

Exploring American History Globe Exploring American History Hardcover

A Great and Rising Nation illuminates the unexplored early decades of the United States' imperialist naval aspirations. Conventional wisdom holds that, until the Spanish-American War of 1898, the United States was a feeble player on the world stage, with an international presence rooted in commerce rather than military might. Michael A. Verney's *A Great and Rising Nation* flips this notion on its head, arguing that early US naval expeditions, often characterized as merely scientific, were in fact deeply imperialist. Circling the globe from the Mediterranean to South America and the Arctic, these voyages reflected the diverse imperial aspirations of the new republic, including commercial dominance in the Pacific World, religious empire in the Holy Land, proslavery expansion in South America, and diplomatic prestige in Europe. As Verney makes clear, the United States had global imperial aspirations far earlier than is commonly thought.

During the long twentieth century, explorers went in unprecedented numbers to the hottest, coldest, and highest points on the globe. Taking us from the Himalaya to Antarctica and beyond, *Higher and Colder* presents the first history of extreme physiology, the study of the human body at its physical limits. Each chapter explores a seminal question in the history of science, while also showing how the apparently exotic locations and experiments contributed to broader political and social shifts in twentieth-century scientific thinking. Unlike most books on modern biomedicine, *Higher and Colder* focuses on fieldwork, expeditions, and exploration, and in doing so provides a welcome alternative to laboratory-dominated accounts of the history of modern life sciences. Though centered on male-dominated practices--science and exploration--it recovers the stories of women's contributions that were sometimes accidentally, and sometimes deliberately, erased. Engaging and provocative, this book is a history of the scientists and physiologists who face challenges that are physically demanding, frequently dangerous, and sometimes fatal, in the interest of advancing modern science and pushing the boundaries of human ability.

Exploring how the U.S. military can move beyond Iraq and Afghanistan Since the September 11, 2001, attacks, the U.S. military has been fighting incessantly in conflicts around the globe, often with inconclusive results. The legacies of these conflicts have serious implications for how the United States will wage war in the future. Yet there is a stunning lack of introspection about these conflicts. Never in modern U.S. history has the military been at war for so long. And never in U.S. history have such long wars demanded so much of so few. The legacy of wars without end include a military that feels the painful effects of war but often feels alone. The public is less connected to the military now than at any point in modern U.S. history. The national security apparatus seeks to pivot away from these engagements and to move on to the next threats—notably those emanating from China and Russia. Many young Americans question whether it even makes sense to invest in the military. At best, there are ad hoc, unstructured debates about Iraq or Afghanistan. Simply put, there has been no serious, organized stock-taking by the public, politicians, opinion leaders, or the military itself of this inheritance. Despite being at war for the longest continuous period in its history, the military is woefully unprepared for future wars. But the United States cannot simply hit the reset button. This book explores this inheritance by examining how nearly two decades of war have influenced civil-military relations, how the military goes to war, how the military wages war, who leads the military and who serves in it, how the military thinks about war, and above all, the enduring impact of these wars on those who waged them. If the U.S. military seeks to win in the future, it must acknowledge and reconcile with the inheritance of its long and inconclusive wars. This book seeks to help them do so.

"Everybody who has ever read a book will benefit from the way Keith Houston explores the most powerful object of our time. And everybody who has read it will agree that reports of the book's death have been greatly exaggerated."—Erik Spiekermann, typographer *We may love books, but do we know what lies behind them? In *The Book*, Keith Houston reveals that the paper, ink, thread, glue, and board from which a book is made tell as rich a story as the words on its pages—of civilizations, empires, human ingenuity, and madness. In an invitingly tactile history of this 2,000-year-old medium, Houston follows the development of writing, printing, the art of illustrations, and binding to show how we have moved from cuneiform tablets and papyrus scrolls to the hardcovers and paperbacks of today. Sure to delight book lovers of all stripes with its lush, full-color illustrations, *The Book* gives us the momentous and surprising history behind humanity's most important—and universal—information technology.*

Teaching the Educable Mentally Retarded

Who are the girls that helped build America? Conventional history books shed little light on the influence and impact of girls' contributions to society and culture. This oversight is challenged by Girl Museum and their team, who give voices to the most neglected, yet profoundly impactful, historical narratives of American history: young girls. *Exploring American Girls' History through 50 Historic Treasures* showcases girls and their experiences through the lens of place and material culture. Discover how the objects and sites that girls left behind tell stories about America that you have never heard before. Readers will journey from the first peoples who called the continent home, to 21st century struggles for civil rights, becoming immersed in stories that show how the local impacts the global and vice versa, as told by the girls who built America. Their stories, dreams, struggles, and triumphs are the centerpiece of the nation's story as never before, helping to define both the struggle and meaning of being "American." This full-color book is a must-read for those who yearn for more balanced representation in historic narratives, as well as an inspiration to young people, showing them that everyone makes history. It includes color photographs of all the treasured objects explored.

