This volume offers the most comprehensive, up-to-date description of the wide array of second language programs currently available to undergraduate students in the United States and abroad. It brings together, for the first time, detailed descriptions of programs in foreign language, English as a second language (ESL), dual language (bilingual), American Sign Language, Native American, and heritage languages. Addressing both theory and practice, the volume presents the

historical development, current practices, and future directions of each type of program, along with detailed case studies. For second language teachers, academic administrators, and teacher educators, this Handbook provides information that will be useful in making instructional and programmatic planning decisions. This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The

Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in perspective with a range of fresh new voices in English language teaching research.

The series Handbooks of Linguistics and Communication Science is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have

For the many categories of EFL teachers throughout the world, this book examines the main principles which concern them. By drawing upon their experience the authors have indicated a modern and practical approach.

Includes section "Reviews and notices of books".

The education of second language teachers takes place across diverse contexts, levels, settings, and geographic regions. By bringing together research, theory, and best practices from a variety of contexts (ESL/EFL, foreign language, bilingual and immersion education), this book contributes to building meaningful professional dialogue among second-language teacher educators. Featuring an international roster of authors, the volume is comprised of 18 chapters organized in four thematic sections: the knowledge

Foreign language learning is a progressive endeavor. Whatever the method, the learner should advance from one point to another, constantly improving. Growing proficiency entails growing language content. Content is complex, displaying many dimensions. Syllabus designers, textbook authors, and teachers often struggle with the

monitoring of content. Computer-assisted systemization helps to handle it in a manageable framework. Besides inventorying content, it ensures more balanced selections, calculated progression, and controlled reiteration of previously learned material. It gauges the usability of authentic material in relation to the level attained. During the teaching process, it allows the instant selection of items needed for a communicative

situation, focus on forms, or particular exercises. This book first describes the theoretical background for systemization, including a historical overview, with special attention to the Common European Framework and the new Profiles and Referentials. Next the practical steps for computer-assisted implementation with examples taken from French and English, but applicable to any language.

The State Role in School Turnaround
The Education Gazette

The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country,

a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners,

teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government

emphasis is also placed on practical,

research process. The advantages and disadvantages of automated and semi-automated approaches are analyzed, the capabilities of linguistic software tools investigated, the corpora (and compilation processes) described in detail. In this way, an important function of the volume is to give practical insight to researchers who may be considering compiling a corpus of learner data or embarking on learner corpus research. The volume is divided into three

main sections: Section 1 gives a general overview of learner corpus research; Section 2 illustrates a range of corpus-based approaches to interlanguage analysis; Section 3 demonstrates the direct pedagogical relevance of learner corpus work.

English for Specific Purposes offers the teacher a new perspective on this important field. The main concern is effective learning and how this can best be achieved in ESP courses. The authors

discuss the evolution of ESP and its position today; the role of the ESP teacher; course design; syllabuses; materials; teaching methods, and evaluation procedures. It will be of interest to all teachers who are concerned with ESP. Those who are new to the field will find it a thorough, practical introduction while those with more extensive experience will find its approach both stimulating and innovative.

learning Arabic as a second language. Arabic Second Language Acquisition of Morphosyntax presents a data-driven and systematic analysis of Arabic language acquisition that responds to this growing need. Based on large data samples collected from longitudinal and cross-sectional studies, this book explores a broad range of structures and acquisition issues. It also introduces new and comprehensive research, and it documents the successes and problems that native speakers of other languages, including English, Spanish, French, and Japanese, are likely to encounter in learning Arabic. By integrating

previously published findings with new research, the author has created a unified and streamlined resource for teachers, teachers-in-training, linguists, Arabic textbook authors, and second-language acquisition experts.

This bibliography offers English-as-a-Second-Language (ESL) and English-as-a-Foreign-Language (EFL) specialists and non-specialists a listing of almost 3,500 works in the field of writing in ESL/EFL, at all educational levels, from 1937 through 1993. It includes works focusing on how non-native speakers write in English, how they learn to

write in English, how ESL and native-English-speaker (NES) compositions compare, how English is taught in contexts where it is used as a second or foreign language, and instructional materials developed to support writing in a second/foreign language. Citations include bibliographies, monographs, textbooks, periodicals, dissertations and some (unannotated) master's theses, conference papers, and Educational Resources Information Center (ERIC) documents. An introductory section and a list of native languages addressed in the works precede the annotated entries. Author and subject indexes

There is increasingly wide agreement among teachers, researchers, inspectors, advisers and policy-makers that both teaching and research will benefit from being brought closer together. But how can this be achieved? Hard-pressed practitioners cannot be expected to review a constant flow of conference papers, journals and other publications, even if such items were accessibly written. This unique book synthesizes relevant research findings for the professional practitioner and highlights their implications for the quality of teaching and learning. Whether you are a teacher looking to improve your practice or a researcher looking for a concise

The testing and assessment of second language learners is an essential part of the language learning process. Glenn Fulcher's *Testing Second Language Speaking* is a state-of-the-art volume that considers the assessment of speaking from historical, theoretical and practical perspectives. The book offers the first systematic, comprehensive and up-to-date treatment of the testing of second language speaking. Written in a clear and accessible manner, it covers:

Explanations of the process of test design
Costing test design projects
How to put the test into practice
Evaluation of speaking tests
Task types for testing speaking
Testing learners with disabilities
It also contains a wealth of

examples, including task types that are commonly used in speaking tests, approaches to researching speaking tests and specific methodologies that teachers, students and test developers may use in their own projects. Successfully integrating practice and theory, this book demystifies the process of testing speaking and provides a thorough treatment of the key ethical and technical issues in speaking evaluation.
