clear, practice-based approach of the Complete Mathematics Revision Guide. Supporting the Student Book, it is packed with clear explanations and practice to support exam potential. It includes new chapters on Compound Interest Formulas and Perpendicular Lines. Endorsed by Cambridge International Examinations. Up-to-date with the latest (0580) syllabus for examination from 2015 - Gives students the practice they require to deepen their understanding through plenty of questions - Consolidates learning with unique digital resources on the CD, included free with every Student's Book

This is a cost-effective and straightforward way to teach the latest syllabus, with all the core and extended content covered by a single book and accompanying free digital resources. A book dedicated to the core level content is also available.

Written by a principal examiner to exactly match the 0580 syllabus, this text gives you a sequential and logical teaching path through the full syllabus, addressing the four curriculum areas. A full set of solutions, exam practice and worked examples encourage active learning, and a CD offers dynamic material for every section of the book.

Chemistry syllabus (0620) is fully updated for the revised syllabus from first examination from 2016.

Mathematics is an integral part of scientific study, and one that students often find a barrier to progression in science.

Students can find it difficult to apply maths knowledge to science scenarios, even if they have encountered the maths concept previously. The Maths Skills for Cambridge IGCSE Chemistry write-in workbook allows students to practise their maths skills in science contexts. This resource has been written in collaboration with the
