D.A.E. Research Report

*Cost Analysis is an emerging sub-discipline of Economics and Operations Research. This is the first collection of readings that spans the discipline. The contributions are both theoretical and applications oriented. This book is directed to researchers in Economics, Operations Research, Industrial Engineering, and Managerial Accounting. In particular, the book provides an overview of the types of problems that are of interest to cost researchers. These papers are a subset of the papers that were presented at the 1989 Joint National Meeting of the Institute of Cost Analysis and the National Estimating Society in Washington, D.C.*

*DCAA Contract Audit Manual*

*Eat Your Food! Gastronomical Glory from Garden to Gut*

*The American Exporter*

*An Evaluation of Cost Factors in the Production and Harvesting of Potatoes*

*Emergency Business Control Law Reports, Prices*

*The Code of Federal Regulations of the United States of America*

The Organic Medicinal Herb Farmer is the first book to be published on organic commercial herb farming, written by a successful, small-scale herb farmer husband-and-wife team located in Vermont. The few existing books on growing herbs are often inaccurate, and inapplicable to the small-scale market growers of medicinal herbs, focusing mainly on growing in your backyard. This book focuses on quality over quantity, keeping costs down by innovating with existing equipment, rather than expensive technology and overproduction. It will help people interested in commercial medicinal herb farming determine what and how to grow using ecologically sustainable techniques while still remaining profitable.
