

Exploring Lifespan Development Chapter 4

In the past fifty years, scholars of human development have been moving from studying change in humans within sharply defined periods, to seeing many more of these phenomenon as more profitably studied over time and in relation to other processes. The Handbook of Life-Span Development, Volume 2: Social and Emotional Development presents the study of human development conducted by the best scholars in the 21st century. Social workers, counselors and public health workers will receive coverage of the social and emotional aspects of human change across the lifespan.

The first of its kind, this manual presents educational approaches and processes which reflect feminist principles for teachers and leaders of courses and workshops in the psychology of women. Sample syllabi, outlines, references, lists of audio-visual material, organizations, discussion questions, and experiential exercises reflect the content areas typically covered in these courses: achievement, sexuality, health, adjustment, psychotherapy, communication, victimization, methodology, life-style choices, work, and development.

For courses in Human Development Exploring Lifespan Development, 4th Edition, the shorter, essentials version of Development Through the Lifespan, 7th Edition, covers the same topics and contains the same number of chapters, but presents only the essential information, with an exceptionally strong emphasis on applications. Exploring Lifespan Development also includes all the great features Berk's texts are known for -- an engaging writing style, exceptional multicultural and cross-cultural focus, rich examples, the most up-to-date research, and practical applications that help students relate the subject to their personal and professional lives.

What are the changes we see over the life-span? How can we explain them? And how do we account for individual differences? This volume continues to examine these questions and to report advances in empirical research within life-span development increasing its interdisciplinary nature. The relationships between individual development, social context, and historical change are salient issues discussed in this volume, as are nonnormative and atypical events contributing to life-span change.

Frameworks, Accounts and Strategies

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Life Span Motor Development, Seventh Edition, uses the model of constraints in discussing reasons for changes in movement throughout the life span. It encourages students to examine how the interactions of the individual, environment, and task bring about changes in a person's movements.

Known for its clear, straightforward writing, grounding in current research, and well-chosen visuals and examples, Sigelman and Rider's text combines a topical organization at the chapter level and a consistent chronological presentation within each chapter. Each chapter focuses on a domain of development and traces developmental trends and influences in that domain from infancy to old age. Each chapter also includes sections on infancy, childhood, adolescence, and adulthood. The blend of topical and chronological approaches helps students grasp key transformations that occur in each period of the life span. Other staples of the text are its emphasis on theories and their application to different aspects of development and its focus on the interplay of nature and nurture in development. This edition expands its examination of both biological bases of and sociocultural influences on life-span development. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Developing Person Through the Life Span, Sixth Edition presents theory, research, practical examples, and policy issues in a way that inspires students to think about human development--and about the individual's role in the community and the world. Review the new edition, and you'll find Berger's signature strengths on display--the perceptive analysis of current research, the lively and personal writing style, and the unmistakable commitment to students. You'll also find a wealth of new topics--plus a video-based Media Tool Kit that takes the teaching and learning of human development to a new level.

Exploring stability and change through the lifespan

The Counselor Educator's Guide

Life-Span Developmental Psychology: Normative Life Crises is a compilation of papers that deals with various points of view between the academic perspective — studies in developmental psychology and applied perspective — and the practical efforts of social workers to help individual clients. Part I discusses normative life crises from the two perspectives that include human behavior theory in social work education. This part also includes an interdisciplinary approach covering developmental, social, sociological, economic, and psychological fields. Part II covers the normative life crises in individual development such as discussions on death, ego development, and a practitioner's response on models of ego development. The book also discusses an abstract model versus an actual individual experience in dealing with crises, as well as the meanings of adaptation and survival during old age. Part III presents the normative life crises in the family circle covering topics such as parenthood, sex roles, depression, widowhood, and an example of situational stress. Part IV deals with the normative life crises and the social system,

including socialization, life course, changing work cycles, and public policy on death. This book will prove valuable for psychologists, psychiatrists, sociologists, social workers, and behavioral scientists.

Janet Belsky is an innovative and accomplished teacher, an engaging and perceptive writer, as well as a practicing psychologist who has worked in many settings--from inner-city hospitals to nursing homes. Drawing on the sensibilities that have defined her professional life, Janet Belsky has produced an exploration of development across the lifespan unlike any other. Person-centered yet scientifically sound, practice-oriented yet rich in current and classic research, Belsky's *Experiencing the Lifespan* offers students an experience learning about life that they will take to heart. And at around just 550 pages, it is an experience that fits comfortably within a single term.

