What really happened on the night of February 3, 1916, when a fire destroyed the centre block of the Canadian Parliament buildings? Inspector Andrew MacNutt of the Dominion Police's Secret Service, his wife Katherine, and Count Jaggi know, since they were there in the reading room when the fire started. Ever since the war began MacNutt has been struggling to secure Canada's borders against acts of sabotage organized by German military attachés based in New York City. The good news is that the Americans have finally ordered them back to Germany. The bad news is that Berlin has sent one of their best operatives, Count Jaggi, to replace them. Using his cover as a Belgian Relief representative, Count Jaggi visits Ottawa, where he meets and is attracted to Katherine, who is helping him organize a local fundraiser. Unaware that Inspector MacNutt has intercepted his secret messages and is hot on his trail, Count Jaggi takes a final trip to Ottawa to see Katherine, with tragic consequences.

A Commentary

**A trillion-dollar industry, the US non-profit sector is one of the world's largest economies. From art museums and university hospitals to think tanks and church charities, over 1.5 million organizations of staggering diversity share the tax-exempt 501(c)(3) designation, if little else. Many social justice organizations have joined this world, often blunting political goals to satisfy government and foundation mandates. But even as funding shrinks, many activists often find it difficult to imagine movement-building outside the non-profit model. The Revolution Will Not Be Funded gathers essays by radical activists, educators, and non-profit staff from around the globe who critically rethink the long-term consequences of what they call the "non-profit industrial complex." Drawing on their own experiences, the contributors track the history of non-profits and provide strategies to transform and work outside them. Urgent and visionary, The Revolution Will Not Be Funded presents a biting critique of the quietly devastating role the non-profit industrial complex plays in managing dissent. Contributors. Christine E. Ahn, Robert L. Allen, Alisa Bierria, Nicole Burrows, Communities Against Rape and Abuse (CARA), William Cordery, Morgan Cousins, Ruth Wilson Gilmore, Stephanie Guilloud, Adjoa Florência Jones de Almeida, Tiffany Lethabo King, Paul Kivel, Soniya Munshi, Ewure Osayande, Amara H. **This volume contains the invited paper, the reviewed research papers, the discussants' comments on the latter, and the workshop memoranda of the fourth IFIP WG 8. 1 International Working Conference on "Information System Concepts", with the subtitle "An Integrated Discipline Emerging" (ISCO4). It was held in Leiden, The Netherlands, 20-22 September 1999. The previous three ISCO conferences were subtitled "An In-depth Analysis", "Improving the Understanding", and "Towards a Consolidation of Views". Their proceedings were published in 1989, 1992, and 1995, respectively. The ISCO conferences were instigated by the former Task Group FRISCO (an acronym for "Framework of Information System Concepts"), charged by the IFIP Working Group 8. 1 with the task of proposing a conceptual framework for the information system field. Its report, entitled "A Framework of Information System Concepts" (the "FRISCO Report" for short), is available on the World Wide Web via the address: <http://www.wi.leidenuniv.nl/~verrynst/frisco.html> or may be downloaded directly as a condensed Word-6 file from: <ftp://ftp.leidenuniv.nl/pub/rullfri-full.zip> The FRISCO Report forms a significant contribution to the long-lasting quest of our community towards developing a scientific outlook on the field of information systems. Clarifying the varied nature of many diverging views - some of which may not easily be reconciled - the report does propose a coherent, consistent and partially formalised framework of concepts.**

Criminal and terrorist organisations are increasingly turning to white collar crime such as fraud, e-crime, bribery, data and identity theft, in addition to more violent activities involving kidnap and ransom, narcotics and arms trafficking, to fund their activities and, in some cases pursue their cause. The choice of victims is global and indiscriminate. The modus operandi is continually mutating and increasing in sophistication; taking advantage of weaknesses in the system whether they be technological, legal or political. Countering these sources of threat finance is a shared challenge for governments, the military, NGOs, financial institutions and other businesses that may be targeted. Shima Keene's Threat Finance offers new thinking to equip any organisation regardless of sector and geographical location, with the knowledge and tools to deploy effective counter measures to tackle the threat. To that end, she brings together a wide variety of perspectives – cultural, legal, economic and technological – to explain the sources, mechanisms and key intervention methodologies. The current environment continues to favour the criminal and the terrorist. Threat Finance is an essential read for fraud and security practitioners, financial regulators, policy-makers, intelligence officials, judges and barristers, law enforcement officers, and researchers in this field. Dr Keene offers an antidote to the lack of good, applied, research; shortcomings in in-house financial and forensic expertise; misdirected financial compliance schemes; legal and judicial idiosyncrasies; unhelpful organisation structures and poor communication. She argues convincingly for a coherent, aggressive, informed and cross-disciplinary approach to an ever changing and rapidly growing threat.

