Moving Pictures, Still Lives revisits the cinematic and intellectual atmosphere of the late twentieth century. Against the backdrop of the historical fever of the 1980s and 1990s—the rise of the heritage industry, a global museum-building boom, and a cinematic fascination with costume dramas and literary adaptations—it explores the work of artists and philosophers who complicated the usual association between tradition and the past or modernity and the future. Author James Tweedie retraces the "archaeomodern turn" in films and theory that framed the past as a repository of abandoned but potentially transformative experiments. He examines late twentieth-century filmmakers who were inspired by old media, especially painting, and often viewed those art forms as portals to the modern past. In detailed discussions of Alain Cavalier, Terence Davies, Jean-Luc Godard, Peter Greenaway, Derek Jarman, Agnès Varda, and other key directors, the book concentrates on films that fill the screen with a succession of tableaux vivants, still lifes, illuminated manuscripts, and landscapes. It also considers three key figures—Walter Benjamin, Gilles Deleuze, and Serge Daney—who grappled with the late twentieth century's characteristic concerns, including history, memory, and belatedness. It reframes their theoretical work on film as a mourning play for past revolutions and a means of reviving the possibilities of the modern age (and its paradigmatic medium, cinema) during periods of political and cultural retrenchment. Looking at cinema and the century in the rear-view mirror, the book highlights the unrealized potential visible in the history of film, as well as the cinematic phantoms that remain in the digital age.

At the foot of Mount Ararat on the crossroads of the eastern and western worlds, medieval Armenians dominated international trading routes that reached from Europe to China and India to Russia. As the first people to convert officially to Christianity, they commissioned and produced some of the most extraordinary religious objects of the Middle Ages. These objects—from sumptuous illuminated manuscripts to handsome carvings, liturgical furnishings, gilded reliquaries, exquisite textiles, and printed books—show the strong persistence of their own cultural identity, as well as the multicultural influences of Armenia's interactions with Romans, Byzantines, Persians, Muslims, Mongols, Ottomans, and Europeans. This unprecedented volume, written by a team of international scholars and members of the Armenian religious community, contextualizes and celebrates the compelling works of art that define Armenian medieval culture. It features breathtaking photographs of archaeological sites and stunning churches and monasteries that help fill out this unique history. With groundbreaking essays and exquisite illustrations, *Armenia* illuminates the singular achievements of a great medieval civilization. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

"Callings will inspire readers at every stage of their careers to view work with a new appreciation for the possibilities it holds beyond the mundane." —Booklist Stories of passion, courage, and commitment, following individuals as they pursue the work they were born to do, from StoryCorps founder Dave Isay In Callings, StoryCorps founder Dave Isay presents unforgettable stories from people doing what they love. Some found their paths at a very young age, others later in life; some overcame great odds or upturned their lives in order to pursue what matters to them. Many of their stories have never been broadcast or published by StoryCorps until now. We meet a man from the barrios of Texas whose harrowing experiences in a family of migrant farmers inspired him to become a public defender. We meet a longtime waitress who takes pride in making regulars and newcomers alike feel at home in her Nashville diner. We meet a young man on the South Side of Chicago who became a teacher in order to help at-risk teenagers like the ones who killed his father get on the right track. We meet a woman from Little Rock who helps former inmates gain the skills and confidence they need to rejoin the workforce. Together they demonstrate how work can be about much more than just making a living, that chasing dreams and finding inspiration in unexpected places can transform a vocation into a calling. Their shared sense of passion, honor, and commitment brings deeper meaning and satisfaction to every aspect of their lives. An essential contribution to the beloved StoryCorps collection, Callings is an inspiring tribute to rewarding work and the American pursuit of happiness.

Presbyterian minister John Witherspoon was a key figure, politically and religiously, in the formative years of the United States. In this fresh account of Witherspoon's thought, L. Gordon Tait focuses on Witherspoon's piety--the way Witherspoon believed that the Christian faith should take visible and practical form in ministry, politics, and everyday obedience and devotion. The Piety of John Witherspoon is filled with photographs from Witherspoon's life, and Tait's comprehensive treatment of Witherspoon makes a significant contribution to the understanding of his impact on church, education, and society.

