Three boys, who made a pact to stick together through the rough times in their impoverished Newark neighborhood, found the strength to work through their difficulties and complete high school, college, and medical school together.

What was school like in the days of old? Can you imagine studying in a tiny one-room schoolhouse, writing out lessons on a chalkboard slate? Discover how school life has changed over time, and what it might be like in the future.

Discover new, practical methods for teaching literacy skills in your early childhood classroom. Has teaching early literacy skills become a stumbling block to getting your preschool students kindergarten ready? Break out of the tired “letter of the week” routine and learn how to transform your lessons with fun and effective techniques. *Teach Smarter: Literacy Strategies for Early Childhood Teachers* will equip teachers to infuse every aspect of their teaching with exciting hands-on literacy teaching methods that engage students and help them build authentic connections with books, so that 100% of their students will have a strong literacy foundation and will be fully prepared for success in kindergarten and beyond. Respected author Vanessa Levin, veteran early childhood educator and author of the “Pre-K Pages” blog, breaks down the research and translates it into realistic, actionable steps you can take to improve your teaching. Features specific examples of teaching techniques and activities that engage students in hands-on, experiential learning during circle time, centers, and small groups. Offers a simple, four-step system for teaching literacy skills, based on the foundational principles of early literacy teaching Demonstrates how to build your confidence in your ability to get 100% of your students ready for kindergarten, long before the end of the school year Understand the problems with traditional literacy teaching and identify gaps in your current teaching practice with this valuable resource.

Astronomy at the Cutting Edge

Wollie Shelley, the plucky amateur sleuth Kirkus Reviews called “funny, brave, smart, and altogether the fetchingest crime heroine since the early Stephanie Plum,” returns to face suspect lovers and unlovable suspects in this hilarious sequel to *Dating Dead Men*. Wollie Shelley is a greeting card artist struggling to keep afloat financially and to pursue—despite a series of recent disasters—the search for the love of her life. She reluctantly agrees to be a contestant on the reality television show *Biological Clock*. The show’s premise: Six eligible singles date each other, and the audience votes on which couple would make the best parents. Alas, Wollie isn’t having much luck finding a man she’d like to date “off the air,” much less father her child. As her own biological clock ticks away, Wollie gets caught up in a much more pressing demand on her time. Her friend Annika has vanished into thin air, and Wollie is convinced that she’s in grave danger. When Wollie reports the disappearance to the Los Angeles Police Department, however, the detective assigned to the case seems more interested in dating Wollie than in finding her friend. So Wollie springs into action—and lands right in the middle of an FBI investigation into an international drug cartel. She soon finds herself being stalked by an assortment of threatening characters, including her fellow television contestants, who will stop at nothing to beat the clock. With *Dating Is Murder*, Kozak delivers another sparkling treasure, a laugh-out-loud-funny, literate mystery for readers of Janet Evanovich and Sue Grafton and for Kozak’s own growing legion of fans.

Refugees from a Caribbean island embark on a dangerous boat trip to America where they have a special reason to celebrate Thanksgiving.

Leading scientists offer a collection of essays that furnish illuminating explanations of recent discoveries in modern astrophysics--from the Big Bang to black holes--the possibility of life on other worlds, and the emerging technologies that make such research possible, accompanied by incisive profiles of such key figures as Carl Sagan and Georges Lemaetre.

Learn about the United States

The Missionary Review of the World

7 X 9 = Trouble!

The Jewish Center

Out of My Mind

It's not just 7 x 9 but multiplication in general that is trouble for third-grader Wilson Williams . . . Mills' sympathetic and detailed treatment of Wilson's travails makes this both a suspenseful and satisfying beginning chapter book. --The Bulletin of the Center for Children's Books

"Learn About the United States" is intended to help permanent residents gain a deeper understanding of U.S. history and government as they prepare to become citizens. The product presents 96 short lessons, based on the sample questions from which the civics portion of the naturalization test is drawn. An audio CD that allows students to listen to the questions, answers, and civics lessons read aloud is also included. For immigrants preparing to naturalize, the chance to learn more about the history and government of the United States will make their journey toward citizenship a more meaningful one.

