Se trata de un texto introductorio al concepto de "revolución científica". En la primera parte se aborda la polémica entre aquellos que apoyan la idea de la continuidad del desarrollo científico (Sarton, Whewell, Dijksterhuis) y aquellos que ven en la historia de la ciencia como una sucesión entre periodos de estabilidad y periodos de revolución conceptual (Kuhn, Duhem, Koyré). La segunda parte estudia los casos de diversos personajes -Aristóteles, Galeno, Descartes y Newton, por ejemplo-, considerados los protagonistas de distintas revoluciones científicas.

Cet ouvrage fait suite au bilan présenté dans L'Ecriture de l'essai (L'Hexagone, 1994), mais, grâce à la magie du dialogue qui permet de donner la parole à des voix différentes, légèrement discordantes parfois, le ton a complètement changé, suscitant même des apports nouveaux : une analyse détaillée de la valeur suggestive du mot essai, l'élucidation du problème de l'ambiguïté constitutive de l'essai, qui affecte le concept même de littérature, la mise en lumière de la structure ironique de l'essai, l'étude de la nature exacte du je de l'écriture, au coeur de l'essence littéraire de l'essai, la prise en compte de l'hybridité formelle de certains textes et le constat de la regrettable méconnaissance de l'essai comme symptôme d'une désaffection à l'égard de tous les modèles de la culture.

Lorsque l'on cite le nom de Luther en relation avec la traduction, chacun pense à son plaidoyer pour la liberté à l'égard de la lettre du texte original et pour le respect de l'idiomaticité de la langue-cible. Luther ne serait pas très original dans l'histoire de la pensée traductologique si sa contribution se résumait à cette idée cent fois rebattue depuis Cicéron. A quoi bon offrir une nouvelle traduction française du Sendbrief vom Dolmetschen ? C'est que les choses sont plus compliquées que cela, et que la réflexion de Luther traducteur s'enracine dans ses convictions religieuses. Ce volume tente d'éclairer les liens qu'il y a chez Luther entre théologie, " deffence et illustration " de la langue allemande et théorie de la traduction.

The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.