"This book will deploy a wide range of material culture objects, artwork, and landscapes to tell the story of the American Civil War. The objects will document the war's history from its beginnings in the fierce debates over slavery through its legacy, including recent debates about Confederate monuments"--

English Exploration and Settlement in North America, 1497-1689

A celebration of the great American lighthouses, their keepers, their histories, and their ongoing stories. For more than two centuries, lighthouses have helped sailors find their way through treacherous waters, guiding them home or taking them safely through passages on their way to adventure. These historic towers and houses form a sparkling chain of lights along our coasts, a reminder of the past echoing with adventure and mystery, a lure for travelers looking for a glimpse into a romantic past. Completely revised and updated, *American Lighthouses* offers more than just a tour of 450 beautiful and historic navigational beacons dotting the coasts and lakes of the United States. This fully illustrated, one-of-a-kind handbook details their history and architecture and provides full information on visiting or viewing them. Included are many endangered lights, threatened by erosion or lack of funding, as well as "ghost lights," which are no longer standing.

"A treasure of a book."—David McCullough The harrowing story of a pathbreaking naval expedition that set out to map the entire Pacific Ocean, dwarfing Lewis and Clark with its discoveries, from the New York Times bestselling author of *Valiant Ambition* and *In the Hurricane's Eye*. A New York Times Notable Book America's first frontier was not the West; it was the sea, and no one writes more eloquently about that watery wilderness than Nathaniel Philbrick. In his bestselling *In the Heart of the Sea* Philbrick probed the nightmarish dangers of the vast Pacific. Now, in an epic sea adventure, he writes about one of the most ambitious voyages of discovery the Western world has ever seen—the U.S. Exploring Expedition of 1838–1842. On a scale that dwarfed the journey of Lewis and Clark, six magnificent sailing vessels and a crew of hundreds set out to map the entire Pacific Ocean and ended up naming the newly discovered continent of Antarctica, collecting what would become the basis of the Smithsonian Institution. Combining spellbinding human drama and meticulous research, Philbrick reconstructs the dark saga of the voyage to show why, instead of being celebrated and revered as that of Lewis and Clark, it has—until now—been relegated to a footnote in the national memory. Winner of the Theodore and Franklin D. Roosevelt Naval History Prize

Traces the history of the United States from the arrival of the first explorers to the present day.

50 Maps of the World is an essential addition to the bookshelf of any young travel lover, map maestro, or geography genius. Spanning the world from Spain to Singapore, Colombia to Canada, Turkey to Tanzania, discover all you need to know about some of the most awesome places on Earth. Geography, history, and culture spill from the pages in this luxuriously illustrated treasure trove of travel knowledge. Each two-page spread is dedicated to a different country, providing both quick-fire facts and the chance to delve deeper into what makes every nation unique. Natural wonders, bustling metropolises, storied pasts, and cultural icons are all presented in expert detail by a pair of experienced explorers. Meet our earliest ancestors in Ethiopia, marvel at Machu Picchu in Peru, and visit the floating villages of Cambodia in this colorful guide to 50 fascinating countries. Each spread includes dozens of spotlighted locations, a timeline of the nation's history, and introductions to the people who have helped shape it. With the expertise of Ben Handicott (*Hello Atlas*, *Atlas of Adventures: Wonders of the World*) and Kalya Ryan, alongside the stunning illustrations of Sol Linero (*The 50 States*, *50 Cities of the U.S.A.*), experience the diversity of our world like never before. *50 Maps of the World* reimagines what maps can be, providing not just a geographical fact fest but a vivid insight into the history, culture, and wildlife that shape our living world. It is the perfect gift for young globetrotters and armchair travelers alike. Also available from the *50 States* series: *The 50 States*, *The 50 States: Activity Book*, *The 50 States: Fun Facts*, *50 Cities of the U.S.A.*, *50 Trailblazers of the 50 States*, and *I Spy the 50 States*.

America's Military After Two Decades of War

American Lighthouses

The New Exploring American History. Workbook

Winner of the Modern Language Association's Prize for Studies in Native American Literatures, Cultures, and Languages Winner of the American Historical Association's Albert J. Beveridge Award Winner of NAISA's Best Subsequent Book Award Winner of the Western History Association's John C. Ewers Award Finalist for the John Hope Franklin Prize What if we saw indigenous people as the active agents of global exploration rather than as the passive objects of that exploration? What if, instead of conceiving of global exploration as an enterprise just of

