

Escher The Complete Graphic Work

*******Anyone who loves to draw will be delighted by the contrasts and puzzles found in Escher's images. A large, removable, ready-to-color poster is included for would-be artists to create their own original work of art to display.**

M.C. Escher's complex, interlocking images of fish, birds, reptiles, and butterflies--known as tessellation drawings--made him one of the most popular artists of the 20th century. This clever, compact book lets readers explore eight of his famous drawings in two-sided jigsaw puzzles. Their brilliant patterns will intrigue and entertain and, after the fun, the puzzles can be pressed back in the book for safe storage.

Long before the first computer-generated 3-D images, M.C. Escher was a master of the third dimension. His impossible geometry and illusions, bordering between the scientific and psychological, are an homage to the possibilities of the human mind. This collection presents the artist's key graphic works and illustrations in stunning full-page reproductions, complete with detailed explanations of each mathematical problem.

The Complete Graphic Work

M.C. Escher, His Life and Complete Graphic Work

Softcover printing of a popular title (h/c sold over 400 copies in North America) at a price that will make it accessible to a much wider audience Richly illustrated with original art works in addition to well-known and little-known works by Escher A CD-ROM complements the articles, containing color illustrations of work by contemporary artists, movies, animations, and other demonstrations

Intricate patterns, elegant geometries, and mind-boggling graphics are trademarks of the fascinating creations of M.C. Escher. This set puts his magical visual world right at your fingertips with 17 easy-to-assemble paper sculptures, transforming his dynamically repeating patterns into three-dimensional polyhedra. The accompanying booklet reviews the geometric principles and artistic invention underlying Escher's optical marvels.

"Sumptuously illustrated with reproductions of 50 paintings, this book celebrates the rich artistic legacy of American artist Mark Rothko" (Publishers Weekly). Mark Rothko's iconic paintings are some of the most profound works of twentieth-century Abstract Expressionism. This collection presents fifty large-scale artworks from the American master's color field period (1949-1970) alongside essays by Rothko's son, Christopher Rothko, and San Francisco Museum of Modern Art curator of painting and sculpture, Janet Bishop. Featuring illuminating details about Rothko's life, influences, and legacy, and brimming with the emotional power and expressive color of his groundbreaking canvases, this essential volume brings the renowned artist's luminous work to light for both longtime Rothko fans and those discovering his work for the first time.

The Magic Mirror of M. C. Escher

M.C. Escher

M. C. Escher

""Graphic Work"" presents over 80 of Escher's most interesting pictures selected by the artist himself. It includes Escher's commentaries on his work, which make his startling visual effects more easy to interpret. The book also features Escher's own account of his evolution as an artist. An authentic source book of high significance, it offers the best introduction to the fantastic universe of the grand master of illusion.

Monet was the most typical and the most individual Impressionist painter. But while the painter was faithful and persevering in the pursuit of his motifs, his personal life followed a more restless course. Parisian by birth, he discovered painting as a youth in the provinces, where one of his homes, Argenteuil, has come to represent the artistic flowering and official establishment of Impressionism as a movement.

Make Believe: M.C. Escher for Kids (National Gallery of Victoria) is shortlisted in the CBCA Eve Pownall category for information books. It was written to complement the Escher artworks shown at the Gallery but has an ongoing life of its own after the exhibition. The book is well designed with a contents page and photographic representations of the illustrated work at the end. There is quite minimal, well-chosen written text in this sumptuous production. The illustrations do most of the work of communicating the life and art of 20th century Dutchman M.C. Escher. Escher, or Maurits, as he is known in the book, lived in Italy for many years and was inspired by the landscape - built and natural - there. Make Believe is structured as a mixture of biography and art, with interactive activities for children and tangents into geometry and science based on Escher's work. Above all, it is a wonderful exploration and celebration of his art for primary-aged children.

Inspiration from 50 Masters

M.C. Escher's Legacy

M.c. Escher

Discusses the perspective artist's life and works and offers prints of some of his best-known pieces, unpublished drawings, the artist's own

commentary, and additional observations.

All of the more than four hundred and fifty prints made by the popular graphic artist are reproduced and thoroughly discussed in an annotated study of Escher's unique visual exploration of time and space.

Find Insight and Inspiration for Your Creative Life An artist's journal is packed with sketches and captions; some rough, some polished. The margins sometimes spill over with hurriedly scrawled shopping lists and phone numbers. The cover may be travel-worn and the pages warped from watercolors. Open the book, and raw creativity seeps from each color and line. The intimacy and freedom on its pages are almost like being inside the artist's mind: You get a direct window into risks, lessons, mistakes, and dreams. The private worlds of these visual journals are exactly what you'll find inside An Illustrated Life. This book offers a sneak peak into the wildly creative imaginations of 50 top illustrators, designers and artists. Included are sketchbook pages from R. Crumb, Chris Ware, James Jean, James Kochalka, and many others. In addition, author Danny Gregory has interviewed each artist and shares their thoughts on living the artistic life through journaling. Watch artists—through words and images—record the world they see and craft the world as they want it to be. The pages of An Illustrated Life are sometimes startling, sometimes endearing, but always inspiring. Whether you're an illustrator, designer, or simply someone searching for inspiration, these pages will open a whole new world to you.

