This book will guide you on a life-changing path to radically shift your health and love your body more. Raupp posits that the rampant rise in autoimmune illness is due to three co-existing factors: body disconnect (a loss of connection to the spiritual, emotional, and physical aspects of self, resulting in systemic body chaos), behavioral sabotage

(where deep-rooted beliefs negatively dictate your behavior, which dictates your health), and environmental toxins (exposure to external disease-promoting elements). As you follow Raupp's two-phase Body Belief diet and Body Belief lifestyle roadmap, your health will begin to thrive, both inside and out. *Dr. Attila Toth's thirty years as a practicing infertility specialist and pathologist have convinced him that the only explanation for the alarming infertility rate, so far out of proportion with natural law, is the increasing presence of contaminating bacteria in the genital tracts of both sexes. In *Fertility vs. Infertility*, he documents how and why this process has escalated so dramatically over the past few decades of increased sexual activity.*

presents his groundbreaking, noninvasive, nutritionally based method, which increases ovulation, reduces miscarriage, and significantly improves your chances of successfully getting and staying pregnant. Dr. Groll's specialized research has proven that there is a powerful link between a body's insulin resistance and fertility problems. Resistance to insulin increases the body's insulin levels, hindering normal ovulation either by limiting the maturation process of the released egg or by preventing ovulation altogether. High insulin levels can also impede the fertilized egg's ability to attach to the uterus, leading to implantation failure and miscarriage. In fact, women with insulin resistance problems are four to five times as likely as other women to suffer miscarriages -- meaning they have as high as a 50 percent chance of miscarriage. Dr. Groll has developed an insulin-reducing diet based on balancing protein and complex carbohydrate intake to create insulin levels most conducive to ovulation. He combines his nutritional plan -- which includes nutritional charts, food suggestions, and recipes -- with a specific exercise program that enhances insulin metabolism and an emotional support system that you can draw on during your quest to become parents. This three-pronged approach increases the rates of spontaneous ovulation and significantly improves the uterine environment, decreasing the potential for miscarriage. One in every ten couples in America is affected by infertility. Yet, only 5 to 10 percent of patients actually need high-tech procedures such as in vitro fertilization. The first 40 days after the birth of a child offer an essential and fleeting period of rest and recovery for the new mother. Based on author Heng Ou's own postpartum experience with zuo yuezi, a set period of "confinement," in which a woman remains at home focusing on healing and bonding with her baby, The First Forty Days revives the lost art of caring for the mother after birth. As modern mothers are pushed to prematurely "bounce back" after delivering their babies, and are often left alone to face the physical and emotional challenges of this new stage of their lives, the first forty days provide a lifeline—a source of connection, nourishment, and guidance. The book includes 60 simple recipes for healing soups; replenishing meals and snacks; and calming and lactation-boosting teas, all formulated to support the unique needs of the new mother. In addition to the recipes, this warm and encouraging guide offers advice on arranging a system of help during the postpartum period, navigating relationship challenges, and honoring the significance of pregnancy and birth. The First Forty Days, fully illustrated to feel both inspiring and soothing, is a practical guide and inspirational read for all new mothers and mothers-to-be—the perfect ally during the first weeks with a new baby.

future too. So here it is, our journey to a rainbow. A story of fertility, trying again and, above all, hope.' After the death of her three-day-old son Teddy in 2016, Elle Wright never expected what came next - that the path to bringing home a living child could be so winding. Elle's loss was followed by three and a half years of endless waiting. She and her husband waited for test results, hospital appointments and so many new procedures to help with their experience of secondary infertility. This wait included friends announcing their happy news whilst Elle was experiencing three rounds of IVF and the loss of three more babies. Months and years slipped by, of immense physical and emotional toll, and still those two lines were just out of reach. Faced with constant questions, drugs, negative tests, tears, loss, frustration and so many more tears, throughout it all Elle managed to still believe that one day it would happen for her, somehow... A Bump in the Road reflects the reality of becoming a parent for thousands of people like Elle who have difficulty conceiving in the UK today. It captures Elle's journey to a rainbow, comforting through her beautifully written words with a story of fertility that might just reflect yours, too.