Is English a threat to language diversity in Europe? This question has been hotly debated in language policy and planning in Germany and the EU, particularly in institutional and business contexts. However, the effects of English on non-official minority speech communities, such as speakers of immigrant languages and multiethnolects, are rarely addressed in this context. This book presents two case studies involving speakers of multiethnolects and refugee youth in Germany which show that these populations, stereotyped as non-proficient English speakers, are using English in creative and innovative ways. For these communities, speaking English is not a choice, but a matter of the ability to survive, to cross borders, and to create new identities in a foreign country. Drawing on corpus linguistic and ethnographic fieldwork data, this book sheds light on how validating these (standard and non-standard) Englishes represents an important act of empowerment and social justice for these communities. Situated at the interdisciplinary intersection of sociolinguistics and applied linguistics, this book is of broad appeal to linguists, language educators, language policy makers, and to the German Studies community at large.

In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the lucrative trade routes of maritime Asia. The Ottoman Age of Exploration is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem. Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean.

Beyond Grammar: Language, Power, and the Classroom asks readers to think about the power of words, the power of language attitudes, and the power of language policies as they play out in communities, in educational institutions, and in their own lives as individuals, teachers, and participants in the larger community. Each chapter provides extended discussion of a set of critical language issues that directly affect students in classrooms: the political nature of language, the power of words, hate language and bullying, gender and language, dialects, and language policies. Written for pre-service and practicing teachers, this text addresses how teachers can alert students to the realities of language and power—removing language study from a “neutral” corner to situate it within the context of political, social, and cultural issues. Developing a critical pedagogy about language instruction can help educators understand that classrooms can either maintain existing inequity or address and diminish inequity through critical language study. A common framework structures the chapters of the text: * Each chapter begins with an overview of the language issue in question, and includes references for further research and for classroom use, and provides applications for classroom teachers. * Numerous references to the popular press and the breadth of language issues found therein foreground current thought on socio-cultural language issues, attitudes, standards, and policies found in the culture(s) at large. * References to current and recent events illustrate the language issue’s importance, cartoons address the issue, and brief “For Thought” activities illustrate the point being discussed and extend the reader’s

knowledge and awareness. * "Personal Explorations" ask readers to go beyond the text to develop further understanding; "Teaching Explorations" ask teachers to apply chapter content to teaching situations. Beyond Grammar: Language, Power, and the Classroom is intended for undergraduate and master's level courses that address literacy education, linguistics, and issues of language and culture.

The Musical Work

*Is American English in decline? Are regional dialects dying out? Is there a difference between men and women in how they adapt to linguistic variations? These questions, and more, about our language catapulted Robert MacNeil and William Cran—the authors (with Robert McCrum) of the language classic *The Story of English*—across the country in search of the answers. *Do You Speak American?* is the tale of their discoveries, which provocatively show how the standard for American English—if a standard exists—is changing quickly and dramatically. On a journey that takes them from the Northeast, through Appalachia and the Deep South, and west to California, the authors observe everyday verbal interactions and in a host of interviews with native speakers glean the linguistic quirks and traditions characteristic of each area. While examining the histories and controversies surrounding both written and spoken American English, they address anxieties and assumptions that, when explored, are highly emotional, such as the growing influence of Spanish as a threat to American English and the special treatment of African-American vernacular English. And, challenging the purists who think grammatical standards are in serious deterioration and that media saturation of our culture is homogenizing our speech, they surprise us with unpredictable responses. With insight and wit, MacNeil and Cran bring us a compelling book that is at once a celebration and a potent study of our singular language. Each wave of immigration has brought new words to enrich the American language. Do you recognize the origin of 1. blunderbuss, sleigh, stoop, coleslaw, boss, waffle? Or 2. dumb, ouch, shyster, check, kaput, scram, bumper? Or 3. phooey, pastrami, glitch, kibbitz, schnozzle? Or 4. broccoli, espresso, pizza, pasta, macaroni, radio? Or 5. smithereens, lollapalooza, speakeasy, hooligan? Or 6. vamoose, chaps, stampede, mustang, ranch, corral? 1. Dutch 2. German 3. Yiddish 4. Italian 5. Irish 6. Spanish*

