For decades, the world ' s governments have struggled to move from talk to action on climate. Many now hope that growing public concern will lead to greater policy ambition, but the most widely promoted strategy to address the climate crisis – the use of market-based programs – hasn ' t been working and isn ' t ready to scale. Danny Cullenward and David Victor show how the politics of creating and maintaining market-based policies render them ineffective nearly everywhere they have been applied. Reforms can help around the margins, but markets ' problems are structural and won ' t disappear with increasing demand for climate solutions. Facing that reality requires relying more heavily on smart regulation and industrial policy – government-led strategies – to catalyze the transformation that markets promise, but rarely deliver.

ASAP European History: A Quick-Review Study Guide for the AP Exam

Letters on England

World War I Poetry

War in European History

Covers mercantilism, beginnings of modern science and the Enlightenment, Bourbon France, the Hapsburgs, the Hohenzollerns, the English Civil War, the Restoration, Peter the Great and Russia, the Papacy, the Ottoman Turkish Empire in Europe, and the culture of Baroque and Rococo.

Maps and text cover 3,000 years of European history from 900 BC through 1993.

The development of European unification has reached a critical stage. Despite 75 years of peace, increases in welfare, and growth since World War 2, there is now a growing scepticism of the European agenda from various quarters, most notably embodied in the exit of the United Kingdom from the European Union. To fully understand the dynamics at work, this book presents an introduction to the development of the political economy of Europe from 1900 to 2020. The first part of the book provides an overview of European economic and political history from 1900 to the present. It is clear from this history that Europe ' s population, and most notably its leaders, have been deeply influenced by ideology during this time. This sets the context for the second part of the book, which takes a closer look at some major paradigms framing European dynamics: (1) the market-oriented paradigm, (2) Marx ' s paradigm, and (3) the fascist paradigm. In this part, the essential core of each of these paradigms is presented and critiqued. In the third part, the current bottlenecks of European evolution (the migration crisis, Brexit, rise of new Fascism, the climate crisis, the COVID-19 pandemic) are investigated in the light of a possible emergence of a new scientific paradigm. Europe ' s role in the global division of labour – its possibility to serve as a role model for the advantages of democratically governing a highly diverse set of populations – is also explained. This book is an ideal text for students undertaking courses on the political economy of Europe in either economics or politics departments.

Europe's great powers formed two powerful coalitions against France, yet force of numbers, superior leadership and the patriotic fervor of France's citizen-soldiers not only defeated each in turn, but closed the era of small, professional armies fighting for limited political objectives. This period produced commanders such as Napoleon and Nelson, whose names remain a by-word for excellence to this day. From Italy to Egypt Napoleon demonstrated his strategic genius and mastery of tactics in battles including Rivoli, the Pyramids and Marengo. Nelson's spectacular sea victories at the Nile and Copenhagen were foretastes of a century of British naval supremacy.

Disentangling a controversial history of turmoil and progress, this Handbook provides essential guidance through the complex past of a region that was previously known as the Balkans but is now better known as Southeastern Europe. It gathers 47 international scholars and researchers from the region. They stand back from the premodern claims and recent controversies stirred by the wars of Yugoslavia's dissolution. Parts I and II explore shifting early modern divisions among three empires to the national movements and independent states that intruded with Great Power intervention on Ottoman and Habsburg territory in the nineteenth century. Part III traces a full decade of war centered on the First World War, with forced migrations rivalling the great loss of life. Part IV addresses the interwar promise and the later authoritarian politics of five newly independent states: Albania, Bulgaria, Greece, Romania, and Yugoslavia. Separate attention is paid in Part V to the spread of European economic and social features that had begun in the nineteenth century. The Second World War again cost the region dearly in death and destruction and, as noted in Part VI, in interethnic violence. A final set of chapters in Part VII examines postwar and Cold War experiences that varied among the four Communist regimes as well as for non-Communist Greece. Lastly, a brief Epilogue takes the narrative past 1989 into the uncertainties that persist in Yugoslavia's successor states and its neighbors. Providing fresh analysis from recent scholarship, the brief and accessible chapters of the Handbook address the general reader as well as students and scholars. For further study, each chapter includes a short list of selected readings.

Teachers across the country consider our AP titles to be invaluable resources and consistently recommend our books to their students. Our high-quality test preps are authored by AP experts who have mastered the exam content and teach the course.

From the award-winning and bestselling author of Cod comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured - all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago - when the mysteries of salt were revealed by modern chemistry and geology - no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed Cod, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.

Cambridge International AS Level History is a suite of three books that offer complete coverage of the Cambridge International AS Level History syllabus (code 9389).

A new edition of this brilliantly written survey of the changing ways that war has been waged in Europe, from the Norse invasions to the present day, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'.

When it's crucial crunch time and your Advanced Placement® exam is just around the corner, you need REA's Crash Course for AP® European History!

The horrors of the First World War released a great outburst of emotional poetry from the soldiers who fought in it as well as many other giants of world literature. Wilfred Owen, Rupert Brooke and W B Yeats are just some of the poets whose work is featured in this anthology. The raw emotion unleashed in these poems still has the power to move readers today. As well as poems detailing the miseries of war there are poems on themes of bravery, friendship and loyalty, and this collection shows how even in the depths of despair the human spirit can still triumph.

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

AP European History 2023

The Routledge Handbook of Balkan and Southeast European History

Cambridge International AS Level European History 1789-1917

First published in 1932, this book looks at a period that has often been thought of as a time of general decline in the most characteristic features of medieval civilisation. While acknowledging decline in many areas during this period—the power of the Church, feudalism, guilds, the Hanseatic League, the autonomy of towns and the end of the two Roman empires—the author argues that there was also signs of development. National consciousness, the power of the bourgeoisie and trade and industry all rose markedly in this period alongside intellectual and artistic achievements outside of Italy. This book asserts that in amongst the failure and decline new forces were creating new substitutes.

The most well-respected, teacher-recommended guide to the AP European History exam is back and better than ever! Written by a long-time leader in the AP Euro community, ACHIEVER is meticulously crafted to the AP Euro course and exam to ensure a standard of excellence that far surpasses the "premium" products that big-box publishers crank out year after year. A World History

With 2 Practice Tests

European History

Political Economy of Europe

This pioneering book elevates the senses to a central role in the study of food history because the traditional focus upon food types, quantities, and nutritional values is incomplete without some recognition of smell, touch, sight, hearing, and taste. Eating is meal the senses of smell, touch, sight, hearing, and taste are engaged in the acts of preparation and consumption. And yet these bodily acts are ephemeral: their imprint upon the source material of history is vestigial. Hitherto historians have shown little in fills that research gap. Four dimensions are treated: • Words, Symbols and Uses: Describing the Senses – an investigation of how specific vocabularies for food are developed. • Industrializing the Senses – an analysis of the fundamental change in the sensory industrialization and economic forces outside the control of the household and the artisan producer. • Nationhood and the Senses – an exploration of how the combination of the senses and food play into how nations saw themselves, and how food was a s practical, everyday terms. • Food Senses and Globalization – an examination of links between food, the senses, and the idea of international significance. Putting all of the senses on the agenda of food history for the first time, this is the ideal volume for scholars of food history, food studies and food culture, as well as social and cultural historians.

The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as we party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship

Mudde offers a complex and insightful picture of one of the key political challenges of our time.
