NOW AN EMMY-NOMINATED HULU ORIGINAL SERIES • NEW YORK TIMES BESTSELLER • “A stunning novel about the transformative power of relationships” (People) from the author of Conversations with Friends, “a master of the literary page-turner” (J. Courtney Sullivan). ONE OF THE TEN BEST NOVELS OF THE DECADE—Entertainment Weekly TEN BEST BOOKS OF THE YEAR—People, Slate, The New York Public Library, Harvard Crimson AND BEST BOOKS OF THE YEAR—The New York Times, The New York Times Book Review, O: The Oprah Magazine, Time, NPR, The Washington Post, Vogue, Esquire, Glamour, Elle, Marie Claire, Vox, The Paris Review, Good Housekeeping, Town & Country Connell and Marianne grew up in the same small town, but the similarities end there. At school, Connell is popular and well liked, while Marianne is a loner. But when the two strike up a conversation—awkward but electrifying—something life changing begins. A year later, they’re both studying at Trinity College in Dublin. Marianne has found her feet in a new social world while Connell hangs at the sidelines, shy and uncertain. Throughout their years at university, Marianne and Connell circle one another, straying toward other people and possibilities but always magnetically, irresistibly drawn back together. And as she veers into self-destruction and he begins to search for meaning elsewhere, each must confront how far they are willing to go to save the other. Normal People is the story of mutual fascination, friendship and love. It takes us from that first conversation to the years beyond, in the company of two people who try to stay apart but find that they can’t. Praise for Normal People “[A] novel that demands to be read compulsively, in one sitting.”—The Washington Post “Arguably the buzziest novel of the season, Sally Rooney’s elegant sophomore effort . . . is a worthy successor to Conversations with Friends. Here, again, she unflinchingly explores class dynamics and young love with wit and nuance.”—The Wall Street Journal “[Rooney] has been hailed as the first great millennial novelist for her stories of love and late capitalism. . . . [She writes] some of the best dialogue I’ve read.”—The New Yorker

A history of the cartoonists and illustrators from the Connecticut School, written by the son of the artist behind the popular strips "Prince Valiant" and "Big Ben Bolt," explores the achievements and pop-culture influence of these artists in the aftermath of World War II.

Their Eyes Were Watching God is a 1937 novel by African-American writer Zora Neale Hurston. It is considered a classic of the Harlem Renaissance of the 1920s, and it is likely Hurston's best known work. From the Pulitzer Prize-winning author of All the Light We Cannot See, perhaps the most bestselling and beloved literary fiction of our time, comes a triumph of imagination and compassion, a soaring novel about children on the cusp of adulthood in a broken world, who find resilience, hope, and story. The heroes of Cloud Cuckoo Land are trying to figure out the world around them: Anna and Omeir, on opposite sides of the formidable city walls during the 1453 siege of Constantinople; teenage idealist Seymour in an attack on a

public library in present day Idaho; and Konstance, on an interstellar ship bound for an exoplanet, decades from now. Like Marie-Laure and Werner in *All the Light We Cannot See*, Anna, Omeir, Seymour, and Konstance are dreamers and outsiders who find resourcefulness and hope in the midst of peril. An ancient text—the story of Aethon, who longs to be turned into a bird so that he can fly to a utopian paradise in the sky—provides solace and mystery to these unforgettable characters. Doerr has created a tapestry of times and places that reflects our vast interconnectedness—with other species, with each other, with those who lived before us and those who will be here after we’re gone. Dedicated to “the librarians then, now, and in the years to come,” *Cloud Cuckoo Land* is a hauntingly beautiful and redemptive novel about stewardship—of the book, of the Earth, of the human heart.

