*While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.*

*Gain a solid foundation in the core accounting concepts as you develop a true appreciation for why accounting is important to business and a prosperous society with Warren/Reeve/Duchac's CORPORATE FINANCIAL ACCOUNTING, 14E. This latest edition clearly demonstrates how accounting is more than just data and black and white rules. Instead, you see how accounting provides key information used to make critical business decisions. A new chapter schema provides context that emphasizes how each chapter's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture throughout the text by connecting journal entries to the accounting equation. Readers also gain critical practice in making business decisions. Financial Accounting, Global Edition

CCH's Governmental GAAP Practice Manual demonstrates in a detailed manner how a governmental entity can implement the complex standards established by GASB-34 and beyond through a worksheet approach. (A companion publication, Governmental GAAP Guide, discusses financial accounting and reporting standards necessary to prepare the basic external financial statements of a governmental entity.) The emphasis of Governmental GAAP Practice Manual is on the process of preparing financial statements. Chapter 1 of the Governmental GAAP Practice Manual provides a detailed analysis of the interrelationship of the two bases of accounting and measurement focuses. Numerous transactions that governmental entities experience must first be recorded on the modified accrual basis and current financial resources focus (for presentation in the governmental fund financial statements) and then converted to the accrual basis and economic resources focus (for presentation in the government-wide financial statements). Included in Chapter 1 is a comprehensive checklist of transactions and events that typically require a worksheet conversion entry. An understanding of these entries will provide a governmental accountant with a basis for analyzing unique and complex transactions and then converting their initial recording on the modified accrual basis to the accrual basis. Starting in Chapter 2 is a comprehensive illustration that continues through the remaining chapters of the product. For governmental funds, a variety of transactions are illustrated and journalized in Chapter 2 through Chapter 6, which result in a year-end trial balance for each individual fund based on the modified accrual basis of accounting and current financial resources measurement focus. In Chapter 14 these trial balances are used as the basis for developing the information needed to prepare the fund financial statements.

Chapter 16 illustrates the reconciliation for converting the information related to governmental funds (modified accrual basis and current financial resources focus) to information that is needed for the governmental activities column of the government-wide financial statements (accrual basis and economic resources focus). A similar approach is used for proprietary funds (Chapter 7 and Chapter 8) and fiduciary funds (Chapter 9 through Chapter 13): Illustrative entries are developed for each of the funds, and the resulting trial balances become the basis for preparing fund financial statements (Chapter 13) and the business-type activities column of the government-wide financial statements (Chapter 14). However, because proprietary fund financial statements and the business-type activities column in the government-wide financial statements are presented on the same basis of accounting and measurement focus (accrual basis and economic resources focus), generally a conversion is not necessary for these funds and activities. In addition, because fiduciary funds are not presented in the government-wide financial statements, a conversion is not needed. In Chapter 16 the basic financial statements (including the fund financial statements and government-wide statements) are prepared based on the information developed in Chapter 13 and Chapter 14. Chapter 17 provides a summarized discussion of note disclosure concepts and a listing of the required note disclosures applicable to state and local government financial statements. For a detailed discussion, use of the Governmental GAAP Disclosures Manual is

preferred. Chapter 18 discusses and develops information related to management's discussion and analysis and other required supplementary information. Chapter 19 illustrates combining financial statements that are presented as part of supplementary information included in a governmental entity's Comprehensive Annual Financial Report. Chapter 20 provides the preparers of financial statements with an in-depth review of the statistical section of the CAFR. This book can be used in conjunction with the Governmental GAAP Update Service.

