**Problems in Second Language Acquisition**

**Face2face Upper Intermediate Student's Book with DVD-ROM**

Second language acquisition has an identity problem. It is a young field struggling to emerge from the parent fields of education and applied linguistics. In his new book, Problems in Second Language Acquisition, Mike Long proposes a way to help second language acquisition develop a systematic and coherent focus using the philosophy of science as the lens. The volume is neatly organized into three parts--theory, research, and practice. This structure allows a focus on areas of SLA of interest to many in the field. These include theory proliferation and comparative theory evaluation; the Critical Period Hypothesis and negative feedback; and the practice of "synthetic" language teaching. The controversial volume will be of interest to researchers, educators, and graduate students in second language acquisition, applied linguistics, TESOL, and linguistics programs. It may be recommended as additional reading for an introductory SLA course in order to stimulate class discussions. Life is an exciting new six-level adult series that turns learning English into an exploration of the world we live in by drawing on National Geographic content such as images, articles and videos.