*Based on Wardle and Downs' research, the first edition of *Writing about Writing* marked a milestone in the field of composition. By showing students how to draw on what they know in order to contribute to ongoing conversations about writing and literacy, it helped them transfer their writing-related skills from first-year composition to other courses and contexts. Now used by tens of thousands of students, *Writing about Writing* presents accessible writing studies research by authors such as Mike Rose, Deborah Brandt, John Swales, and Nancy Sommers, together with popular texts by authors such as Malcolm X and Anne Lamott, and texts from student writers. Throughout the book, friendly explanations and scaffolded activities and questions help students connect to readings and develop knowledge about writing that they can use at work, in their everyday lives, and in college. The new edition builds on this success and refines the approach to make it even more teachable. The second edition includes more help for understanding the rhetorical situation and an exciting new chapter on multimodal composing. The print text is now integrated with e-Pages for *Writing about Writing*, designed to take advantage of what the Web can do. The conversation on writing about writing continues on the authors' blog, *Write On: Notes on Writing about Writing* (a channel on Bedford Bits, the Bedford/St. Martin's blog for teachers of writing).*

Rachel Whitman has everything. She's young, attractive, and affluent. Her husband is the brilliant CEO of his own company. They have a big new house in a flossy Boston suburb. They have all the brand-name "toys" that go along with wealth. And they have a gorgeous, sweet little six-year-old son named Dylan. But Dylan has learning disabilities. Although intelligence isn't everything, Rachel lives in a community where the rewards for brainpower are conspicuous. She fears her son will grow up never fully appreciating the wonders of life. Like so many middle-class parents who would do anything to improve life for their children—whether it means fixing hair, teeth, or nose—Rachel cannot accept that her child is less than perfect. Tortured by the idea that something she did in the past caused Dylan's problems, Rachel becomes obsessed with a secret and expensive medical procedure that claims to turn slow children into geniuses. Should she and her husband sacrifice their new fortune on the risky, experimental procedure for the sake of their son's happiness? Unaware of the real consequences of the brain enhancement procedure, Rachel can't know that the costs of the operation go far beyond financial ones. If you could relive your childhood, would you? What if you had no choice? On the thirty-fifth anniversary of his parents' mysterious drowning, Jack Koryan returns to his family beach cottage. During a swim, Jack is attacked by a school of rare jellyfish whose toxic stings put him in a coma for three years. When he awakens, he finds that the jellyfish toxin has left him with an extraordinary memory that impresses his doctors. This discovery is complicated by flashbacks: some, pleasant childhood vignettes, others, confusing flashes of violence that leave him quaking in horror. Jack wonders if he's losing his mind, but that fear is dispelled by Rene Ballard, a pharmacologist working on the world's first cure for Alzheimer's Disease. She wants to test Jack because the basis of the drug is the very jellyfish toxin that sent Jack into a coma. And, while several test patients have miraculously regained functionality, others are also experiencing dangerous flashback seizures. Ballard's revelation sets Jack on a quest to discover what is happening to him. He and Rene uncover a sinister pattern of lies and deceit that has left behind a trail of bodies, and several elderly patients stuck in a past that they cannot emerge from--or don't want to. Ngai mobilizes the aesthetics of unprestigious negative affects such as irritation, envy, and disgust to investigate not only ideological and representational dilemmas in literature--with a particular focus on those inflected by gender and race--but also blind spots in contemporary literary and cultural criticism. Her work maps a major intersection of literary studies, media and cultural studies, feminist studies, and aesthetic theory.

This volume gathers contributions from a range of international scholars and geopolitical contexts to explore why people organise themselves into performance communities in sites of crisis and how performance – social and aesthetic, sanctioned and underground – is employed as a mechanism for survival. The chapters treat a wide range of what can be considered 'survival', ranging from sheer physical survival, to the survival of a social group with its own unique culture and values, to the survival of the very possibility of agency and dissent. Performance as a form of political resistance and protest plays a large part in many of the essays, but performance does more than that: it enables societies in crisis to continue to define themselves. By maintaining identities that are based on their own chosen affiliations and not defined solely in opposition to their oppressors, individuals and groups prepare themselves for a post-crisis future by keeping alive their own notions of who they are and who they hope to be.
