Mastering Genealogical Proof

Planting Your Family Tree Online is designed to take you step-by-step through the process of creating a genealogy Web site. When people begin their genealogical adventure, they usually interview elderly members of the family and contact other family members. The next step is usually one of organization of the information collected. The third step is usually to share this information with other family members, traditionally by publishing research in a book. However, a family Web site has numerous advantages: It is interactive so others can contribute their stories and pictures. It will help you find long-lost relatives. It is an ideal way to preserve research for the entire family. It will break down the walls that have stumped you in your research. It recognizes that family research is an ongoing process. This book is written by Cyndi Howells, owner and webmaster of Cyndi's List, a Web site of more than 130,000 online genealogical resources. Cyndi points out, "This book is loaded with URLs to Web sites that will give you everything you need to create a beautiful family tree online." However, Web site URLs change daily and some may no longer work. She has created web pages as part of Cyndi's List that correspond to the features of the book so that the URLs will be kept up-to-date.

Barbara Alpern Engel's Marriage, Household and Home in Modern Russia is the first book to explore the intricacies of domestic life in Russia across the modern period. Surveying the period from 1700 right up to the present day, the book explores the marital and domestic arrangements of Russians at multiple levels of society and the impact of broader historical developments, including war and revolution, upon them. It also traces the evolution of marriage, household and home as institutions over three centuries, whilst also highlighting the inter-relationship between public policy and private life, in what is a wholly original historical assessment of domesticity in modern Russia. In the process, the author expertly synthesizes the key works, arguments and discussions in the field, mapping out the historiographical landscape of this compelling aspect of Russian social history. Marriage, Household and Home in Modern Russia is crucial reading for any student or scholar of modern Russian history.

Gill Blanchard's practical step-by-step guide to writing a family history is designed for anyone who wants to bring their ancestors' stories to life. Her book provides examples to help readers find their own writing style, deal with family stories, missing pieces of information and anomalies. It also offers advice on key aspects of composition, such as adding local and social history context and using secondary material. The focus throughout is on how to develop a story from beginning to end. Exercises are a key feature of the text. There is guidance on the various formats a family history can take and how to choose the appropriate one, with examples of format and layout. A recent Maritz Poll reported that 60% of Americans are interested in their family history. And with good reason. Through genealogy, you can go back into history to meet people who have had more influence on your life than any others -- your ancestors. And the better you get to know your ancestors, the better you will get to know yourself: the who's and what's and why's of you. Barbara Renick, a nationally-known lecturer on genealogy, tells the uninitiated researcher the steps needed to find out who their ancestors really were, and brings together for even the more experienced genealogical researchers the important principles and practices. She covers such topics as the importance of staying organized and how to go about it; where and how to look for information in libraries, historical societies, and on the internet; recognizing that just because something is in print doesn't mean it's right; and how to prepare to visit the home where your ancestors lived. Genealogy 101 is the first book to read when you want to discover who your ancestors were, where they lived, and what they did.

"A fascinating exploration of the mysteries ignited by DNA genealogy testing—from the intensely personal and concrete to the existential and unsolvable." —Tana French, New York Times author You swab your cheek or spit in a vial, then send it away to a lab somewhere. Weeks later you get a report that might tell you where your ancestors came from or if you can't, the report could reveal a long-buried family secret that upends your entire sense of identity. Soon a lark becomes an obsession, a relentless drive to find answers to questions at the heart of "Who am I?" and "Where did I come from?" Welcome to the age of home genetic testing. In *The Lost Family*, journalist Libby Copeland investigates what happens when we embark on an experiment with little understanding of the ramifications. She explores the culture of genealogy buffs, the science of DNA, and the business of companies like Ancestry and 23andMe. The story of one woman, her unusual results, and a relentless methodical drive for answers that becomes a thoroughly modern genetic detective story. Gripping and masterfully told, *The Lost Family* is a spectacular book on a big, timely subject. "An urgently necessary, powerful book that addresses one of the most complex social and bioethical issues of our time." —Dani Shapiro, *New York Times*-bestselling author "Before you spit in that vial, read this book." —*The New York Times Book Review* "Impeccably researched . . . up-to-the-minute science meets the philosophy in a poignant, engaging debut." —*Kirkus Reviews* (starred review)

This is the world's first-ever 12 generation family tree notebook! This antique-style book has room for you to record the first 4,095 people in your family line. Create a valuable heirloom while documenting your genealogy research!

