Lectures on Corporate Finance

The Road to Global Prosperity

The sixth edition of Fundamentals of Corporate Finance continues its tradition of excellence ensuring the focus remains on key principles. To accommodate courses which include coverage across a wider range of topics, the authors provide additional chapters about Leasing, Mergers and Acquisitions online. Fundamentals of Corporate Finance strives to present the material in a way that makes it coherent and easy to understand. Finance Prep Courses allow students to view a video to refresh topics, and then answer questions to test their understanding. This product gives lecturers more time in class to cover finance topics, and ensures that students do not get left behind. In addition to providing students with relevant, realistic problem-solving tools, Fundamentals of Corporate Finance has the benefit of the most current and relevant research in finance.

Neoclassical Finance provides a concise and powerful account of the underlying principles of modern finance, drawing on a generation of theoretical and empirical advances in the field. Stephen Ross developed the no arbitrage principle, tying asset pricing to the simple proposition that there are no free lunches in financial markets, and jointly with John Cox he developed the related concept of risk-neutral pricing. In this book Ross makes a strong case that these concepts are the fundamental pillars of modern finance and, in particular, of market efficiency. In an efficient market prices reflect the information possessed by the market and, as a consequence, trading schemes using commonly available information to beat the market are doomed to fail. By stark contrast, the currently popular stance offered by behavioral finance, fueled by a number of apparent anomalies in the financial markets, regards market prices as subject to the psychological whims of investors. But without any appeal to psychology, Ross shows that neoclassical theory provides a simple and rich explanation that resolves many of the anomalies on which behavioral finance has been fixated.

Based on the inaugural Princeton Lectures in Finance, sponsored by the Bendheim Center for Finance of Princeton University, this elegant book represents a major contribution to the ongoing debate on market efficiency, and serves as a useful primer on the fundamentals of finance for both scholars and practitioners.

3 things to know about the focus of Dynamic Business Law, 2e: Emphasis on ETHICAL DECISION-MAKING. In chapter 2, the authors introduce a framework for making ethical business decisions that students can use on a regular basis. Following each case there are questions designed to train students to apply this approach. Then repeatedly throughout the chapters, questions about business ethics are raised in the text. This framework is designed to help improve the learning process of students and to give a sense of relevancy to the ethical decision making process. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. Emphasis on the BUSINESS in business law. Dynamic Business Law emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Students need to understand how the concepts they learn in this course tie into their business careers. Instructors can easily show that the study of business law is best seen as a foundational component of the larger study of business administration. Dynamic Business Law now includes Connect Business Law as a packaging option. Connect includes Interactive Applications for each chapter of the textbook and helps students apply legal concepts to business, stimulates critical thinking, and reinforces key topics. Overview: Dynamic Business Law, 2e is appropriate for the two-term business law course. Emphasis on the BUSINESS in business law. Dynamic Business Law emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly "defending" the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. Instructor's Supplements: The Online Learning Center contains the complete IM, Test Bank, PowerPoint, image library, and video clips. Instructor's Manual: The Instructor's Manual provides a clear outline of how to begin using this text and is especially helpful to adjuncts who teach Business Law. Sample syllabi are included, as well as detailed lecture outlines incorporating PowerPoints and other materials professors can bring into their lectures. Exciting and new examples from outside the text are also included, and can be discussed in class to help generate excitement and involvement in the course from students. Test Bank: The Test Bank, developed by Vonda Luginbuhl of Carson-Newman College, contains a variety of true/false, multiple choice, and essay questions - as well as "scenario-based" questions, which are application-based, and use a situation described in a narrative, with 3 - 5 multiple-choice test questions based on the situation described in the narrative. We've aligned our Test Bank with the new AACSB guidelines, tagging each question according to its knowledge and skills areas. Categories include Global, Ethics and Social Responsibility, legal and other External Environment, communication, Diversity, Group Dynamics, Individual Dynamics, Production and IT. Designations aligning questions with Learning Objectives, features and case, exist as well. PowerPoint presentation slides: Developed by Jeff Penley at Catawba Valley Community College, we offer two different sets of slides for professors. The "Basic" set consists of an outline for each chapter. The "Premium" set expands on this outline to include hypotheticals and ethical dilemmas, allowing the instructor to incorporate application into the lecture. Instructor Video DVD (ISBN: 0077339118, 13-digit: 9780077339111): The Instructor Video DVD contains video clips from CBS that highlight current legal issues. Instructor Notes, located on the OLC, give insight into how to incorporate segments into the classroom and offer questions to stimulate discussion. Most of these videos are also part of Premium content - a big plus for instructors teaching online/hybrid courses.