The emphasis of Governmental GAAP Practice Manual is on the process of preparing financial statements. Chapter 1 of the Governmental GAAP Practice Manual provides a detailed analysis of the interrelationship of the two bases of accounting and measurement focuses. Numerous transactions that governmental entities experience must first be recorded on the modified accrual basis and current financial resources focus (for presentation in the governmental fund financial statements) and then converted to the accrual basis and economic resources focus (for presentation in the government-wide financial statements). Included in Chapter 1 is a comprehensive checklist of transactions and events that typically require a worksheet conversion entry. An understanding of these entries will provide a governmental accountant with a basis for analyzing unique and complex transactions and then converting their initial recording on the modified accrual basis to the accrual basis. Starting in Chapter 2 is a comprehensive illustration that continues through the remaining chapters of the product. For governmental funds, a variety of transactions are illustrated and journalized in Chapter 2 through Chapter 6, which result in a year-end trial balance for each individual fund based on the modified accrual basis of accounting and current financial resources measurement focus. In Chapter 14 these trial balances are used as the basis for developing the information needed to prepare the fund financial statements. Chapter 16 illustrates the reconciliation for converting the information related to governmental funds (modified accrual basis and current financial resources focus) to information that is needed for the governmental activities column of the government-wide financial statements (accrual basis and economic resources focus). A similar approach is used for proprietary funds (Chapter 7 and Chapter 8) and fiduciary funds (Chapter 9 through Chapter 13): Illustrative entries are developed for each of the funds, and the resulting trial balances become the basis for preparing fund financial statements (Chapter 13) and the business-type activities column of the government-wide financial statements (Chapter 14). However, because proprietary fund financial statements and the business-type activities column in the government-wide financial statements are presented on the same basis of accounting and measurement focus (accrual basis and economic resources focus), generally a conversion is not necessary for these funds and activities. In addition, because fiduciary funds are not presented in the government-wide financial statements, a conversion is not needed. In Chapter 16 the basic financial statements (including the fund financial statements and government-wide statements) are prepared based on the information developed in Chapter 13 and Chapter 14. Chapter 17 provides a summarized discussion of note disclosure concepts and a listing of the required note disclosures applicable to state and local government financial statements. For a detailed discussion, use of the Governmental GAAP Disclosures Manual is preferred. Chapter 18 discusses and develops information related to management''s discussion and analysis and other required supplementary information. Chapter 19 illustrates combining financial statements that are presented as part of supplementary information included in a governmental entity''s Comprehensive Annual Financial Report. Chapter 20 provides the preparers of financial statements with an in-depth review of the statistical section of the CAFR. This book can be used in conjunction with the Governmental GAAP Update Service.*

***With the rise in the number of mergers and acquisitions taking place in today's business environment, there will undoubtedly be a rise in the number of bankruptcies. Completely updated, Bankruptcy and Insolvency Accounting, Seventh Edition, Volume 2 updates the most recent forms and exhibits as a result of the new Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (BAPCPA). The process of turning around a troubled business and restructuring its financial aspects is thoroughly described for controllers, CEOs, CFOs and CPAs with small businesses as clients.***

***The new eighth edition of Financial Accounting: Tools for Decision-Making, Canadian Edition by Kimmel, Weygandt, Kieso, Trenholm, Irvine and Burnley continues to provide the best tools for both instructors and students to succeed in their introductory financial accounting class. It helps students understand the purpose and use of financial accounting, whether they plan to become accountants or whether they simply need it for their personal life or career. The book's unique, balanced procedural and conceptual (user-oriented) approach, proven pedagogy and breadth of problem material has made Financial Accounting the most popular introductory text in Canada.***

*This hands-on text, paired with a powerful online teaching and learning environment offers students a practical set of tools for use in making business decisions based on financial information.*

*Craig Deegan's Financial Accounting Theory provides a concise approach while comprehensively covering both traditional and contemporary theories that have emerged as the practice of accounting has evolved. Social and environmental accountability and reporting issues are discussed in depth, along with coverage of critical perspectives, public sector accounting and fair value. Instructors and students value Financial Accounting Theory for its reader-friendly style using straightforward explanations and numerous practical examples. This new edition continues to follow this approach with the addition of \*NEW\* content focusing on how different perspectives of organisational responsibilities and 'accountabilities' impact the way accounting is performed, and the theories that different researchers choose to use/apply.*