Master health promotion for all ages and population groups! *Health Promotion Throughout the Life Span, 10th Edition* provides comprehensive coverage of leading health promotion concepts from assessment to interventions to application. Its lifespan approach addresses patients' unique needs with case studies and care plans presented within an assessment framework based on Gordon's Functional Health Patterns. Addressing each age and stage of development, this market-leading text covers the latest research and trends in health promotion and disease prevention for diverse population groups. Coverage of growth and development addresses health promotion concepts for each age and each stage of development through the lifespan. Case studies present realistic situations with questions that challenge you to apply key concepts to further develop clinical judgment. Think About It clinical scenarios at the beginning of each chapter include questions to encourage clinical judgment. Research for Evidence-Based Practice boxes summarize current health-promotion studies showing the links between research, theory, and practice. Hot Topics boxes introduce significant issues, trends, and controversies in health promotion. Separate chapters on population groups—the individual, family, and community—highlight the unique aspects of assessment and health promotion for each group. Quality and Safety Scenario boxes focus on QSEN-related competencies with examples of health promotion. Innovative Practice boxes outline unique and creative health promotion programs and projects currently being implemented. Health and Social Determinants/Health Equity boxes address cultural perspectives relating to planning care. NEW! Greater emphasis on health equity highlights the need to make health promotion accessible to all. NEW! Increased focus on diversity and inclusion better reflects the communities being served. NEW! Veteran's health content is incorporated throughout, as appropriate. NEW! Discussions of Healthy People 2030 initiatives and objectives address national health issues and priorities. NEW! Updated diagnosis terminology includes ICNP diagnoses or patient problems. NEW! Affordable Care Act references are more general to reflect changing politics.

This book uses a chronological approach to present development across the life span, drawing on the psychosocial theory of Erik Erikson to provide a conceptual framework. The authors address physical, intellectual, social, and emotional growth in all life stages, focusing on the idea that development results from the interdependence of these areas at every stage, and placing special emphasis on optimal development through life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"In *Exploring the Dynamics of Human Development*, Dr. Catherine Raeff constructs a theoretical framework that enables readers to reconcile seemingly disparate information by thinking systematically about dynamic developmental processes"--

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

By combining the best of topical and chronological approaches, this text presents life-span development as a motion picture rather than as a series of individual snapshots.

Research has shown that a range of adult psychiatric disorders and mental health problems originate at an early age, yet the psychiatric symptoms of an increasing number of children and adolescents are going unrecognized and untreated—there are simply not enough child psychiatric providers to meet this steadily rising demand. It is vital that advanced practice registered nurses (APRNs) and primary care practitioners take active roles in assessing behavioral health presentations and work collaboratively with families and other healthcare professionals to ensure that all children and adolescents receive appropriate treatment. Child and Adolescent Behavioral Health helps APRNs address the mental health needs of this vulnerable population, providing practical guidance on assessment guidelines, intervention and treatment strategies, indications for consultation, collaboration, referral, and more. Now in its second edition, this comprehensive and timely resource has been fully updated to include DSM-5 criteria and the latest guidance on assessing, diagnosing, and treating the most common behavioral health issues facing young people. New and expanded chapters cover topics including eating disorders, bullying and victimization, LGBTQ identity issues, and conducting research with high-risk children and adolescents. Edited and written by a team of accomplished child psychiatric and primary care practitioners, this authoritative volume: Provides state-of-the-art knowledge about specific psychiatric and behavioral health issues in multiple care settings Reviews the clinical manifestation and etiology of behavioral disorders, risk and management issues, and implications for practice, research, and education Offers approaches for interviewing children and adolescents, and strategies for integrating physical and psychiatric screening Discusses special topics such as legal and ethical issues, cultural influences, the needs of immigrant children, and child and adolescent mental health policy Features a new companion website containing clinical case studies to apply concepts from the chapters Designed to specifically address the issues faced by APRNs, Child and Adolescent Behavioral

Health is essential reading for nurse practitioners and clinical nurse specialists, particularly those working in family, pediatric, community health, psychiatric, and mental health settings.

