

Flavia Fusion Instruction Manual

This book presents the latest advances in modeling and simulation for human factors research. It reports on cutting-edge simulators such as virtual and augmented reality, multisensory environments, and modeling and simulation methods used in various applications, including surgery, military operations, occupational safety, sports training, education, transportation and robotics. Based on two AHFE 2020 Virtual Conferences such as the AHFE 2020 Virtual Conference on Human Factors and Simulation and the AHFE 2020 Virtual Conference on Digital Human Modeling and Applied Optimization, held on July 16 – 20, 2020, the book serves as a timely reference guide for researchers and practitioners developing new modeling and simulation tools for analyzing or improving human performance. It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting field.

An amusing collection of 81 short, captivating short stories for young and adult learners. "I love City's work - and you will too!" - Barbara Oakley, PhD. Author of New York Times bestseller *A Mind for Numbers*
Short Stories in Italian for Beginners has been written especially for students from beginner to intermediate level, designed to give a sense of achievement, and most importantly - enjoyment! Mapped to A2-B1 on the Common European Framework of Reference, these eight captivating stories will both entertain you, and give you a feeling of progress when reading. 'What does this book give you?' - Eight stories in a variety of exciting genres, from science fiction and crime to history and thriller - making reading fun, while you learn a wide range of new vocabulary - Controlled language at your level, including the 1000 most frequent words, to help you progress confidently - Authentic spoken dialogues, to help you learn conversational expressions and improve your speaking ability - Pleasure! It's much easier to learn a new language when you're having fun, and research shows that if you're enjoying reading in a foreign language, you won't experience the usual feelings of frustration - 'It's too hard!' 'I don't understand!' - Accessible grammar so you learn new structures naturally, in a stress-free way Carefully curated to make learning a new language easy, these stories include key features that will support and consolidate your progress, including - A glossary for bolded words in each text - A bilingual word list - Full plot summary - Comprehension questions after each chapter. As a result, you will be able to focus on enjoying reading, delighting in your improved range of vocabulary and grasp of the language, without ever feeling overwhelmed or frustrated. From science fiction to fantasy, to crime and thrillers, Short Stories in Italian for Beginners will make learning Italian easy and enjoyable.

Do you watch professional sports with one eye on the game, and the other on the beautiful, glamorous and energetic cheerleaders? If you picked up this book, then you dream of cheering on the sidelines at a NFL®, NBA®, or other professional-level sporting event. This book will break down the pro dance team audition process to give you the courage and confidence to show up on the day of auditions, as well as critical success tips to help you get selected.

This book offers a global presentation of issues under study for improving science education research in the context of the knowledge-based society at a European and international level. It includes discussions of several theoretical approaches, research overviews, research methodologies, and the teaching and learning of science. It is based on papers presented at the Third International Conference of the European Science Education Research Association (Thessaloniki, Greece, August 2001).

Mapping Different Geographies

A Guide

Practical Aspects of Knowledge Management

Business Process Management Workshops

The Teaching of the Twelve Apostles

Towards a New Standard

This book provides an accessible but concise edited coverage of the main topics, tools and issues in virtual heritage.

Molecular Genetic Pathology, Second Edition presents up-to-date material containing fundamental information relevant to the clinical practice of molecular genetic pathology. Fully updated in each area and expanded to include identification of new infectious agents (H1N1), new diagnostic biomarkers and biomarkers for targeted cancer therapy. This edition is also expanded to include the many new technologies that have become available in the past few years such as microarray (AmpliChip) and high throughput deep sequencing, which will certainly change the clinical practice of molecular genetic pathology. Part I examines the clinical aspects of molecular biology and technology, genomics, Poharmacogenomics and proteomics, while Part II covers the clinically relevant information of medical genetics, hematology, transfusion medicine, oncology, and forensic pathology. Supplemented with many useful figures and presented in a helpful bullet-point format, Molecular Genetic Pathology, Second Edition provides a unique reference for practicing pathologists, oncologists, internists, and medical geneticists. Furthermore, a book with concise overview of the field and highlights of clinical applications will certainly help those trainees, including pathology residents, genetics residents, molecular pathology fellows, internists, hematology/oncology fellows, and medical technologists in preparing for their board examination/certification.

