Workplace English language training programs represent a corporate investment in language skills enhancement and human capital development. This book evaluates English language training programs in Chinese workplaces by examining a range of training effectiveness variables and identifying the factors that facilitate or hinder effective learning outcomes for workplace English training programs and explores the potential benefits of these programs. This book will benefit both companies that are developing their training and development strategies and private training organizations that are developing training programs for particular industry and business needs. It will also be an excellent resource for learners who are seeking business English communication skills opportunities and trainers who are refining their workplace teaching practice. This book reiterates the significance of business English communication skills development programs in terms of the benefits to economic globalization, human capital development, employability, sustainable livelihoods, and lifelong learning in China. Having conducted a policy evaluation at both the national and local levels, this book also informs policy stipulation for corporate employee language training schemes. Although this book primarily examines corporate experience in China, the findings and recommendations will have important implications for other countries in Asia and worldwide.

The Grammaring Guide to English Grammar is a resource book on the grammar of Standard British English. It is intended for intermediate to advanced students of English as a second or foreign language who have already studied the basic grammar of English. It covers the most important areas of English grammar and concentrates on structures which may cause difficulty at an intermediate level or above. The book starts with a pretest that helps you identify the areas you need to work on. The pretest is followed by eleven chapters, broken down to a number of subchapters that each deal with a specific grammar point. The related explanations are accompanied by real-life sample sentences, timeline diagrams, tables, and quotes. If a similar point or the same point is discussed in a different part of the book, you will find cross-references to that point. Where appropriate, chapters begin with guiding questions and end with revision questions. Most of the chapters are followed by exercises, including multiple choice, sentence transformation, error correction, gap filling and matching exercises, as well as communicative tasks that can be done in language lessons. At the end of the book, there is an appendix which contains a list of the most common irregular verb forms and the most important spelling rules; a list of the quotes that appear in the book; and a glossary that defines grammatical terms frequently used in the explanations. The chapters in this book are not arranged in order of difficulty. This way, the book can be used for quick reference on specific points of interest, as well as for systematic study, either as a self-study grammar book or as additional material in an ESL/EFL course. No matter which way you use the book, it is recommended that you follow the cross-references, which will lead you to further information on a given item. The exercises, which come with suggested answers, are best done using pen and paper. These exercises will not only help you to practise grammar but also to tie grammatical forms to real-world meaning.

Do private and philanthropic solutions to the problems of education signal the end of state education in its 'welfare' form? Education policy is being reformed and re-worked on a global scale. Policies are flowing and converging to produce a singular vision of 'best practice' based on the methods and tenets of the 'neo-liberal imaginary'. Philanthropy, business and the governments are coming together in new networks and sites of policy outside of the framework of the nation state. This book is a first step in recording, mapping and making sense of the most important aspects of these new relations and dynamics of policy. Using the approach of 'policy sociology' and the methods of social network analysis, Global Education Inc. explores the policy activities of edu-businesses, neo-liberal advocacy networks and policy entrepreneurs, and of social enterprises and 'new' philanthropy. It also addresses the ways in which education and education policy itself are now being exported and bought and sold as profitable commodities and how entrenched problems of educational development and educational quality and access are now being addressed through 'market solutions'. That is, by the involvement of private providers in the delivery of educational services, both independently and on behalf of the state. Universities, schools and education services are being acquired as assets by private equity companies. Private storefront schools are being set-up by local entrepreneurs and through franchising arrangements, funded through microloans. School chains funded by philanthropy and run by multi-national edu-businesses are being harnessed to the attempts of developing societies in an attempt to achieve their Millennium Development Goals and provide mass access to basic education. Curriculum materials and pedagogy software and policy ideas such as inspections, leadership, school choice and accountability are being retailed by western 'knowledge companies' and consultants across the globe. This book argues that these new forms of policy and policy-making require new concepts and methods of policy analysis, with chapters including: Networks, Neo-liberalism and Policy Mobilities New' Philanthropy, Social Capitalism and Education Policy Policy as Profit: Selling and Exporting Policy Money, Meaning and Policy Connections Global Education Inc. is a crucial book that will be of great interest to students of social and education policy and social and education policy analysts and researchers.

