidisciplinary research in learning analytics and present their findings and identify areas for further research and development. The book also unveils the distinguished and exemplary works by educators and researchers in the field highlighting the current trends, privacy and ethical issues, creative and unique approaches, innovative methods, frameworks, and theoretical and practical aspects of learning analytics.

A comprehensive look at the promise and potential of online learning In our digital age, students have dramatically new learning needs and must be prepared for the idea economy of the future. In Getting Smart, well-known global education expert Tom Vander Ark examines the facets of educational innovation in the United States and abroad. Vander Ark makes a convincing case for a blend of online and onsite learning, shares inspiring stories of schools and programs that effectively offer "personal digital learning" opportunities, and discusses what we need to do to remake our schools into "smart schools." Examines the innovation-driven world, discusses how to combine online and onsite learning, and reviews "smart tools" for learning Investigates the lives of learning professionals, outlines the new employment bargain, examines online universities and "smart schools" Makes the case for smart capital, advocates for policies that create better learning, studies smart cultures

In the digital age, online courses have progressed as popular modes of learning that provide interactive and collaborative learning in educational settings. The open education movement is enabled by the internet and combines the sharing of ideas, resources, and practices among all people in order to advance ideas and knowledge to a new generation of students. Massive open online courses (MOOC) provide a new way of learning for all levels of education. Emerging Trends, Techniques, and Tools for Massive Open Online Course (MOOC) Management is a critical scholarly resource that addresses the difficulties and challenges in MOOC design, implementation, management, and deployment. This comprehensive and timely publication aims to be an essential reference source, building on the available literature in the field of e-learning and online course management while providing for further research opportunities in this dynamic field. Featuring coverage on a wide variety of topics such as gamification in e-learning, plagiarism detection programs, and language online courses, this book is a valuable resource for instructional designers, IT professionals, software developers, academicians, and education professionals seeking current research on the impact of new methodologies and frameworks used in the lifecycle of open online courses.

Current Trends in the Development and Teaching of the four Language Skills builds connections from theory in the four language skills to instructional practices. It comprises twenty-one chapters that are grouped in five sections. The first section includes an introductory chapter which presents a communicative competence framework developed by the editors in order to highlight the key role the four skills play in language learning and teaching. The next four sections each represent a language skill: Section II is devoted to listening, Section III to speaking, Section IV to reading and Section V to writing. In order to provide an extensive treatment of each of the four skills, each section starts with a theoretical chapter which briefly illustrates advances in the understanding of how each skill is likely to be learned and taught, followed by four didactically oriented chapters authored by leading international specialists. These pedagogical chapters deal specifically with four key topics: 1) areas of research that influence the teaching of a particular skill; 2) an overview of strategies or techniques necessary for developing a particular skill; 3) an approach to the academic orientation of a particular skill, and 4) unique aspects of teaching each skill. Moreover, all chapters incorporate two common sections: pre-reading questions at the beginning of the chapter in order to stimulate readers' interest in its content, and a section entitled suggested activities at the end of the chapter in order to allow readers put the ideas and concepts presented into practice. The accessible style and practical focus of the volume make it an ideal tool for teachers, teacher trainers, and teacher trainees who are involved in teaching the four language skills in a second or foreign language context.

There is increasing recognition that teachers will play a key role in preparing students for the challenges of the future. We expect teachers to equip students with the skill set and knowledge required for success in an increasingly global, digital, complex, uncertain and volatile world.

Industrial Revolution 4.0 has dramatically changed the business and social landscape, including human behavior not only in advanced countries but also in emerging countries. Technology development affects many aspects in our society, including education. Distance learning, big data and analytics, artificial intelligent and many digital innovations have been released to improve better quality education in our society. These proceedings provide selected papers/research about innovative digital technology in education and pedagogy in industrial revolution 4.0 covering issues like: pedagogy, education management, early childhood education, research in education, training and vocational education and social science education, earth science education and art/linguistic education related to digital innovation. This book provides details beyond what is possible to be included in an oral presentation and constitute a concise but timely medium for the dissemination of recent research results. It will be invaluable to professionals and academics in the field of education and pedagogy to get an understanding of recent research.

