Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices,

and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Developed in the 1980s by finance experts at the Chicago Board of Trade, the Market Profile has become one of the most powerful analytical tools for traders, investors, and market analysts. And now, THE POWER OF THE MARKET PROFILE CAN BE YOURS. Market value is the core concept behind any trade; and the core of any trader's decision is based on the perception of value. In his brand-new book, Dr. John Keppler, seasoned business professor and the founder of StrategicTrading.net, reveals how the Market Profile makes it possible to identify and track market value in real time, in every time frame. From the basics of the key elements of a Profile chart to insightful discussion of market auction theory, Profit with the Market Profile will guide traders through a new understanding of the market that will allow them to:

- identify the most profitable trade opportunities as they happen,
- make more informed, confident trading decisions with increased accuracy,
- develop Profile-based trading strategies and improve trade planning to reduce losses,
- secure better entries and exits, and implement more effective targets and stops.

See with clarity what is happening at the present moment in stocks, ETFs, futures, commodities, bonds, and currencies. Test your understanding and knowledge with interactive self-tests. PLUS, you will get the very first look at the Keppler Volume Tracking Indicator (KVT), based on Dr. Keppler's extensive research studies on volume patterns and volume variations on a variety of instruments. Using a proprietary formula, KVT looks at the current traded volume at every price and highlights trading volume considered to be above the usual or average levels, allowing traders to identify trends and determine the level of conviction in order to capitalize on opportunities as they present themselves in the market.