English for Specific Purposes (ESP) has accumulated substantial tradition in practice, research and theory. It is a common approach in English Language Teaching (ELT) among adults today, starting with high schools, then in academia, pre and in-service training, and life-long learning programs. The role of ESP in each of these is to facilitate work in today's inevitably international business and scientific environment. It provides language training based on the precise simulation of communicative situations found in the surroundings for which learners are preparing, including, for example, domain specific vocabulary, syntactic and morphological structures, text and speech content structuring, stylistics, intercultural competence. At present, when English is present either as a foreign or second language, learning General English (GE) is to a large degree accomplished before learners start needing English for their jobs. In this way, ESP does not complete GE, but builds upon the foundations laid by it in learners' prior education. ESP is a channel of communication for the contemporary academia and economics. However, even so, these are still early days for ESP, as it does not yet have a recognised place within academia. Only very recently have we begun to witness the occasional but encouraging emergence of ESP academic courses and departments. This book thus explores practice and research conducted and under way in this field of ELT in order to assist its recognition as an autonomous academic discipline.

Gives background to the business learner's world and strategies for approaching the training task, focusing on the learner's professional knowledge and experience. This book is suitable for teachers, trainers, and course organizers in the field of Business English or considering a move into it.

English for Specific Purposes (ESP) is one of the most needed forms of English Language Teaching with regards to the adult population in today's global market economy where the English language is a prerequisite for the exchange and communication of professional ideas, best practices, and experiences, and a necessary skill for advancement in one's career. This comprehensive volume brings together the most insightful papers from the First International Conference on Teaching English for Specific and Academic Purposes, titled "Connect and Share", held at the Faculty of Electronic Engineering of the University of Niš, Serbia, in May 2013. The collection covers a diverse and extensive list of topics, and provides a number of invaluable contributions which prove the presence of ESP in all continents, and in many different professions, sciences, and businesses. Also of interest is the fact these papers highlight the interrelatedness of ESP and linguistics, the methodology of teaching, sociolinguistics, and a number of other fields relevant to the study and practice of languages. The chapters of this book prove that immense, original, creative and worthwhile research is being conducted in the ever-growing and increasingly relevant field of ESP. At the same time, the book also offers rich insights into many innovative teaching practices that justify ESP as an important area of academic study.

English Language Training in the Workplace

Case Studies of Corporate Programs in China

With the unrelenting spread of globalization, the English language has been firmly established as the Lingua Franca. Now more than ever, the importance of learning English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.

Central Europe has always been a highly multilingual region but how has this been affected by the social and political transformations of the last 20 years? The German language in particular has long played a key role in processes of identification here: but what role is the relationship between German and other languages playing today in the reshaping of societies and communities in this rapidly changing region? How is this relationship articulated in discourses on language and language ideologies? How is it manifested in individual repertoires and social practices? How is it determined by social and cultural policies? How is it exploited in the construction of European identities? These are just some of the questions addressed in this book, in which individual studies explore language practices in the multilingual contact zones of central Europe and the impact of both past and present migrations. Analysing a wide range of sources from media texts to language biographies and from business meetings to salsa classes, the authors demonstrate the local effects of global processes and some of the many ways in which language figures in contemporary social change.

Selected papers from the International Conference on New Computational Social Science, focusing on the following five aspects: Big data acquisition and analysis, Integration of qualitative research and quantitative research, Sociological Internet experiment research, Application of ABM simulation method in Sociology Research, Research and development of new social computing tools. With the rapid development of information technology, especially sweeping progress in the Internet of things, cloud computing, social networks, social media and big data, social computing, as a data-intensive science, is an emerging field that leverages the capacity to collect and analyze data with an unprecedented breadth, depth and scale. It represents a new computing paradigm and an interdisciplinary field of research and application. A broad comprehension of major topics involved in social computing is important for both scholars and practitioners. This proceedings presents and discusses key concepts and analyzes the state-of-the-art of the field. The conference not only gave insights on social computing, but also affords conduit for future research in the field. Social computing has two distinct trends: One is on the social science issues, such as computational social science, computational sociology, social network analysis, etc; The other is on the use of computational techniques. Finally some new challenges ahead are summarized, including interdisciplinary cooperation and training, big data sharing for scientific data mashups, and privacy protect.