The High/Scope Curriculum is a developmentally based approach to early childhood education. This curriculum's "Extensions" newsletter, in which the articles in this collection first appeared, informs curriculum users about new development, relating to the High/Scope "open framework" curriculum. This collection divides the articles into eight chapters. Chapter 1, "Supportive Adult-Child Interaction," includes articles on encouraging group problem solving, rules and limits, persona dolls as discussion starters, and superhero play. Chapter 2, "Materials and Environments for Active Learners," considers computer use, materials for infants and toddlers, and gardening. Chapter 3, "Learning and Exploring throughout the Daily Routine," presents articles on arrivals and departures for infants and toddlers, reading throughout routines, small group interaction strategies, and pretend play. Chapter 4, "Key Experiences in the Preschool Classroom," contains articles on reading, message boards, promoting outdoor experiences, children's art, dramatic arts, and movement. Chapter 5, "Meeting the Needs of All Children," presents articles on supporting children's home language, classroom adaptations for children with special needs, and High/Scope strategies for specific disabilities. Chapter 6, "Active Learning in the Elementary Grades," focuses on hands-on materials, children's interests, drama, art, and parent-teacher conferences. Chapter 7, "Collaborating with Parents," includes articles on parent involvement opportunities, parent conferences, and involving parents in curriculum planning. Chapter 8, "Team Planning, Assessment, and Staff Development," contains articles on planning around children's interests, assessing program quality through classroom observations, and mentoring. Appended is a list of books and audiovisual material published by the High/Scope Press. (KB)

Teaching Social Studies to English Language Learners provides readers with a comprehensive understanding of both the challenges that face English language learners (ELLs) and ways in which educators might address them in the social studies classroom. The authors offer context-specific strategies for the full range of the social studies curriculum, including geography, U.S. history, world history, economics, and government. These practical instructional strategies will effectively engage learners and can be incorporated as a regular part of instruction in any classroom. An annotated list of web and print resources completes the volume, making this a valuable reference to help social studies teachers meet the challenges of including all learners in effective instruction. Features and updates to this new edition include: □ An updated and streamlined Part 1 provides an essential overview of ELL theory in a social studies specific-context. □ "Teaching Tips" offer helpful suggestions and ideas for creating and modifying lesson plans to be inclusive of ELLs. □ Additional practical examples and new pedagogical elements in Part 3 include more visuals, suggestions for harnessing new technologies, discussion questions, and reflection points. □ New material that takes into account the demands of the Common Core State Standards, as well as updates to the web and print resources in Part 4.

The fourth edition of this well-known text continues the mission of its predecessors "to help teachers link creativity research and theory to the everyday activities of classroom teaching. Part I (chs 1-5) includes information on models and theories of creativity, characteristics of

creative people, and talent development. Part II (chapters 6-10) includes strategies explicitly designed to teach creative thinking, to weave creative thinking into content area instruction, and to organize basic classroom activities (grouping, lesson planning, assessment, motivation and classroom organization) in ways that support students' creativity. Changes in this Edition: Improved Organization -- This edition has been reorganized from 8 to 10 chapters allowing the presentation of theoretical material in clearer, more manageable chunks. New Material -- In addition to general updating, there are more examples involving middle and secondary school teaching, more examples linking creativity to technology, new information on the misdiagnosis of creative students as ADHD, and more material on cross-cultural concepts of creativity, collaborative creativity, and linking creativity to state standards. Pedagogy & Design -- Chapter-opening vignettes, within-chapter reflection questions and activities, sample lesson ideas from real teachers, and end-of-chapter journaling activities help readers adapt content to their own teaching situations. Also, a larger trim makes the layout more open and appealing and a single end-of-book reference section makes referencing easier. Targeted specifically to educators (but useful to others), this book is suitable for any course that deals wholly or partly with creativity in teaching, teaching the gifted and talented, or teaching thinking and problem solving. Such courses are variously found in departments of special education, early childhood education, curriculum and instruction, or educational psychology.