Writing a family history does not have to be an overwhelming task. This book outlines a simple process that will aid your research and create pages of information that can be read and understood by all family members. Your research will become faster and more accurate and your family can enjoy the family history. Remember, our writing should go beyond finding documents and filling in charts. Hopefully, the methods discussed in this book will show the reader a simple format that will make this task much easier. You may be reluctant to write down these stories because you do not consider yourself a writer. Our ancestors were ordinary people. Why should we write about them? All of our immigrant ancestors contributed to America's history and their stories should be saved for our grandchildren. Our family histories should give clues of their roles and this will help us understand our roots.

Maeve O'Riordan opens the doors of the country house (or the big house as it is often referred to) in Ireland to reveal the lives of women among the Irish ascendancy. Drawing on personal records from twelve different families, the reader is provided with unprecedented insights into the female experience among the privileged landed class at a time of social upheaval in Ireland. Space is given to these women's voices as they navigated the limited roles available to women at the time. Unmarried women are not excluded and their efforts at forging careers and identities outside the home are also uncovered. Though their names are now forgotten, women like Mabel O'Brien - who was depicted as wife, mother and society woman in her husband Dermot's painting The Jewel (pictured on the front) - contributed to the public success of their families through their dutiful, private roles. Their marriages forged important social links and their commitment to home duties ensured that the family residence was a centre of prestige. Women of the Country House in Ireland will appeal to anyone interested in the history of women or the ascendancy. It invites you to step into the country houses of Ireland and, for the first time, to get to know the women who lived within their grand drawing rooms before the onset of the First World War and the Irish War of Independence.

Questions about who we are, who we can be, and who is like and unlike us underpin a vast range of contemporary social issues. What makes our families so important to us? Why do we attach such significance to being ourselves? Why do so many television programmes promise to revolutionise our lives? Who are we

really? In this highly readable new book, Steph Lawler examines a range of important debates about identity. Taking a sociological perspective, she shows how identity is produced and embedded in social relationships, and worked out in the practice of peoples everyday lives. She challenges the perception of identity as belonging within the person, arguing instead that it is produced and negotiated between persons. Chapter-by-chapter her book carefully explores topics such as the relationships between lives and life-stories, the continuing significance of kinship in the face of social change, and how taste works to define identity. For Lawler, without understanding identity, we can't adequately begin to understand the social world. This book will be essential reading on upper-level courses across the social sciences that focus on the compelling issues surrounding identity.

A provocative and timely case for how the science of genetics can help create a more just and equal society In recent years, scientists like Kathryn Paige Harden have shown that DNA makes us different, in our personalities and in our health—and in ways that matter for educational and economic success in our current society. In *The Genetic Lottery*, Harden introduces readers to the latest genetic science, dismantling dangerous ideas about racial superiority and challenging us to grapple with what equality really means in a world where people are born different. Weaving together personal stories with scientific evidence, Harden shows why our refusal to recognize the power of DNA perpetuates the myth of meritocracy, and argues that we must acknowledge the role of genetic luck if we are ever to create a fair society. Reclaiming genetic science from the legacy of eugenics, this groundbreaking book offers a bold new vision of society where everyone thrives, regardless of how one fares in the genetic lottery.

Genealogists and other historical researchers have valued the first two editions of this work, often referred to as the genealogist's bible." The new edition continues that tradition. Intended as a handbook and a guide to selecting, locating, and using appropriate primary and secondary resources, *The Source* also functions as an instructional tool for novice genealogists and a refresher course for experienced researchers. More than 30 experts in this field--genealogists, historians, librarians, and archivists--prepared the 20 signed chapters, which are well written, easy to read, and include many helpful hints for getting the most out of whatever information is acquired. Each chapter ends with an extensive bibliography and is further enriched by tables, black-and-white illustrations, and examples of documents. Eight appendixes include the expected contact information for groups and institutions that persons studying genealogy and history need to find. ""

Sociological Perspectives

This Special Issue of Genealogy explores the topic of "Intergenerational Trauma and Healing". Authors examine the ways in which traumas (individual or group, and affecting humans and non-humans) that occurred in past generations reverberate into the present and how individuals, communities, and nations respond to and address those traumas. Authors also explore contemporary traumas, how they reflect ancestral traumas, and how they are being addressed through drawing on both contemporary and ancestral healing approaches. The articles define trauma broadly, including removal from homelands, ecocide, genocide, sexual or gendered violence, institutionalized and direct racism, incarceration, and exploitation, and across a wide range of spatial (home to nation) and temporal (intergenerational/ancestral and contemporary) scales. Articles also approach healing in an expansive mode, including specific individual healing practices, community-based initiatives, class-action lawsuits, group-wide reparations, health interventions, cultural approaches, and transformative legal or policy decisions. Contributing scholars for this issue are from across disciplines (including ethnic studies, genetics, political science, law, environmental policy, public health, humanities, etc.). They consider trauma and its ramifications alongside diverse mechanisms of healing and/or rearticulating self, community, and nation.
