His Holiness Pope Benedict XVI has declared the year between Oct. 11, 2012 and Nov. 24, 2013 to be a "Year of Faith." Part of the purpose of this year is, in the words of the Pope, "to rediscover the content of the faith that is professed, celebrated, lived and prayed..." (Porta Fidei). Deepen your prayer life this year with this collection of meditations from the Holy Father's catechesis on prayer, offered since the spring of 2011 through his Wednesday audiences in St. Peter's Square. These addresses contain profound meditations on prayer as practiced by some of the great figures of history, beginning with Old Testament patriarchs and prophets, leading up to Jesus, our great model in prayer, and continuing on to the prayer of the disciples after the resurrection. The addresses collected in this volume (May 2011 to May 2012) reveal to the Christian in the modern world how he too can live by faith in the God who is always present. "In the upcoming catechesis [...] let us learn to live our relationship with the Lord even more intensely, as if it were a school of prayer." ~ Pope Benedict XVI

Turn your great idea into millions—without lifting a finger! Yes, a good idea is enough to build a fortune! Too many people think production, marketing, and distribution are essential to the entrepreneurial process. As *One Simple Idea* shows, you can hand these tasks off to others—and make big money in doing so. Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival.

Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Presenting more than two hundred of the greatest haiku ever written about the game. There are moments in every baseball game that make fans catch their breath: the pause while a pitcher looks in for the sign, the moment a cocksure rookie gets picked off first, or the instant a batter lashes a game-winning homer into the night sky, just before the sell-out crowd explodes onto its feet. Haiku captures these moments like no other poetic form, and Baseball Haiku captures the sights, the sounds, the smells, and the emotions of the game like no previous collection. Some of the most important haiku poets of both America and Japan are featured in this anthology; including Jack Kerouac, a longtime baseball fan who pioneered English-language haiku; Alan Pizzarelli, one of the top American haiku and senryu poets of the last thirty years; and Masaoka Shiki, one of the four great pillars of Japanese haiku—a towering figure—who was instrumental in popularizing baseball in Japan during the 1890s. With over two hundred poems spanning more than a century of ball playing, Baseball

Haiku reveals the intricate ways in which this enduring and indelible sport—which is played on a field, under an open sky—has always been linked to nature and the seasons. And just as a haiku happens in a timeless now, so too does Baseball Haiku evoke those unforgettable images that capture the actions and atmospheres of the national pastime: each poem resonates like the lonely sound of cleats echoing in the tunnel as a grizzled veteran leaves his final game. The largest collection of haiku and senryu on baseball ever assembled, Baseball Haiku is an extraordinary treasure for any true baseball fan.

Roger Ekirch illuminates the aspects of life most often overlooked by other historians—those that unfold at night. In this "triumph of social history" (*Mail on Sunday*), Ekirch's "enthraling anthropology" (*Harper's*) exposes the nightlife that spawned a distinct culture and a refuge from daily life. Fear of crime, of fire, and of the supernatural; the importance of moonlight; the increased incidence of sickness and death at night; evening gatherings to spin wool and stories; masqued balls; inns, taverns, and brothels; the strategies of thieves, assassins, and conspirators; the protective uses of incantations, meditations, and prayers; the nature of our predecessors' sleep and dreams—Ekirch reveals all

these and more in his "monumental study" (The Nation) of sociocultural history, "maintaining throughout an infectious sense of wonder" (Booklist).

Following the Pulitzer prize-winning collection Stag's Leap, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in

this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

In *A Divine Revelation of Heaven*, after thirty nights in which God gave her visions of the depths of hell and the punishments of the lost, Mary K. Baxter was shown for ten nights the glories of heaven--the home of redeemed souls.

Included in this book are her depictions of heaven's gates, angels, music, worship,

storehouses of blessings, joyful heavenly citizens, four living creatures, and brilliant throne of God. Mary also describes heaven's perfect order and purpose, what happens to children, and much more. These breathtaking glimpses of heaven, interspersed with applicable Bible verses, will turn your heart toward the beauty and joy that await every believer in Christ. In *A Divine Revelation of Hell*, over a period of thirty nights, God gave Mary K. Baxter visions of hell and commissioned her to tell people still alive on earth to reject sin and evil, and to choose life in Christ. Here is an account of the place and beings of hell contrasted with the glories of heaven. Follow Mary in her supernatural journey as she enters with Jesus into a gateway to hell and encounters the sights, sounds, and smells of that dark place of torment, including its evil spirits, cells, pits, jaws, and heart. Be an eyewitness to the various punishments of lost souls and hear their shocking stories. This book is a reminder that each of us needs to accept the miracle of salvation before it is too late--and to intercede for those who do not yet know Christ. Time is running out.

SystemVerilog is a Hardware Description Language that enables designers to work at

the higher levels of logic design abstractions that match the increased complexity of current day integrated circuit and field-programmable gate array (FPGA) designs. The majority of the book assumes a basic background in logic design and software programming concepts. It is directed at: * students currently in an introductory logic design course that also teaches SystemVerilog, * designers who want to update their skills from Verilog or VHDL, and * students in VLSI design and advanced logic design courses that include verification as well as design topics. The book starts with a tutorial introduction on hardware description languages and simulation. It proceeds to the register-transfer design topics of combinational and finite state machine (FSM) design - these mirror the topics of introductory logic design courses. The book covers the design of FSM-datapath designs and their interfaces, including SystemVerilog interfaces. Then it covers the more advanced topics of writing testbenches including using assertions and functional coverage. A comprehensive index provides easy access to the book's topics. The goal of the book is to introduce the broad spectrum of features in the language in a way that complements introductory and

advanced logic design and verification courses, and then provides a basis for further learning. Solutions to problems at the end of chapters, and text copies of the SystemVerilog examples are available from the author as described in the Preface.