Volume 3, Cancer, presents the complex patterns of cancer incidence and death around the world and evidence on effective and cost-effective ways to control cancers. The DCP3 evaluation of cancer will indicate where cancer treatment is ineffective and wasteful, and offer alternative cancer care packages that are cost-effective and suited to low-resource settings. Main messages from the volume include: -Quality matters in all aspects of cancer treatment and palliation. -Cancer registries that track incidence, mortality, and survival + paired with systems to capture causes of death are important to understanding the national cancer burden and the effect of interventions over time. -Effective interventions exist at a range of prices. Adopting "resource appropriate" measures which allow the most effective treatment for the greatest number of people will be advantageous to countries. -Prioritizing resources toward early stage and curable cancers is likely to have the greatest health impact in low income settings. -Research prioritization is no longer just a global responsibility. Providing cancer treatment requires adequate numbers of trained healthcare professionals and infrastructure beyond what is available in most LMICs, especially low income countries. Careful patient monitoring is a requirement of good quality cancer care and this often involves laboratory tests in addition to clinical examination. Even if financing were immediately available to build or expand a cancer control system, reaching capacity will take many years.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work.As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Rosen and Gayer's Public Finance provides the economic tools necessary to analyze government expenditure and tax policies and, along the way, takes students to the frontiers of current research and policy. While the information presented is cutting edge and reflects the work of economists currently active in the field, the approach makes the text accessible to undergraduates whose only prior exposure to economics is at the introductory level. The authors' years of policy experience have convinced them that modern public finance provides a practical and invaluable framework for thinking about policy issues. The goal is simple: to emphasize the links between sound economics and the analysis of real-world policy problems. Enhancements and key features for this new Global Edition include:New Policy Perspectives introduce relevant and engaging examples of international policy so students can extend their understanding of theory to policymaking across the globe. New Empirical Evidence applications provide students with real-world examples that are relevant to them, from case studies about Sweden and China to global examples that compare experiences between countries. Updated end-of-chapter questions broaden critical thinking, encouraging students to apply their knowledge to international and comparative examples. The results of econometric models are used to help students understand how expenditure and tax policies affect individual behavior and how governments set policies. Integrated theory and analysis: Institutional, theoretical, and empirical material is interwoven to provide students with a clear and coherent view of how government spending and taxation relate to economic theory. Current research is presented alongside discussion of methodological and substantive controversies. The approach is modern, theoretical, and empirical, and shared by most active economists. Institutional and legal settings are described in detail, and the links between economic analysis and current political issues are emphasized. This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition.

Available Open Access under CC-BY-NC licence: How does Brexit change Northern Ireland's system of government? Could it unravel crucial parts of Northern Ireland's peace process? What are the wider implications of the arrangements for the Irish and UK constitutions? Northern Ireland presents some of the most difficult Brexit dilemmas. Negotiations between the trade, the border, human rights and constitutional questions may be resolved. But the long-term impact of Brexit isn't clear. This thorough analysis draws upon EU, UK, Irish and international law, setting the scene for a post-Brexit Northern Ireland by showing what the future might hold.

An innovative advanced-undergraduate and graduate-level textbook in urban economics With more than half of today's global GDP being produced by approximately four hundred metropolitan centers, learning about the economics of cities is vital to understanding economic prosperity. This textbook introduces graduate and upper-division undergraduate students to a modern approach that integrates theoretical and empirical analysis. Based on material that Holger Sieg has taught at the University of Pennsylvania, Urban Economics and Fiscal Policy brings the most recent insights from the field into the classroom. Divided into short chapters, the book explores fiscal policies that directly shape economic issues in cities, such as affordable housing, and protection from crime and natural hazards. For each issue, Sieg offers questions, facts, and background; illuminates how economic theory helps students engage with topics; and presents empirical data that shows how economic ideas play out in daily life. Throughout, the book pushes readers to think critically and immediately put what they learn to use. This book is a much-needed resource for students and policymakers, Urban Economics and Fiscal Policy offers a unique approach to a vital and fast-growing area of economic study. Introduces advanced-undergraduate and graduate students to urban economics Presents the latest theoretical and empirical research Applies economic tools to real-world issues, including housing, la

The Parliamentary Debates (Authorized Edition)