Yoga therapy holds the key to effectively addressing stress and lifestyle diseases. Conventional medicine is useful for alleviating symptoms, but yoga therapy that is grounded in traditional theory identifies and addresses causes deeper than the physical body. Yoga therapy practices build resistance to stress and increase resilience. Kazuo Keishin Kimura is a Raja Yoga Acharya who has devoted himself to making traditional yogic wisdom accessible in Japan. With this English translation of his book, he hopes to contribute internationally to yoga therapy's development as a respected modality. In this book, Kimura points out how traditional yoga theory is missing from modern-day yoga instruction. He then explains traditional yoga's view of the mind-body complex as five koshas (sheaths), each with specific functions and attributes. Just as medical doctors examine patients before deciding on treatment, yoga therapists must obtain informed consent and assess the conditions of all koshas. Understanding yoga's horse-drawn chariot metaphor for human structure and function is also helpful to see beyond symptoms and to identify root causes of disease. Kimura skillfully guides readers to understand these two theories of human structure and function, and illustrates how they can be incorporated into both yoga therapy assessment and practice.

On the horizons of many warring tribes, Roman warriors, knights from chivalric orders and the devoted penniless appeared on a

divine mission ready to conquer with an appetite for destruction, salvation and a higher purpose. Pax Romana. Had the world ever seen the magnitude of empires as it did in the Roman Empires that would unhinge themselves from their very foundation in their attempt to dominate over kings, lords, and tribes? What caused the Romans to proclaim themselves worthy of answering a seemingly providential call to spread the Roman way? This is the story of their shifting identity over the course of a mind-boggling history in their steep ascents and defiant schisms transfixed with glory and virtue that lasted for thousands of years. It is the story of Rome's lingering origin and Rome's spirit of conquest as their enemies encircled them. The perilous protection they would offer to a papacy, besieged by perpetual land grabs of powerful nobles and distant tribes, was often compromised by their own faults, negligence and the nature of where their empire stopped and their Romanness began. They fought their own with just as much fervor as those who appeared at their fronts. Did their very spirit and ascent imperil that which united them, dividing them, as the world around them embraced or rejected their very foundation?

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

This book is a humble tribute to Edward Gibbon, whose 'History of the Decline and Fall of the Roman Empire' is one of the greatest historical works ever written. (Introduction)

Greenhouse gas emissions by the livestock sector could be cut by as much as 30 percent through the wider use of existing best practices and technologies. FAO conducted a detailed analysis of GHG emissions at multiple stages of various livestock supply chains, including the production and transport of animal feed, on-farm energy use, emissions from animal digestion and manure decay, as well as the post-slaughter transport, refrigeration and packaging of animal products. This report represents the most

comprehensive estimate made to-date of livestock contribution to global warming as well as the sectors potential to help tackle the problem. This publication is aimed at professionals in food and agriculture as well as policy makers.

Studying from the Mycenaean to the late Hellenistic period, this work includes new articles by twenty-seven specialists of ancient Greece, and presents an examination of the Greek cultures of mainland Greece, Asia Minor, Egypt and Italy. With the chapters sharing the theme of social history, this fascinating book focuses on women, the poor, and the slaves – all traditionally seen as beyond the margins of power and includes the study of figures who were on the literal margins of the Greek world. Bringing to the forefront the research into areas previously thought of as marginal, Anton Powell sheds new light on vital topics and authors who are central to the study of Greek culture. Plato's reforms are illuminated through a consideration of his impatient and revolutionary attitude to women, and Powell also examines how the most potent symbol of

central Greek history – the Parthenon – can be understood as a political symbol when viewed with the knowledge of the cosmetic techniques used by classical Athenian women. The Greek World is a stimulating and enlightening interaction of social and political history, comprehensive, and unique to boot, students will undoubtedly benefit from the insight and knowledge it imparts.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

After defeating enemies in battle, Roman citizens celebrate in the streets as Julius Caesar and his entourage make their way through the city. As Caesar passes a soothsayer, he receives an ominous warning: “ Beware the ides of March, ” which he immediately disregards. Meanwhile, some of his closest followers are convinced

their leader has become too powerful and plot his removal. Plutarch ' s Lives of the Noble Grecians and Romans was Shakespeare ' s primary source for Julius Caesar. This Standard Ebooks edition is based on William George Clark and William Aldis Wright ' s 1887 Victoria edition, which is taken from the Globe edition. This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