Impossible Worlds

Essays, criticism, and performance scripts written between 1985 and 2003 by an artist whose artistic practice investigates and reveals the social structures of art and its institutions. Andrea Fraser's work, writes Pierre Bourdieu in his foreword to Museum Highlights, is able to "trigger a social mechanism, a sort of machine infernale whose operation causes the hidden truth of social reality to reveal itself." It often does this by incorporating and inhabiting the social role it sets out to critique—as in a performance piece in which she leads a tour as a museum docent and describes the men's room in the same elevated language that she uses to describe seventeenth-century Dutch paintings. Influenced by the interdisciplinarity of postmodernism, Fraser's interventionist art draws on four primary artistic and intellectual frameworks—institutional critique, with its site-specific examination of cultural context; performance; feminism, with its investigation of identity formation; and Bourdieu's reflexive sociology. Fraser's writings form an integral part of her artistic practice, and this collection of texts written between 1985 and 2003—including the performance script for the docent's tour that gives the book its title—both documents and represents her work. The writings in Museum Highlights are arranged to reflect different aspects of Fraser's artistic practice. They include essays that trace the development of critical "artistic practice" as cultural resistance; performance scripts that explore art institutions and the public sphere; and texts that explore the ambivalent relationship of art to the economic and political interests of its time. The final piece, "Isn't This a Wonderful Place? (A Tour of a Tour of the Guggenheim Bilbao)," reflects on the role of museums in an era of globalization. Among the book's 30 illustrations are stills from performance pieces, some never before published.

Now available in paperback, an account of the life and work of this artist, drawn from family papers and Escher's own correspondence and essays, with an illustrated catalogue of his works, some of which had not previously been reproduced. First published in 1982.

Featuring quotes from the renowned Dutch graphic artist known for his altering of perception and displays of impossible geometry, this pop-up book provides a new way of looking at some of his most intriguing works.

The Graphic Work of M.C. Escher

A Centennial Celebration

With a Complete Catalogue of the Graphic Works : Including Essays by M.C. Escher

M.C. Escher (1898–1972) is renowned for his ability to render the visions of his mind's eye. The visions themselves were remarkable: for Escher, the skin of the visible world was nothing more than a piece of cloth that could be cut, folded, shaped, and rearranged in marvelous ways. A superb draftsman, he portrayed these other-worldly transformations of space within the familiar borders of a sheet of paper. The resulting images have become the favorite artworks of viewers around the world. The Magic of M.C. Escher does justice to this original artist's inventions. Escher's works—woodcuts, lithographs, and drawings, accompanied by quotes from the author—are brilliantly arranged to form a cinematic look at his achievements. Here is the magical world of the artist's mind, an uncharted realm full of exotic conceptions and inventions.

A colouring book utilizing the work of the innovative Dutch graphic designer, M.C. Escher. His

symmetrical designs and interlocking images of fish, birds, reptiles and butterflies are widely recognized. This book contains a ready-to-colour poster and pictures.

Twenty-nine woodcuts and lithographs make use of optical illusions and unusual perspectives and are accompanied by the artist's comments.

Long before the first computer-generated 3-D images, M.C. Escher was a master of the third dimension. His impossible geometry and illusions, bordering between the scientific and psychological, are an homage to the possibilities of the human mind. This updated edition of a true classic presents the artist's key graphic works and detailed...

"The Dutch artist M.C. Escher created some of the most celebrated and extraordinary images in twentieth-century art . . . hippies claimed him as the godfather of psychedelic art. His work is ripe for rediscovery and reappraisal - this exhibition is the largest ever held in the UK - nearly 100 of Escher's greatest drawings and prints. Based on the world-renowned M.C. Escher collection at the Gemeentemuseum in The Hague, the Netherlands, it has been organised by the Scottish National Gallery of Modern Art in Edinburgh, and tours to Dulwich Picture Gallery in London." - Colophon

Throughout history, patterns have come in countless permutations of motif, colour-way and scale. Yet what all have in common is the regularity of repetition, that insistent rhythm that animates a flat surface with a sense of movement and vitality and gives it depth. Evident in the arrangement of petals on a flower head, the branching growth of stems and vines, the spirals of a seashell _ pattern is inherent in the natural world that surrounds us. Powerful and transformative, pattern has an irrepressible joie de vivre. With more than 1,500 illustrations of patterns from all ages and cultures, Pattern Design is a visual feast. This comprehensive compendium is arranged thematically according to type, with chapters on Flora, Fauna, Pictorial, Geometric and Abstract designs. These broad categories are supplemented by in-depth features highlighting the work of key designers from the rich history of pattern-making _ such as William Morris, Sonia Delaunay, Charles and Ray Eames, Lucienne Day and Orla Kiely _ along with sections detailing the characteristic motifs of key period styles from Baroque to Art Deco.
