With half a million copies in print, How to Read a Book is the best and most successful guide to reading comprehension for the general reader, completely rewritten and updated with new material. A CNN Book of the Week: “Explains not just why we should read books, but how we should read them. It’s masterfully done.” –Farheed Zakaria Originally published in 1940, this book is a rare phenomenon, a living classic that introduces and elucidates the various levels of reading and how to achieve them—from elementary reading, through systematic skimming and inspectional reading, to speed reading. Readers will learn when and how to “judge a book by its cover,” and also how to X-ray it, read critically, and extract the author’s message from the text. Also included is instruction in the different techniques that work best for reading particular genres, such as practical books, imaginative literature, plays, poetry, history, science and mathematics, philosophy and social science works. Finally, the authors offer a recommended reading list and supply reading tests you can use measure your own progress in reading skills, comprehension, and speed.

http://dx.doi.org/10.12946/gplh3 http://www.epubli.de/shop/buch/48746 “Spanish colonial law, derecho indiano, has since the early 20th century been a vigorous subdiscipline of legal history. One of great figures in the field, the Argentinian legal historian Víctor Tau Anzoátegui, published in 1997 his Nuevas horizontes en el estudio histórico del derecho indiano. The book, in which Tau addressed seminal methodological questions setting tone for the discipline’s future orientation, proved to be the starting point for an important renewal of the discipline. Tau drew on the writings of legal historians, such as Paolo Grossi, Antonio Manuel Hespanha, and Bartolomé Clavero. Tau emphasized the development of legal history in connection to what he called “the posture superseding rational and statutory state law.” The following features of normativity were now in need of increasing scholarly attention: the autonomy of different levels of social organization, the different modes of normative creativity, the many different notions of law and justice, the position of the jurist as an artifact of law, and the casuistic character of the legal decisions. Moreover, Tau highlighted certain areas of Spanish colonial law that he thought deserved more attention than they had hitherto received. One of these was the history of the learned jurist: the letrado was to be seen in his social, political, economic, and bureaucratic context. The Argentinian legal historian called for more scholarly works on book history, and he thought that provincial and local histories of Spanish colonial law had been studied too little. Within the field of historical science as a whole, these ideas may not have been revolutionary, but they contributed in an important way to bringing the study of Spanish colonial law up-to-date. It is beyond doubt that Tau’s programmatic visions have been largely fulfilled in the past two decades. Equally manifest is, however, that new challenges to legal history and Spanish colonial law have emerged. The challenges of globalization are felt both in the historical and legal sciences, and not the least in the field of legal history. They have also brought major topics (back) on to the scene, such as the importance of religious normativity within the normative setting of societies. These challenges have made scholars aware of the necessity to reconstruct the circulation of ideas, juridical practices, and researchers are becoming more attentive to the intense cultural translation involved in the movement of legal ideas and institutions from one context to another. Not least, the growing consciousness and strong claims to reconsider colonial history from the premises of postcolonial scholarship expose the discipline to an unseen necessity of reconsidering its very foundational concepts. What concept of law do we need for our historical studies when considering multi-normative settings? How do we define the spatial dimension of our work? How do we analyze the entanglements in legal history? Until recently, Spanish colonial law attracted little interest from non-Hispanic scholars, and its results were not seen within a larger global context. In this respect, Spanish colonial law was hardly different from research done on legal history of the European continent or common law. Spanish colonial law has, however, recently become a topic of interest beyond the Hispanic world. The field is now increasingly seen in the context of “global legal history,” while the old and the new research results are often put into a comparative context of both European law of the early Modern Period and other colonial legal orders. In this volume, scholars from different parts of the Western world approach Spanish colonial law from the new perspectives of contemporary legal historical research.”

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist.

The protagonist, Winston Smith, is a diligent and skilful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

The book presents the National Institute of Statistics and Geography, what is and how it has developed over time, since it was founded in 1993. The Institute is today an eminently technical and at the same time autonomous body of the Mexican State.Beyond a chronology of events, this book raises two needs that have marked the Institute's evolution: the first, to properly measure the many components of reality, whether social, economic or natural; and the second, decisive for the public's trust and whose absence would invalidate the purposes of the previous need, to preserve the information from any consideration, other than strictly professional, in all stages of its production and dissemination.This work conveys INEGI's transcendence as an indispensable institution for the country to respond to the fundamental question, common to all human beings: to know and understand the reality of their environment.