European men such as Columbus or Cook or Magellan, we thought of it as an enterprise of the people they “discovered”? What could such a new perspective reveal about geographical understanding and its place in struggles over power in the context of colonialism? *The World and All the Things upon It* addresses these questions by tracing how Kanaka Maoli (Native Hawaiian people) explored the outside world and generated their own understandings of it in the century after James Cook’s arrival in 1778. Writing with verve, David A. Chang draws on the compelling words of long-ignored Hawaiian-language sources—stories, songs, chants, and political prose—to demonstrate how Native Hawaiian people worked to influence their metaphorical “place in the world.” We meet, for example, Kaʻiana, a Hawaiian chief who took an English captain as his lover and, while sailing throughout the Pacific, considered how Chinese, Filipinos, Pacific Islanders, and Native Americans might shape relations with Westerners to their own advantage. Chang’s book is unique in examining travel, sexuality, spirituality, print culture, gender, labor, education, and race to shed light on how constructions of global geography became a site through which Hawaiians, as well as their would-be colonizers, perceived and contested imperialism, colonialism, and nationalism. Rarely have historians asked how non-Western people imagined and even forged their own geographies of their colonizers and the broader world. This book takes up that task. It emphasizes, moreover, that there is no better way to understand the process and meaning of global exploration than by looking out from the shores of a place, such as Hawaiʻi, that was allegedly the object, and not the agent, of exploration.

A powerful, eagerly anticipated exploration (past and present) of white supremacy in the teachings of our national education system, its depth, breadth, and persistence--and how, through generations of our nation's most esteemed educators and textbooks, racism has been insidiously fostered--North and South--at all levels of learning. . In *Teaching White Supremacy*, Donald Yacovone shows us the clear and damning evidence of white supremacy's deep-seated roots in our nation's education system in a fascinating, in-depth examination of America's wide assortment of texts, from primary readers to college textbooks and other higher-ed course materials. Sifting through a wealth of materials, from the colonial era to today, Yacovone reveals the systematic ways in which white supremacist ideology has infiltrated American culture and how it has been at the heart of our collective national identity. Yacovone lays out the arc of America's white supremacy from the country's inception and Revolutionary years to its 19th century flashpoint of civil war; to the Civil Rights movement of the 1960s and today's Black Lives Matter. And, the author argues that it is the North, not the South, that bears the greater responsibility for creating the dominant strain of race theory, inculcated throughout the culture and in school textbooks, that restricted and repressed African Americans and other minorities, even as Northerners blamed the South for its legacy of slavery, segregation and racial injustice.

Sociocultural Dimensions of American Schoolbooks

The central assumption of *The Textbook as Discourse* is this: interpreted in the flow of history, textbooks can provide important insights into the nature and meaning of a culture and the social and political discourses in which it is engaged. This book is about the social, political and cultural content of elementary and secondary textbooks in American education. It focuses on the nature of the discourses—the content and context—that represent what is included in textbooks. The term "discourse" provides the conceptual framework for the book, drawing on the work of the French social theorist Michel Foucault. The volume includes classic articles and book chapters as well as three original chapters written by the editors. To enhance its usefulness as a course text, each chapter includes an Overview, Key Concepts, and Questions for Reflection.

A full-color trip through the treasures of American Childhood from 1650 to today. Remember the toys you played with when you were growing up? Each of those objects has a story to tell about the history of American childhood and play. Construction toys like Lincoln Logs and Erector Set offer insight into America’s booming urban infrastructure in the early 1910s and 20s, and the important role toys played in preparing children for future careers in engineering and architecture. A stuffed toy monkey from Germany tells the story of young Jewish refugees to the United States during World War II. The board game Candyland has its origins in the dreaded polio epidemic of 1950s. *Exploring Childhood and Play Through 50 Historic Treasures* brings together a collection of beloved toys and games from the last two centuries to guide readers on a journey through the history of American childhood and play, 1840-2000. Through color photographs and short essays on each object, this book examines childhood against the backdrop of culture, politics, religion, technology, gender, parenting philosophies, and more. The book features ten categories of objects including board and electronic games, dolls, action figures, art toys, optical toys, animal toys, construction sets, and sports. Each essay tells the story of the individual object its historic context, and each passage builds upon one another to create a fascinating survey of how childhood and play changed over the course of two centuries.

A Bibliography Based on the Acquisitions of the Educational Materials Center

Well researched and presented guide about the USA for world wide audience, especially for immigrants and perspective US immigrants to help them get a comprehensive view of our great nation on earth. Book is written by a naturalized American International Business Executive and former manager with a top Fortune 500 company with decades of US experience, who now is into academics.. What is to be noted here is that most new comers will take a long time understanding American society and culture and get rid of false notions acquired by reading tabloids, second rates movies and listening to those for whom America is sour grape.

Robert and Denise Sedlak are noted for their work with mentally retarded young people. Teaching the Educable Mentally Retarded combines their training and experience to create an invaluable resource for both the practicing and beginning teacher of mildly retarded students. Practical suggestions, case studies, and real-life anecdotes are interwoven with research findings. The result is an up-to-date, comprehensive guide to handling the expected and unexpected situations teachers confront in the classroom. The book incorporates current trends in education, featuring sections on the use of instructional aides in the classroom and on the use of computers and other teaching technology in special education classes. The authors' style is clear and easy to follow, and the work is enhanced through the copious use of charts and figures.