From the international bestselling author of Bel Canto and Commonwealth, Ann Patchett, and the bestselling

illustrator of the Fancy Nancy series, Robin Preiss Glasser, comes a hilarious children's story about a slide made just for lambs. Nicolette Farmer is running for class president, and the rest of the Farmer family tells her she'll win by a landslide. A pack of overconfident lambs mistakenly hear lambslide and can't believe there's a slide made just for them. But when they can't find one on the farm, there's only one thing left to do: take a vote! They campaign. They bargain. They ask all the other animals if they, too, would like a lambslide. Will the lambs ever get their special slide? Find out in this epic collaboration between Patchett and Glasser, who create the perfect children's book.

Shadow of the Silk Road records a journey along the greatest land route on earth. Out of the heart of China into the mountains of Central Asia, across northern Afghanistan and the plains of Iran and into Kurdish Turkey, Colin Thubron covers some seven thousand miles in eight months. Making his way by local bus, truck, car, donkey cart and camel, he travels from the tomb of the Yellow Emperor, the mythic progenitor of the Chinese people, to the ancient port of Antioch—in perhaps the most difficult and ambitious journey he has undertaken in forty years of travel. The Silk Road is a huge network of arteries splitting and converging across the breadth of Asia. To travel it is to trace the passage not only of trade and armies but also of ideas, religions and inventions. But alongside this rich and astonishing past, Shadow of the Silk Road is also about Asia today: a continent of upheaval. One of the trademarks of Colin Thubron's travel writing is the beauty of his prose; another is his gift for talking to people and getting them to talk to him. Shadow of the Silk Road encounters Islamic countries in many forms. It is about changes in China, transformed since the Cultural Revolution. It is about false nationalisms and the world's discontented margins, where the true boundaries are not political borders but the frontiers of tribe, ethnicity, language and religion. It is a magnificent and important account of an ancient world in modern ferment.

Raised by their aunt in a remote coastal town, Annat and Malchik have always been protected from the hostile world that surrounds them. It is now time for them to find their own way. To become true wanderers. Reunited with their father, they embark on a remarkable train journey that will take them to the frozen lands of the north. Shortly after their arrival in the town of Gard Ademar, it becomes apparent that dark forces are at work. A series of apparently senseless murders have terrified the townspeople, threatening the construction of a new tunnel. It is a mystery that will draw them into the magical kingdom of La Souterraine. A place where only a shamam can hope to survive.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues. The very idea of empire was created in ancient Rome and even today traces of its monuments, literature, and institutions can be found across Europe, the Near East, and North Africa--and sometimes even further afield. In Rome, historian Greg Woolf expertly recounts how this mammoth empire was created, how it was sustained in crisis, and how it shaped the world of its rulers and subjects--a story spanning a millennium and a half of history. The personalities and events of Roman history have become part of the West's cultural lexicon, and Woolf provides brilliant retellings of each of these, from the war with Carthage to Octavian's victory over Cleopatra, from the height of territorial expansion under the emperors Trajan and Hadrian to the founding of Constantinople and the barbarian invasions which resulted in Rome's ultimate collapse. Throughout, Woolf carefully considers the conditions that made Rome's success possible and so durable, covering topics as diverse as ecology, slavery, and religion. Woolf also compares Rome to other ancient empires and to its many later imitators, bringing into vivid relief the Empire's most distinctive and enduring features. As Woolf demonstrates, nobody ever planned to create a state that would last more than a millennium and a half, yet Rome was able, in the end, to survive barbarian migrations, economic collapse and even the conflicts between a series of world religions that had grown up within its borders, in the process generating an image and a myth of empire that is apparently indestructible. Based on new research and compellingly told, this sweeping account promises to eclipse all previously published histories of the empire.