Special Report of the Intergovernmental Panel on Climate Change

The Philippine Economy

trabajo, cultura y educación intercultural

The Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

This is a compelling behind-the-scenes account of the extraordinary Castro brothers and the dynastic succession of Fidel's younger brother Raul. Brian Latell, the CIA analyst who has followed Castro since the sixties, gives an unprecedented view into Fidel and Raul's remarkable relationship, revealing how they have collaborated in policy making, divided responsibilities, and resolved disagreements for more than forty years--a challenge to the notion that Fidel always acts alone. Latell has had more access to the brothers than anyone else in this country, and his briefs to the CIA informed much of U.S. policy. Based on his knowledge of Raul Castro, Latell makes projections on what kind of Leader Raul will be and how the shift in power might influence U.S.-Cuban relations.

Why INEGI? The saga of a Mexican institution in search of the truth

Donde Va La Coma/ Where Is the Bed Going

This book is open access under a CC-BY license. The multiple purposes of nature – livelihood for communities, revenues for states, commodities for companies, and biodiversity for conservationists – have turned environmental governance in Latin America into a highly contested arena. In such a resource-rich region, unequal power relations, conflicting priorities, and trade-offs among multiple goals have led to a myriad of contrasting initiatives that are reshaping social relations and rural territories. This edited collection addresses these tensions by unpacking environmental governance as a complex process of formulating and contesting values, procedures and practices shaping the access, control and use of natural resources. Contributors from various fields address the challenges, limitations, and possibilities for a more sustainable, equal, and fair development. In this book, environmental governance is seen as an overarching concept defining the dynamic and multi-layered repertoire of society-nature interactions, where values of nature and discourses on the use of natural resources are mediated by contextual processes at multiple scales.

Ava Schaf'er never felt like she belonged where she was born, on the vast open prairie of Western Kansas. The artist and dreamer planned to remedy that after high school graduation, by packing a moving truck and escaping to New York, but her mother's cancer diagnosis forced her to stay. Their relationship always a struggle, reversing the roles of mother and daughter, as Ava became the sole caretaker of the difficult woman, tested the very edge of familial love's limits. After a three year battle, her mother succumbs to the unforgiving disease and Ava is left alone to exit the reclusiveness of her current life and attempt to rejoin the gossip laden, high school football worshipping, get married and have babies, small town society she grew up in. Ava's childhood best friend, Podge Wagner, a humbly practical farmer, helps her become reacquainted with a community of long lost friends. As he provides epically introverted Ava the companionship and support she didn't realize she missed so desperately, Ava finds herself accidentally enthralled with the charming, yet broken, Lucas Ellis, a world traveled former military man and the current county deputy. Imagining several different futures, none of which include leaving her hometown, Ava's new life begins to crash down around her as her alcoholic father slides. Again at the juncture of self-preservation and self-sacrifice, Ava suffers an earthshattering loss, discovers a life altering truth, and makes an unexpected decision.

A Comparative History of Literatures in the Iberian Peninsula is the second comparative history of a new subseries with a regional focus, published by the Coordinating Committee of the International Comparative Literature Association. As its predecessor for East-Central Europe, this two-volume history distances itself from traditional histories built around periods and movements, and explores, from a comparative viewpoint, a space considered to be a powerful symbol of inter-literary relations. Both the geographical pertinence and its symbolic condition are obviously discussed, when not even contested. Written by an international team of researchers who are specialists in the field, this history is the first attempt at applying a comparative approach to the plurilingual and multicultural literatures in the Iberian Peninsula. The aim of comprehensiveness is abandoned in favor of a diverse and extensive array of key issues for a comparative agenda. A Comparative History of Literatures in the Iberian Peninsula undermines the primacy claimed for national and linguistic boundaries, and provides a geo-cultural account of literary inter-systems which cannot otherwise be explained.
