of reporting. Through several expert contributions, conducted both with qualitative and quantitative methodologies, this book provides an up-to-date portrait of the debate by exploring corporate NFD either in its mandated contents or voluntary information. Contributing authors provide studies that encompass the different lines of NFD, namely non-financial risk reporting, sustainability reporting, and intellectual capital reporting, as well as the integration of financial and non-financial information through IR, the assurance of the NFD and IR through auditing activities, and the role of management and CFOs in NFD and IR. to operating performance, and ties all of this to the current business environment. Today's managers, whether supervisors or senior executives, are expected to understand and use financial and operational measures, prepare and utilize budgets, respond to inquiries about the financial consequences of actions taken by them or by their department or team, and understand and use financial and accounting terminology—the common language of business measurement. Written in a conversational, easy-to-understand tone, the course treats finance and accounting from the perspective of users of financial information—it enhances their ability to communicate effectively with subordinates, other managers, senior executives, and accounting and finance professionals. It offers managers the ability to use and analyze financial information to improve the performance of
