An unabridged, unaltered edition of The Seven Day Mental Diet -

This book traces the growth of customs and excise, and their integral role in shaping the framework of industrial England; including state power, technical advance, and the evolution of a consumer society. Central to this structure was the development of two economies - one legal and one illicit. If there was a unique English pathway of industrialization, it was less a distinct entrepreneurial and techno-centric culture, than one predominantly defined within an institutional framework spearheaded by the excise and a wall of tariffs. This process reached its peak by the end of the 1770s. The structure then quickly started to crumble under the weight of the fiscal-military state, and Pitt's calculated policy of concentrating industrial policy around cotton, potteries, and iron - at the expense of other taxed industries. The breakthrough of the new political economy was the erosion of the illicit economy; the smugglers' free trade now became the state's most powerful weapon in the war against non-legal trade. If at the beginning of the period covered by this book state administration was predominantly deregulated and industry regulated, by the close the reverse was the case.

Threads & Voices

This landmark work is indispensable for anyone studying anxiety or seeking to deliver effective psychological and pharmacological treatments. Integrating insights from emotion theory, recent advances in cognitive science and neuroscience, and increasingly important findings from developmental psychology and learning, David H. Barlow comprehensively examines the phenomena of anxiety and panic, their origins, and the roles that each plays in normal and pathological functioning. Chapters coauthored by Barlow with other leading experts then outline what is currently known about the classification, presentation, etiology, assessment, and treatment of each of the DSM-IV anxiety disorders. A definitive resource for researchers and clinicians, this is also an ideal text for graduate-level courses.

The present monograph has grown out of a good many years of study of the history of the European trade to the East Indies. The starting-point actually was Danish. Having treated the history of the Danish Asiatic Company during the period 1732–1772 I went abroad in order to familiarize myself with the background to the reorganization of Danish trade about 1732. It was especially the possible connexion with the dissolved Ostend Company and the counter-measures, diplomatic as well as economic, of the Dutch, English, and French companies that interested me. Through these investigations I got acquainted with the various Northwest European company records and soon realized that the Dutch archives offered a rich material, especially as regards quantities and prices. A study on the Dutch Company's trade in Japanese copper, a subject which had previously occupied Scandinavian historians in con nexion with the question of the status of Swedish copper on the European market in the 17th century, amplified my knowledge of the archives in the Hague to such a degree that I dared to tackle the greater object of giving a description of the Company's trade as a whole during its heyday. On various points it proved to be necessary to make comparative in vestigations, especially in the English East India Company's archives in London.

This collection of essays examines the history of cotton textiles at a global level over the period 1200-1850. It provides new answers to two questions: what is it about cotton that made it the paradigmatic first global commodity? And second, why did cotton industries in different parts of the world follow different paths of development?

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys’ killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

The longer WorldCom Chief Audit Executive Cynthia Cooper stares at the entries in front of her, the more sinister they seem. But the CFO is badgering her to delay her team’s audit of the company’s books and directing others to block Cooper’s efforts. Still, something in the pit of her stomach tells her to keep digging. Cooper takes readers behind the scenes on a riveting, real-time journey as she and her team work at night and behind closed doors to expose the largest fraud in corporate history. Whom can they trust? Could she lose her job? Should she fear for her physical safety? In Extraordinary Circumstances, she recounts for the first time her journey from her close family upbringing in a small Mississippi town, to working motherhood and corporate success, to the pressures of becoming a whistleblower, to being named one of Time’s 2002 Persons of the Year. She also provides a rare insider’s glimpse into the spectacular rise and fall of WorldCom, a telecom titan, the darling of Wall Street, and a Cinderella story for Mississippi. With remarkable candor, Cooper discusses her struggle to overcome these challenges, and how she has found healing through sharing the lessons learned with the next generation. This book reminds us all that ethical decision-making is not forged at the crossroads of major events but starts in childhood, "decision by decision and brick by brick." At a time when corporate dishonesty is dominating public attention, Extraordinary Circumstances makes it clear that the tone set at the top is critical to fostering an ethical environment in the work-place. Provocative, moving, and intensely personal, Extraordinary Circumstances is a wake-up call to corporate leaders and an intimate glimpse at a scandal that shook the business world.

Progeny

The popular fashion for Indian calicos in the seventeenth century and the genesis of the British cotton industry in the eighteenth century reflected new consumer forces at work within Britain. The East India trade encouraged new patterns of domestic demand in Britain, patterns which were not eradicated even with the prohibition of most Indian fabrics in 1721. Parliamentarians and clergy decried the spread of popular fashions that diminished visible social distinctions and undercut traditional manufactures.