This volume is a collection of eleven papers written by scholars from around the world, who came together in their shared interest to discuss current trends and issues in higher education. Rich in a diversity of topics, Current Trends and Issues in Higher Education represents a valuable contribution to the fields of language, culture, teaching methodology, education, linguistics and central Asian studies. This book synthesises current theoretical and practical insights in higher education provided by active researchers and practitioners in their respective areas. It is comprehensive in dealing with the issues facing educators today, such as changing perceptions in education and research, and learning and teaching in traditional and non-traditional settings. With today's constant changes in the field of education as a result of new legislation and globalization, and new instructional practices and research investigations, this book will help all involved in education to keep up with these transformations and be up-to-date in all areas relating to higher education.

Interested to learn more about current trends and issues affecting today's education? You are in the right place! The main problem that lies before us is the limited amount of writing that is available on this subject. There are numerous questions to answer, such as: What sets this book apart from the other books written on this subject? Why should people purchase and read this book? What makes my book relevant in today's world? There are answers that provide solutions about the reasons that I was compelled to write this book. My educational background is quite unique and different from other academic writers. I am first and foremost a pianist. I spent the first part of my career as a concert pianist. I learned and studied from the great classical piano literature: Composers like Chopin, Beethoven, Prokofiev and many others. The 2nd passion in my life is academic research and writing. My serious education began at the College of William and Mary where I earned a BA in Music. It concluded on March 18, 2018 when I finished writing my dissertation and earned my Doctoral degree, while working in Nuuk Greenland, under the auspicious of Genesis University. It has been quite a long journey to get to this point. Welcome to Current Issues and Trends Affecting Education!

Presently, people are facing a condition called VUCA (Volatility, Uncertainty, Complexity, and Ambiguity) where this condition is described as a turbulent, uncertain, complicated, unclear condition. The world of work and industry is changing quickly, driven by the development of technology, information and communication. Advances in computer technology, artificial, intelligence, robotics which is also called as the industrial revolution 4.0 eras, are of significant influence on environment and people. A time where humans must learn quickly, and an era where the future is unpredictable, where choices for various conditions are increasing and mindsets are changing. The big challenge for educational institutions, especially Islamic educational institutions today, is how to prepare young people on various aspects of cognitive, mental, and spiritual preparedness to face the changing environment. Development in the real world is far more complex than what is learned in the classroom, so it is necessary to educate and transform curriculum that is directed in accordance with the demands of present times. The 6th International Conference on emerging trends in technology for education in facing VUCA (Volatility, Uncertainty, Complexity, and Ambiguity) is designed not only to share research, but also to offer recommendations to governments, educational institutions and other stakeholders to improve the quality of education through technology-based educational programs. The conference was held by Faculty of Education UIN Syarif Hidayatullah Jakarta. Scholars, researchers, policy makers, teachers, and students from various countries participated and worked together to discuss how to improve the quality of education in the Muslim community. Guided by UIN Jakarta, the 6th ICEMS of 2020 provided opportunities for various educational stakeholders especially in Muslim Communities around the world to share their creative and innovative works, opinions, and experiences in open academic forums.

This book presents the latest research on understanding language teacher identity and development for both novice and experienced researchers and educators, and introduces non-experts in language teacher education to key topics in teacher identity research. It covers a wide range of backgrounds, themes, and subjects pertaining to language teacher identity and development. Some of these include the effects of apprenticeship in doctoral training on novice teacher identity; the impacts of mid-career redundancy on the professional identities of teachers; challenges faced by teachers in the construction of their professional identities; the emerging professional identity of pre-service teachers; teacher identity development of beginning teachers; the role of emotions in the professional identities of non-native English speaking teachers; the negotiation of professional identities by female academics. Advances and Current Trends in Language Teacher Identity Research will appeal to academics in ELT/TESOL/applied linguistics. It will also be useful to those who are non-experts in language teacher education, yet still need to know about theories and recent advances in the area due to varying reasons including their affiliation to a teacher training institute; needs to participate in projects on language teacher education; and teaching a course for pre-service and in-service language teachers.