This course of lectures introduces students to elementary concepts of corporate finance using a more systematic approach than is generally found in other textbooks. Axioms are first highlighted and the implications of these important concepts are studied afterwards. These implications are used to answer questions about corporate finance, including issues related to derivatives pricing, state-price probabilities, dynamic hedging, dividends, capital structure decisions, and risk and incentive management. Numerical examples are provided, and the mathematics is kept simple throughout. In this second edition, explanations have been improved, based on the authors' experience teaching the material, especially concerning the scope of state-price probabilities in Chapter 12. There is also a new Chapter 22: Fourteen Insights. It begins by covering finance basics and the tools and techniques of financial quantification, using current industry examples to apply the principles of financial management to sport. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money, and more. The final section focuses on sport finance in three sectors of the industry - public sector sports, collegiate athletics, and professional sport-providing in-depth analysis of financial management in each sector. In This Used to Be Us, the blockbuster Michael Mandelbaum wrote with Thomas L. Friedman, the authors analyzed the challenges America faces, including globalization, and described a path to recovering America's greatness. In his widely and well reviewed The Road to Global Prosperity, Mandelbaum, one of America's leading authorities on international affairs, looks at whether our optimism about the world's economic future is justified in view of the financial meltdown of 2008, still being felt; Europe's troubled currency; the slowing growth of China and other emerging nations. He concludes that while the global economy does face major challenges in the years ahead, there are compelling reasons to believe for optimism. Mandelbaum says that globalization is both irreversible and a positive force for the United States and the world. As technology and free markets expand and national leaders realize that their political power rests on delivering prosperity, countries will cooperate more. As more nations connect, their economies will grow. As immigration increases, as more money crosses borders, and as more countries emerge from poverty, individuals and societies around the world will benefit. The Road to Global Prosperity illuminates the crucial issues that will determine the economic future. Mandelbaum makes a persuasive case for optimism as well as offering a concrete, practical guide to the challenges and opportunities that lie ahead.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. London's Global Office Economy: From Clerical Factory to Digital Hub is a timely and comprehensive study of the office from the very beginnings of the workplace to its post-pandemic future. The book takes the reader on a journey through five ages of the office, encompassing sixteenth-century coffee houses and markets, eighteenth-century clerical factories, the corporate offices emerging in the nineteenth, to the digital and network offices of the twentieth and twenty-first centuries. While offices might appear ubiquitous, their evolution and role in the modern economy are among the least explained aspects of city development. One-third of the workforce uses an office; and yet the buildings themselves – their history, design, construction, management and occupation – have received only piecemeal explanation, mainly in specialist texts. This book examines everything from paper clips and employment contracts to workstyles and urban planning to explain the evolution of the 'office economy'. Using London as a backdrop, Rob Harris provides built environment practitioners, academics, students and the general reader with a fascinating, illuminating and comprehensive perspective on the office. Readers will find rich material linking fields that are normally treated in isolation, in a story that weaves together the pressures exerting change on the businesses that occupy office space with the motives and activities of those who plan, supply and manage it. Our unfolding understanding of offices, the changes through which they have passed, the nature of office work itself and its continuing evolution is a fascinating story and should appeal to anyone with an interest in contemporary society and its relationship with work.

Financial Management

An Introduction

Fundamentals of Investments was written to: 1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.

Strategic Marketing Management (5th edition) offers a comprehensive framework for strategic planning and outlines a structured approach to identifying, understanding, and solving marketing problems. For business students, the theory advanced in this book is an essential tool for understanding the logic and the key aspects of the marketing process. For managers and consultants, this book presents a conceptual framework that will help develop an overarching strategy for day-to-day decisions involving product and service design, branding, pricing, promotions, and distribution. For senior executives, the book provides a big-picture approach for developing new marketing campaigns and evaluating the success of ongoing marketing programs.

Corporate Finance, by Ross, Westerfield, and Jaffe is a popular textbook that emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. Brad Jordan, known for his successful work on the RWJ Fundamentals and Essentials books, contributed to this edition. His influence will be seen particularly in the writing style with smoother coverage of topics, and the increased quality in the problem material.

Now in its 10th edition, Business Finance is an essential introduction to financial decision-making in businesses. Taking a user-friendly approach, it explores the type of investments a business should make and how they should be financed, and successfully blends the theoretical, analytical and practical aspects of finance and investments. The new edition has a strong real world focus, exploring the theories surrounding financial decision making and relating these theories to what happens in the real business world. Key features: An extensive range of up-to-date real-world examples Examination of the divergences between theory and practice Expanded explanations of complex theories Comprehensive coverage of the latest international issues Clear design and pedagogical features for enhanced readability and quick reference Visit the companion website for this book at www.pearsoned.co.uk/mclaney where you will find a variety of resources for students and lecturers alike. Business Finance is suitable for undergraduates in accounting and finance and for those on finance and financial management courses. It is also appropriate for postgraduate students with an option in accounting and finance and will be highly useful for professional accounting students.
