For courses in Introduction to Management Accounting. Get refreshed with Horngrn/Sundem/Stratton's Introduction to Management Accounting, Twelfth Edition. This best-selling text offers a relevant, real-world decision-making approach to management accounting. Students develop a solid understanding of costs and cost behavior and the use of cost information for planning and control decisions, not just inventory valuation. An exceptionally strong pedagogy and supplements package and flexible structure provide instructors with great latitude in choosing various combinations of breadth and depth, theory and procedures, simplicity and complexity. The Twelfth Edition now includes student-oriented real-world company examples such as Nantucket Nectars and McDonald's; new "Cognitive Exercises" and "Business First" boxes, new on-line courses, and tutorial software package resources, and a new CD-ROM series, "Mastering Accounting." This is the definitive textbook on strategic planning and management in health care organizations for those pursuing a career in health care in undergraduate, business, and medical schools, and ancillary health professions such as nursing or physician assistant, as well as for established health care professionals, including doctors, who are completing programs and degrees in business administration to prepare themselves for greater involvement in the management of health care delivery. This book features all the basic information on strategic planning and management within the unique context of organizations concerned with the delivery and financing of health care. It notes the singular strategic environment in health care, explaining the special procedures and options available to health care organizations, and providing real-life examples in the form of case studies.
