addresses several money stresses and offers solutions that can be implemented immediately. One of this book's main standouts is its transparency, as many of the examples of smart and "less smart" decisions are based on author, Reshell Smith's own life experiences. By promoting financial literacy and helping her clients transition from financial clutter and chaos to financial independence and freedom, she has created a blueprint for productive living, better credit, and, ultimately financial happiness.

profiting from the money meltdown that is now underway. We are approaching a monetary crisis of epic proportions never before seen. You are probably aware of the rising price of gold that's been going on for almost 10 years now. Most recently, gold started climbing with even greater speed. History repeats itself again and again. Whenever governments start to dilute their money investors transfer their money into gold and silver. Gold and silver have intrinsic value and will always prevail in any economy. Many financial experts predict that gold

'For amateurs and professionals alike wishing to deepen their understanding of the often mysterious and counter-intuitive fluctuations in asset prices, this book provides essential reading.' - Barry Riley, Financial Times 'Really required reading.' - Anthony Harris, Times According to mainstream economic theory, the prices of individual stocks respond rationally to unexpected news. However, real market movements appear to respond to news in more complex and sometimes perverse ways, overshooting or not reacting at all. Drawing on his hands-on experience, Professor Pepper puts forward a new theory based on the

The goal of theoretical economics is to explain how the monetary economy works. The fatal methodological defect of Orthodoxy is that it is based on behavioral axioms. Yet, no specific behavioral assumption whatever can serve as a starting point for economic analysis. From this follows for Constructive Heterodoxy that