With this classic book, Sir Ronald Syme became the first historian of the twentieth century to place Sallust -- whom Tacitus called the most brilliant Roman historian -- in his social, political, and literary context. Scholars had considered Sallust to be a mere political hack or pamphleteer, but Syme's text makes important connections between the politics of the Republic and the literary achievement of the author to show Sallust as a historian unbiased by partisanship. In a new foreword, Ronald Mellor delivers one of the most thorough biographical essays of Sir Ronald Syme in English. He both places the book in the context of Syme's other works and details the progression of Sallustian studies since and as a result of Syme's work.

This is the HARDBACK version. Among the top child stars of the 1930s and 1940s was a former stable boy from southern India, the only star with a single name - Sabu. Born Selar Shaik in 1924, he vaulted to stardom in his first film, a British production entitled *Elephant Boy* (1937). For the next decade he either starred or was featured in several finely crafted adventure films, including the fantasy favorite *The Thief of Bagdad* (1940) and the definitive version of Rudyard Kipling's perennially popular *Jungle Book* (1942). Adapting to modern western ways proved remarkably easy due to his above average intelligence and innate charm. After moving to America, the popular performer became a U.S. citizen in 1944, and did his bit for the war effort as a belly gunner, seeing action in the Pacific theater. In the post-war years Sabu's career began its inevitable decline. Fantasy and exotic adventure films were not as popular as during the war, and Hollywood studios found the dark-skinned actor difficult to cast. In the early 1950s he journeyed to Europe, appearing in a pair of Italian films and two circuses. Sabu next made a triumphant return to his homeland where he acted in one film and tested for another. Returning to America, the still young actor was seen in some minor films and one final foreign film made in Germany. After appearing in a Disney film, India's first and most enduring international movie star passed away suddenly of a heart attack in December 1963, leaving behind an exceptional legacy of memorable motion pictures and an image of radiant youthfulness.

The *State of the World's Land and Water Resources for Food and Agriculture* is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

The Oxford History of Byzantium is the only history to provide in concise form detailed coverage of Byzantium from its Roman beginnings to the fall of Constantinople and assimilation into the Turkish Empire. Lively essays and beautiful illustrations portray the emergence and development of a distinctive civilization, covering the period from the fourth century to the mid-fifteenth century. The authors - all working at the cutting edge of their particular fields - outline the political history of the Byzantine state and bring to life the evolution of a colourful culture. In AD 324, the Emperor Constantine the Great chose Byzantium, an ancient Greek colony at the mouth of the Thracian Bosphorus, as his imperial residence. He renamed the place 'Constantinopolis nova Roma', 'Constantinople, the new Rome' and the city (modern Istanbul) became the Eastern capital of the later Roman empire. The new Rome outlived the old and Constantine's successors continued to regard themselves as the legitimate emperors of Rome, just as their subjects called themselves Romaioi, or Romans long after they had forgotten the Latin language. In the sixteenth century, Western humanists gave this eastern Roman empire ruled from Constantinople the epithet 'Byzantine'. Against a backdrop of stories of emperors, intrigues, battles, and bishops, this Oxford History uncovers the hidden mechanisms - economic, social, and demographic - that underlay the history of events. The authors explore everyday life in cities and villages, manufacture and trade, machinery of government, the church as an instrument of state, minorities, education, literary activity, beliefs and superstitions, monasticism, iconoclasm, the rise of Islam, and the fusion with Western, or Latin, culture. Byzantium linked the ancient and modern worlds, shaping traditions and handing down to both Eastern and Western civilization a vibrant legacy.

Constantine the Great moved the seat of Roman power to Constantinople in AD 330 and for eleven brutal, bloody centuries, the Byzantine Empire became a beacon of grand magnificence and depraved decadence . . . Here then are the centuries dominated by ferocious arguments over the nature of Christ and his Church. By knowledge, where scholars and scribes preserved the heritage of the ancient world. By emperors like Justinian the Great and Basil the Bulgar-Slayer - men pious, heroic or monstrous. By creativity, as art and architecture soared to new heights. In this abridgement of his celebrated trilogy, John Julius Norwich provides the definitive introduction to the savage, scintillating world of Byzantium. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research.