*Why is punishment not more effective? Why do we have such high re-offending rates? How can we deal with crime and criminals in a more cost-effective way? Over the last decade in particular, the United Kingdom, in common with other jurisdictions such as Canada, the United States (US) and Australia, has sought to develop more effective ways of responding to criminal behaviour through court reforms designed to address specific manifestations of crime. Strongly influenced by developments in US court specialisation, problem-solving and specialist courts - including domestic violence courts, drugs courts, community courts and mental health courts - have proliferated in Britain over the last few years. These courts operate at the intersection of criminal law and social policy and appear to challenge much of the traditional model of court practice. In addition, policy makers and practitioners have made significant attempts to try to embed problem-solving approaches into the criminal justice system more widely. Through examination of original data gathered from detailed interviews with judges, magistrates and other key criminal justice professionals in England and Wales, as well as analysis of legislative and policy interventions, this book discusses the impact of the creation and development of court specialisation and problem-solving justice. This book will be essential reading for students and academics in the fields of criminology, criminal justice, criminal law, socio-legal studies and sociology, as well as for criminal justice practitioners and policy-makers.*

*More than merely describing the evolution of human rights and civil liberties law, this classic textbook provides students with detailed and thought-provoking coverage of the most crucial developments in the field, clearly explaining the law in context and practice. Updated throughout for this new edition, Fenwick on Civil Liberties and Human Rights considers a number of recent major changes in the law – in particular proposals to replace the Human Rights Act with a British Bill of Rights, and the Counter-Terrorism and Security Act 2015 – whilst also contextualising the impact of reforms on hate speech and contempt due to advances in new media. Comprehensive and authoritative, this textbook offers an essential resource for students on human rights or civil liberties courses, as well as a useful reference for students and scholars of UK Public Law.*

*The United Nations Convention against Corruption includes 71 articles, and takes a notably comprehensive approach to the problem of corruption, as it addresses prevention, criminalization, international cooperation, and asset recovery. Since it came into force more than a decade ago, the Convention has attracted nearly universal participation by states. As a global and comprehensive convention, which establishes new rules in several areas of anti-corruption law and helps shape domestic laws and policies around the world, this treaty calls for scholarly study. This volume helps to fill a gap in existing academic literature by providing an invaluable reference work on the Convention. It provides systematic coverage of the treaty, with each chapter discussing the relevant travaux préparatoires, the text of the final article, comparisons with other anti-corruption treaties, and available information about domestic implementing legislation and enforcement. This commentary is designed to serve as a reference work for academics, lawyers, and policy-makers working in the anti-corruption field, and in the fields of transnational criminal law and domestic criminal law. Contributors include anti-corruption experts, scholars, and legal practitioners from around the globe.*

*Updated in its 3rd edition, Basic Methods of Policy Analysis and Planning presents quickly applied methods for analyzing and resolving planning and policy issues at state, regional, and urban levels. Divided into two parts, Methods which presents quick methods in nine chapters and is organized around the steps in the policy analysis process, and Cases which presents seven policy cases, ranging in degree of complexity, the text provides readers with the resources they need for effective policy planning and analysis. Quantitative and qualitative methods are systematically combined to address policy dilemmas and urban planning problems. Readers and analysts utilizing this text gain comprehensive skills and background needed to impact public policy.*

*This Research Handbook on Transnational Crime is an interdisciplinary, up-to-date guide to this growing field, written by an international cohort of leading scholars and experts. It covers all the major areas of transnational crime, providing a well-rounded, detailed discussion of each topic, and includes chapters focusing on responses to transnational crime in specific regions. The tax on immovable property has been characterized as probably the most unpopular among tax instruments, in part because it is salient and hard to avoid. But economists continue to emphasize the virtues of the property tax owing to its relatively low efficiency costs, benign impact on growth, and high score on fairness. It is, therefore, generally considered to be underutilized in most countries. This paper takes stock of the arguments for using real property taxation, and presents an updated data-set for high-and middle income countries to illustrate its use. It also reflects the renewed and widespread interest in property tax reform globally, and discusses the many policy and administrative issues that must be carefully considered as prerequisites for successful property tax reform.*

The protection of fundamental rights in the field of transnational criminal inquiries is of great delicateness in the current tangled web of domestic and international legal sources. Due to this complex scenario, this research has been carried out from a four-level perspective. The first part provides a critical analysis of the multilevel systems of protecting fundamental rights from the perspective of supranational and constitutional case law, and in the field of international and organized crime. The second part focuses on EU judicial cooperation in three main fields: financial and serious organized crime, mutual recognition tools, and individual rights protection. The third part provides the perspectives of ten domestic legal systems in two fields, i.e., obtaining evidence abroad and cooperation with international criminal tribunals. The fourth part analyses cross-border inquiries in comparative law, providing a reconstruction of different models of obtaining evidence overseas.
