My name is Eli. I am the one telling the story and the one the story is about. The one with the voices in her head. Eli Larsen is a talented author and film-maker. She writes books. She directs films. She wins awards. She is a success. But Eli has a secret. Since she was a child she has shared her life with Espen, Erik, Prince Eugen and Emil. Sometimes they're friendly, sometimes comforting, but sometimes they want to hurt Eli and the people she loves most. In this candid and beautiful novel Beate Grimrud

This book proposes a path-breaking study of the economics of multilingualism at work, proposing a systematic approach to the identification and measurement of the ways in which language skills and economic performance are related. Using the instruments of economic investigation, but also explicitly relating the analysis to the approaches to multilingualism at work developed in the language sciences, this interdisciplinary book proposes a systematic, step-by-step exploration of the issue. Starting from a general identification of the linkages between multilingualism

and processes of value creation, it reviews the contributions of linguistics and economics before developing a new economic model of production in which language is taken into account. Testing of the model using data from two countries provides quantitative estimations of the influence of multilingualism on economic processes, showing that foreign language skills can make a considerable contribution to a country's GDP. These findings have significant implications for language policy and suggest strategies helping language planners to harness market forces for increased effectiveness. A technical appendix shows how the novel technical and statistical

procedures developed in this study can be generalized, and applied wherever researchers or decision makers need to identify and measure the value of multilingualism.

Young building worker, Toni V, finds a diary buried in a water can in the rubble of a construction site. He knows he should just hand it in to the Supervisor - that's the rule. But curiosity gets the better of him and he starts reading. At first the diarist, Pelly D, seems like any ordinary girl, writing about clothes, parties, boys. But underneath the light, sassy, often sarcastic narrative, Toni V begins to sense that something very different, sinister, and scary is unfolding. Set far in the future and

Digitalisation, globalisation, demographic shifts and other changes in work organisation are constantly reshaping skill needs. This can lead to persistent skill shortages and mismatch which are costly for individuals, firms and society in terms of lost wages and lower productivity and growth.

Can we imagine a future in which physical education in schools no longer exists? In this controversial and powerful meditation on physical education, David Kirk argues that a number of

different futures are possible. Kirk argues that multi-activity, sport-based forms of physical education have been dominant in schools since the mid-twentieth century and that they have been highly resistant to change. The practice of physical education has focused on the transmission of de-contextualised sport-techniques to large classes of children who possess a range of interests and abilities, where learning rarely moves beyond introductory

levels. Meanwhile, the academicization of physical education teacher education since the 1970s has left teachers less well prepared to teach this programme than they were previously, suggesting that the futures of school physical education and physical education teacher education are intertwined. Kirk explores three future scenarios for physical education, arguing that the most likely short-term future is 'more of the same'. He makes an impassioned call for

Literacy remains a contentious and polarized educational, media and political issue. What has emerged from the continuing debate is a recognition that literacy in education is allied closely with matters of language and culture, ideology and discourse, knowledge and power. Drawing perspectives variously from critical social theory and cultural studies, poststructuralism and feminisms, sociolinguistics and the ethnography of communication, social history and comparative education, the contributors begin a critical interrogation of taken-for-
