In presenting these lessons in Mental Science to the public, it is my desire to make it possible for any one, who cares to take the time to study them, to demonstrate the truths that will be discussed. It is, perhaps, hard to set down in writing a complete teaching in Mental Science that will not appear difficult to understand; but this could be said as well of**

Man is born of eternal day, not because he wills or wishes it, not because he labors or strives toward it, not because he earns it as a reward, but simply because the Spirit has breathed life into him. And the Spirit which has breathed this life into him has breathed Its own Life and cannot unbreathe It or take It away. If we would only let go of our theological nonsense and let our soul commune with the Universe, it would tell us all these things because we already know them inwardly. All men are embodiments of God and the soul can no more be lost than God could be lost. What more can life demand of us than that we do the best we know, always trying to improve. An unprecedented look at that most commonplace act of everyday life--throwing things out--and how it has transformed American society. Susan Strasser's pathbreaking histories of housework and the rise of the mass market have become classics in the literature of consumer culture. Here she turns to an essential but neglected part of that culture--the trash it produces--and finds in it an unexpected wealth of meaning. Before the twentieth century, streets and bodies stank, but trash was nearly nonexistent. With goods and money scarce,

almost everything was reused. Strasser paints a vivid picture of an America where scavenger pigs roamed the streets, swill children collected kitchen garbage, and itinerant peddlers traded manufactured goods for rags and bones. Over the last hundred years, however, Americans have become hooked on convenience, disposability, fashion, and constant technological change--the rise of mass consumption has led to waste on a previously unimaginable scale. Lively and colorful, *Waste and Want* recaptures a hidden part of our social history, vividly illustrating that what counts as trash depends on who's counting, and that what we throw away defines us as much as what we keep.