Does an abandoned asylum hold the key to a frightful haunting? Everyone's heard the stories about Graylock Hall. It was meant to be a place of healing - a hospital where children and teenagers with mental disorders would be cared for and perhaps even cured. But something went wrong. Several young patients died under mysterious circumstances. Eventually, the hospital was shut down, the building abandoned and left to rot deep in the woods. As the new kid in town, Neil Cady wants to see Graylock for himself. Especially since rumor has it that the building is haunted. He's got fresh batteries in his flashlight, a camera to document the adventure, and a new best friend watching his back. Neil might think he's prepared for what he'll find in the dark and decrepit asylum. But he's certainly not prepared for what follows him home. . . . Scary, suspenseful, and surprising, Dan Poblocki's latest ghost story will keep you turning pages deep into the dead of night.

Coffee, Biotechnology and Quality is a comprehensive volume containing 45 specialised chapters by internationally recognised experts. The book aims to provide a guide for those wishing to learn about recent advances in coffee cultivation and post-harvest technology. It provides a quantitative and rational approach to the major areas of coffee research, including breeding and cloning, tissue culture and genetics, pest control, post-harvest technology and bioconversion of coffee industry residues into commercially valuable products. The chapters review recent experimental work, allowing a conceptual framework for future research to be identified and developed. The book will be of interest to researchers and students involved in any area of coffee research. Consequently, plant breeders, microbiologists, biotechnologists and biochemical engineers will find the book to be a unique and invaluable guide.

21-Day Audition Prep Crash Course: To Becoming an Arena Cheerleader for NFL, Nba, and Other Pro Cheer Teams

Asian Courts in Context

Fluid Balance, Hydration, and Athletic Performance

Early London, Prehistoric, Roman, Saxon and Norman

Health Benefits of Mediterranean Diet

Proceedings of ICTASD 2020, Volume 1

This book is intended to present current concepts in molecular biology with the emphasis on the application to animal, plant and human pathology, in various aspects such as etiology, diagnosis, prognosis, treatment and prevention of diseases as well as the use of these methodologies in understanding the pathophysiology of various diseases that affect living beings.

This book includes the original, peer reviewed research articles from the 2nd International Conference on Cybernetics, Cognition and Machine Learning Applications (CCCMLA 2020), held in August, 2020 at Goa, India. It covers the latest research trends or developments in areas of data science, artificial intelligence, neural networks, cognitive science and machine learning applications, cyber physical systems and cybernetics.

This book contains the papers presented at the 5th International Conference on Pr-actical Aspects of Knowledge Management organized by the Department of Knowledge Management, Institute of Computer Science and Business Informatics, University of Vienna. The event took place on December 02/03, 2004 in Vienna. The PAKM conference series offers a communication forum and meeting ground for practitioners and researchers engaged in developing and deploying advanced bu-ness solutions for the management of knowledge and intellectual capital. Contributions pursuing integrated approaches which consider organizational, technological and c-ultural issues of knowledge management have been elected for presentation. PAKM is a forum for people to share their views, to exchange ideas, to develop new insights, and to envision completely new kinds of solutions for knowledge management problems. The accepted papers are of high quality and are not too specialized so that the main issues can be understood by someone outside the respective ?eld. This is crucial for an interdisciplinary exchange of ideas. Like its predecessors, PAKM 2004 featured two invited talks. It is a real joy seeing the visibility of the conferenceincrease and noting that kno-edge management researchers and practitioners from all over the world submitted -

papers. This year, 163 papers were submitted, from which 48 were -cepted. Athletes and nonathletes frequently consume too little water or fluids, affecting exercise performance as well as overall health. This book comprehensively reviews the aspects relating to body fluid balance, rehydration, and physical exercise. It provides background on body water balance and turnover, topics related to electrolyte balance, and sweating as the basis for thermoregulatory and fluid homeostasis during exercise. In addition, chapters cover body water balance evaluation and regulation; cardiovascular and metabolic responses to fluid imbalance; effects of dehydration on aerobic power, muscle strength, and cognitive function; fluid intake timing; and optimal beverage selection.