"If you think you know what positive psychology is, think again! This book offers a new integrative vision for making life better that takes in the body and the brain, culture and society, childhood and development... A must read for students." - Stephen Joseph, University of Nottingham "Captures the best of the positive psychology initiative, and most importantly, translates it to practice. The authors bring remarkable depth and breadth to the subject matter and do so in a way that is fresh, engaging, relevant, and unusually thoughtful." - Carol Ryff, University of Wisconsin-Madison "If you want to understand what positive psychology really is, learn how it works in practice and discover its huge potential to transform our lives and our world then look no further than this superb book. I really can't recommend it highly enough." - Mark Williamson, Director of Action for Happiness This exciting new textbook, written by leading academics in the UK, offers the very first authored title on applied positive psychology for university courses. Consisting of the latest cutting-edge theory and research in the subject and structured around a pioneering multidimensional model of wellbeing, this book will provide you with the knowledge and tools to apply positive psychology in many areas of life. These include interventions aimed at developing mental and physical functioning, to recommendations for enhancing relationships and reshaping organisational structures. The book shows how these practices can be successfully deployed in diverse real-world settings, from the classroom to the workplace. Key features include: Learning objectives set out at the start of each chapter Practice essay questions throughout and quizzes to test your knowledge at the end of each chapter Useful measurement tools and recommendations for research Summary boxes and suggested further reading and resources Case studies and 'Reflection' boxes that invite you to explore topics in greater depth and relate findings to your everyday life. This book will be essential reading for all students with an interest in or studying a course in applied positive psychology, and is strongly recommended to students taking a wider course in positive psychology and the psychology of happiness and wellbeing.

Life-Span Developmental Psychology: Nonnormative Life Events documents the proceedings of the 7th West Virginia University Life-Span Conference, held in Morgantown, WV, in May 1980. This volume focuses on the effects of nonnormative life crises, those which occur to only certain individuals within a specific culture or group and are for the most part considered to be disruptive to the normal life course.

Contributors were invited from a number of orientations and academic disciplines, ranging from traditional life-span psychologists to practicing clinical psychologists. The dynamic interplay of these diverse approaches results in a very exciting level of intellectual and practical stimulation, which is reflected in the chapters of this volume. The chapters are grouped topically to mirror the pairings of the conference presentations. Key topics covered include the dimensionalization of life events; adolescent pregnancy and parenthood; grief and adjustment for families dealing with sudden infant death; family violence; and impact of divorce on children.

Each chapter includes a review of key concepts, guided study questions, and section reviews that encourage students' active participation in the learning process; two practice tests and a challenge test help them assess their mastery of the material. Applications and observational activities are also included.

Looking Forward Through the Lifespan: Developmental Psychology

The Developing Person Through the Life Span Study Guide

Life-span Perspectives on Health and Illness

When a local context really makes the difference... The new edition of this original Australian text continues to offer the most balanced coverage of theory and research for Australian students and educators and appeals to students from many backgrounds. It covers the domains of development including neurological, cognitive, social, physical and personality. The text is organised chronologically by chapter. Within each chapter content is organised topically. This structure allows for a degree of flexibility and lecturers can choose the way they wish to approach the content, whether it is topically or chronologically.

Lifespan Development, Third Australasian edition, explores human physical, cognitive and social development within an Australian and New Zealand context. Building on the successful first and second editions, the resource's comprehensive theory coverage includes the latest local and international research in this ever-evolving field, and is perfectly complemented by numerous physical and mental health applications within local psychological, allied health and educational settings. This edition includes enhanced coverage of developmental theories, and increased integrated coverage of cross-cultural and Indigenous issues unique to the multicultural societies of Australia and New Zealand. It is an ideal resource offering for undergraduate students in both countries in order to enhance understanding of human development -- from conception through to the end of life.

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. A practical roadmap for teaching graduate counseling courses from start to finish Written for the soon-to-be, newer, or adjunct counselor educator, this is an accessible, practical guide to preparing and teaching a graduate counseling course from start to finish. Authored by skilled counselor educators who found themselves woefully unprepared to teach upon obtaining their first faculty positions, the book proffers their hard-earned wisdom to help new faculty confidently take over the role of instructor. The hands-on guide provides convenient overviews of each course and day-to-day, content-specific strategies for designing and teaching integral course content that is culturally sensitive and developmentally appropriate. Offering diverse strategies and activities, the book addresses how to teach courses in CACREP-accredited programs and covers such topics as identifying theoretical orientation; diagnosis, assessment, and treatment planning; developing therapeutic presence; group leadership; genograms; diversity; basic counseling skills; school shootings; suicide; White privilege; and much more. It addresses course objectives, evaluation of student learning, current research, classroom management, use of technology, do's and don'ts, and advising students. Discussion points and merits of activities are informed by the concept of andragogy, a theory specifically for adult learning. Multicultural and social considerations are woven throughout each chapter. Activities and assignments were developed with feedback from students. KEY FEATURES: Provides a practical roadmap for preparing and teaching a graduate counseling course from start to finish Delivers in-depth practical information on how to teach new material and conduct day-to-day lectures Discusses content-specific teaching strategies and advice Guides new faculty members in understanding how all of the courses in the curriculum influence each other Includes multicultural and social considerations in each chapter Informed by the concept of andragogy, a theory specifically for adult learning

