Civil Engineer's Reference Book, Fourth Edition provides civil engineers with reports on design and construction practices in the UK and overseas. It gives a concise presentation of theory and practice in the many branches of a civil engineer's profession and it enables them to study a subject in greater depth. The book discusses some improvements in earlier practices, for example in surveying, geotechnics, water management, project management, underwater working, and the control and use of materials. Other changes covered are from the evolving needs of clients for almost all forms of construction, maintenance and repair. Another major change is the introduction of new national and Euro-codes based on limit state design, covering most aspects of structural engineering. The fourth edition incorporates these advances and, at the same time, gives greater prominence to the special problems relating to work overseas, with differing client requirements and climatic conditions. Chapters 1 to 10 provide engineers, at all levels of development, with 'lecture notes' on the basic theories of civil engineering. Chapters 11 to 44 cover the practice of design and construction in many of the fields of civil engineering. Civil engineers, architects, lawyers, mechanical engineers, insurers, clients, and students of civil engineering will find benefit in the use of this text.

Piercing research goes beyond the usual arguments against genetic manipulation to show that better crops were never the issue. What bioengineering is really about is a new kind of total serfdom, where the entire world will be in thrall to the likes of Monsanto if they ever want to eat again. Author F. William Engdahl wrote the classic A Century of War, which exposed the hand of Anglo-American petropolitics and hegemonic ambition behind the horrors of the World Wars.

Project Management Fundamentals

Civil Engineer's Reference Book

Presents a step-by-step guide to effectively manage the computer software development process. In this timely study, Michel Chossudovsky blows away the smoke-screen, put up by the mainstream media, that 9-11 was an "intelligence failure." Through meticulous research, the author uncovers a military-intelligence ploy behind the September 11 attacks, and the coverup and complicity of key members of the Bush Administration. According to Chossudovsky, the so-called "war on terrorism" is a complete fabrication based on the illusion that one man, Osama bin Laden, outwitted the \$30 billion-a-year American intelligence apparatus. The "war on terrorism" is a war of conquest. Globalisation is the final march to the "New World Order," dominated by Wall Street and the U.S. military-industrial complex. September 11, 2001 was the moment the Bush Administration had been waiting for, the so-called "useful crisis" which provided a pretext for waging a war without borders. The hidden agenda consists in extending the frontiers of the American Empire right around the world to facilitate complete U.S. corporate control outside the U.S. and a police state on the inside. Chossudovsky peels back the layers of rhetoric to reveal a huge hoax - a complex web of deceit aimed at tricking the American people and the rest of the world into accepting a military solution which threatens the future of humanity.

Site Investigation

Chinese Socialism After Mao

Site investigation is the crucial first step in design and construction, when the cost and practicality of a project are evaluated. It is also a necessary part of the investigation of building failures. This major reference work describes the organization of site investigation, the plant, sampling equipment and interpretation of results. The second edition includes new material on specification and procurement, desk studies on geophysics, sample disturbance and sampling methods, in-situ testing and laboratory testing.

The ISIS, also known as Islamic State erupted violently onto the world stage in 2014 proclaiming its aim to create a Global Caliphate. War and terror in Syria have created a massive refugee crisis across Europe. In autumn 2015 Russia was invited to help defeat ISIS in Syria. That Russian military action signaled a new era in global politics. Washington no longer dominated the military world. The world was ineluctably moving towards a new world war, one claiming to have religion at its core. Islam was being instrumentalized as a weapon of war, but by whom? Few asked who was behind the IS terror or Al Qaeda. For that it would be necessary look back to the 1950's and the birth of a new American intelligence agency and their ties to the secret Muslim Brotherhood. What emerges is a picture so incredible few could imagine.

The Truth Behind September 11

Consequences of Structural Adjustment

In this new and expanded edition of Chossudovskys international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalisation of poverty. This book is a skilful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically. In this new enlarged edition -- which includes ten new chapters and a new introduction -- the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalisation. The book has been published in 11 languages. Over 100,000 copies sold world-wide. Projects fail because of risks that are discovered too late, are ignored or simply are not sought.