Providing a solid foundation in the normal development of functional movement, Functional Movement Development Across the Life Span, 3rd Edition helps you recognize and understand movement disorders and effectively manage patients with abnormal motor function. It begins with coverage of basic theory, motor development and motor control, and evaluation of function, then discusses the body systems contributing to functional movement, and defines functional movement outcomes in terms of age,

vital functions, posture and balance, locomotion, prehension, and health and illness. This edition includes more clinical examples and applications, and updates data relating to typical performance on standardized tests of balance. Written by physical therapy experts Donna J. Cech and Suzanne "Tink" Martin, this book provides evidence-based information and tools you need to understand functional movement and manage patients' functional skills throughout the life span. Over 200 illustrations, tables, and special features clarify developmental concepts, address clinical implications, and summarize key points relating to clinical practice. A focus on evidence-based information covers development changes across the life span and how they impact function. A logical, easy-to-read format includes 15 chapters organized into three units covering basics, body systems, and age-related functional outcomes respectively. Expanded integration of ICF (International Classification of Function) aligns learning and critical thinking with current health care models. Additional clinical examples help you apply developmental information to clinical practice. Expanded content on assessment of function now includes discussion of participation level standardized assessments and assessments of quality-of-life scales. More concise information on the normal anatomy and physiology of each body system allows a sharper focus on development changes across the lifespan and how they impact function.

Santrock, Essentials of Life-Span Development, First Canadian Edition is an exciting new resource that offers essential content in a student-friendly format. Featuring shorter chapters and interactive study modules, Santrock 1ce covers all periods of the human life-span chronologically from the prenatal period through late adulthood and death. Santrock, Essentials of Life-Span Development, First Canadian Edition is ideal for one-semester Life-Span Development courses at both colleges and universities, or for any learner eager to explore the essentials of life-span development.

This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

The Developing Person Through Childhood and Adolescence Study Guide

Exploring Lifespan Development, Fourth Edition , the shorter, essentials version of Development Through the Lifespan , Seventh Edition, covers the same topics and contains the same number of chapters, but presents only the essential information, with an exceptionally strong emphasis on applications. Exploring Lifespan Development also includes all the great features Berk ' s texts are known for — an engaging writing style, exceptional multicultural and cross-cultural focus, rich examples, the most up-to-date research, and practical applications that help students relate the subject to their personal and professional lives. All print formats are available for pre-order now with publication set for late July. E-book formats will be available for purchase in mid-July with prices starting at \$72.00 for a 180-day rental.

A practically focused guide to effective counseling of all clients Human Development Across the Life Span is a practical guide to human growth and development, moving beyond theory to include real-world applications for counselors who work with clients. Written by recognized authorities in mental health counseling and counselor education, this book is fully aligned with the American Counseling Association's accreditation standards and includes contributions by well-known and respected academics and practitioners. Based on an extensive review of course syllabi across CACREP-accredited programs, this book is organized to follow the way courses are typically taught and follows a consistent structure including pedagogical elements that help students learn. After a thorough examination of essential concepts and theories of life span development, the book moves through each stage of human growth and development to provide expert insight, short case studies, and practical applications to counseling. The full Instructor's package provides a useful set of tools, including a Respondus test bank, PowerPoint slides, and an Instructor's Manual. This book is the only text on human growth and development that emphasizes the key implications and applications for counselors, providing useful information and the insights of real experts in each subject area. Understand the

developmental milestones at each life stage Appreciate clients' perspectives to better facilitate appropriate interventions Work more effectively with clients of any age, from toddlers to seniors Tailor your approach to meet the unique needs and abilities of each life stage As a counselor, you cannot approach a child's therapy the same way you approach an adult's. Even within each major category, each developmental stage includes a nuanced set of characteristics that, considered appropriately, will inform a more effective treatment plan. Human Development Across the Life Span is a comprehensive guide to understanding all of your clients, and providing the type of counseling that facilitates more positive outcomes.

How can we make sense of change and stability through the lifespan of human development? What role does personal experience, our relationships with others, and historical and sociocultural contexts play in shaping these changes? This is the first book to offer an integrative overview of the range of developmental transitions which occur through the lifespan. Bringing together different theoretical and conceptual perspectives and a broad range of empirical research including quantitative and qualitative approaches, this book encompasses a range of complex transitional forms. Covering topics such as health transitions, transitions in friendships and romantic relationships, career transitions, and societal transitions, this book takes the reader beyond a focus on childhood and adolescence, to look at the whole lifespan. Reflecting a perspective that takes into account a sociocultural past and present, this book seeks to show how transitions can be viewed as both an experience of uncertainty and possibility. Transitions perform important functions and present psychosocial opportunities. Developmental Transitions is essential reading for all undergraduate and graduate students of developmental and cultural psychology and is also a valuable resource for academics and practitioner audiences interested in stability and change as people age.

This seventh edition comes with a significant revision of cognitive development through childhood, revised and updated chapters on adolescence, and more attention to emerging and early adulthood.

The Handbook of Life-Span Development, Volume 2

Transforming the Workforce for Children Birth Through Age 8

The combined features that distinguish this text from other titles can be summarized with an acronym: CARE Cutting edge research Applied developmental science Readability Essential knowledge Written by respected child, adolescent, and adulthood development experts, this authoritative and chronologically organized text presents an integrated perspective on lifespan development. The authors write in an engaging manner, synthesizing biological, social, cultural, and socioeconomic influences as opposed to organizing content around developmental themes. Incorporation of classic and cutting-edge research includes extensive coverage of new research in developmental neuroscience, which has transformed the study of lifespan development by introducing brain maturation. At the same time, the text emphasizes the application of developmental psychology to real world problems, focusing on the ways in which knowledge of child development can inform social policy and practice in the fields of child care, education, mental health, and family life. The text also examines the many fascinating changes that take place through adulthood to help students answer the important question: Who will I become tomorrow? And with a separate epilogue that focuses on death and dying, the book takes students on a developmental journey from our first breath to our last. Reflecting the authors' combined expertise, the broad array of real-life examples resonate with students from different backgrounds and fields of study, and with different occupational goals in mind. With its distinctive and effective combination of cutting-edge research, applications, readability, and essential knowledge, this text helps students understand and appreciate what today's scientists are discovering about human development across the lifespan, how they study the process, and how this knowledge can be used to improve the lives of infants, children, adolescents, and adults around the world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"This study guide is designed for use with The Developing Person Through the Life Span, Sixth Edition, by Katleen Stassen Berger. It is intended to help students evaluate their understanding of that material, and to review any problem areas. [Sections such as] 'How to Manage Your Time Efficiently,' 'Study more effectively', and 'Think Critically' provide detailed instructions on how to use the textbook. Each chapter ... includes a Chapter Overview, a set of Guided Study questions, a Chapter Review section, and three review tests." --Preface.

With a chronological organization, Lifespan Development: Lives in Context, Third Edition follows three core themes: the centrality of context, the importance of research, and the applied value of developmental science. Tara L. Kuther 's clear, concise narrative guides students through current and classic studies and foundational theories while exploring real-world connections and inclusive perspectives.

Essentials of Life-Span Development

Human Development: A Life-Span View

An Integrative Approach

Applied Positive Psychology

Nonnormative Life Events

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government

agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

This volume offers a comprehensive and conceptually integrated overview of the changing biological, psychological, and social/environmental influences on health and illness from the prenatal period through infancy, childhood, adolescence, and adulthood. Based on the premise that protective and risk factors vary with life stage, several chapters examine the development of major biological systems and the changing role of genetics and environment over time. In addition, they provide information on environmental influences during the prenatal period and early childhood, chronic illness in childhood, and health and health risks in adolescence. Chapters on adulthood give special emphasis to mid-life transitions in health, resiliency in later life, and the impact of caregiving on health. Final chapters focus on death and dying and on an integrative model of health and illness across the life span.