Continin in Contrast

Cervical Cancer

Science Education Research in the Knowledge-Based Society

Continuing its calling to define the field and where it is going, the Second Edition of this landmark handbook brings up to date its comprehensive reportage of scholarly developments and school curriculum initiatives worldwide, providing a panoramic view of the state of curriculum studies globally. Its international scope and currency and range of research and theory reflect and contribute significantly to the ongoing internationalization of curriculum studies and its growth as a field worldwide. Changes in the Second Edition: Five new or updated introductory chapters pose transnational challenges to key questions curriculum research addresses locally. Countries absent in the First Edition are represented: Chile, Colombia, Cyprus, Ethiopia, Germany, Iran, Luxembourg, Nigeria, Peru, Poland, Portugal, Singapore, South Africa, Spain, and Switzerland. 39 new or updated chapters on curriculum research in 34 countries highlight curriculum research that is not widely known in North America. This handbook is an indispensable resource for prospective and practicing teachers, for curriculum studies scholars, and for education students around the world.

In Corinth in Contrast, archaeologists, historians, art historians, classicists, and New Testament scholars examine the stratified nature of social, economic, political, and religious interactions in the city of Corinth from the Hellenistic period to Late Antiquity.

Some books on mysticism offer New Age syncretism. Others propose simplistic methods of producing spiritual experiences. Still others deconstruct religious experience. The Roots of Christian Mysticism by Oliver Clement, however, avoids these pitfalls. Clement presents the mysticism of the early fathers themselves, from whose writings he offers exceptionally rich selections that are not readily available. In so doing, he introduces the reader to Christian mysticism through the words of those who were       drunk with God,       but whose religious experience was firmly rooted in Christ. Most importantly, given the modern propensity for bogus spirituality, Clement shows the indissoluble unity between mysticism and doctrine. The Fathers speak doctrine in voices radiant with the dark vision of God and their doctrine is both the fruit of prayer and the form of spirituality. From this perspective, the Church       s teachings about God, Christ, Church, Sacrament and Christian vocation become the objects of contemplation and the personal quest for God finds its way within, not apart from the Church, ecclesia. Christian mysticism, therefore, always occurs within the womb of the Church, particularly within the locus of the liturgy and thus, is prevented at the outset from becoming merely a freewheeling and self-authenticating form of emotional exuberance. Mysticism, thus firmly rooted, is considered the normal spiritual life of all Christians. All the faithful are called to realize fully the grace of their baptism, that is, to fulfill their humanity by being divinized through grace. These words might be disconcerting or raise the specter of       enthusiasm,       but some proper understanding of this calling, however embryonic, is indispensable to spiritual growth, to the life of the Church and to the transformation of culture. Why, for example, when so many Americans claim to be Christian does their faith have so little impact on our culture? Or why are the Church       s moral teachings found to be so excessively burdensome? Perhaps Christians have seldom been directed toward a spirituality that would open them to a fuller vision of their true destiny in Christ. A recent classroom experience illustrates the point. A young Christian father of two vigorously proposed many practical reasons for using contraception. His understanding of fatherhood operated on a purely naturalistic level; his concern to provide for his children likewise revolved around material goods. But once he glimpsed the ultimate destiny in Christ to which he and his children were called, he saw his fatherhood as a participation in a sacred mission and trust. Only then did the Church       s teaching and the sacrifices it entails make sense enough to follow. Such illumination is an essential component of the beauty and grace of the faith, for the fathers, the moral life flows. To use Clement       s terms,       only when the beauty-goodness of the truth captures the spirit-heart is the person able to engage in Christian praxis and to make the sacrifices necessary not merely to be good but to be transformed into Christ       . This transformation entails strenuous spiritual combat with a fallen human nature that the Fathers understand with exquisite precision. But even here the patristic thrust is basically positive, an attraction to the beauty and goodness of God that calls forth virtue, rather than an emphasis on the direct destruction of sin. Clement aptly describes asceticism as       an awakening from the sleep-walking of daily life. It ignites the Word to clear the life in the depth of the soul, freeing the spring of living waters... It is the Word who acts but we have to co-operate with him, not so much be exertion of will-power as by loving attention.       . Although spiritual growth naturally encompasses the activities of prayer, fasting and so forth, Clement never discusses this apart from Christ and Trinity. Salvation is not achieved through Pelagian self-development but in Christ and through his Church. The Fathers       theological center prevents their mysticism from collapsing into self-centered or naturalistic forms. The beauty that attracts is never separated from her sisters truth and goodness. The Roots of Christian Mysticism needs to be read by Christians seeking spiritual depth and by anyone wanting to taste doctrine as a living word. It is an excellent introduction to patristic thought and offers not only extensive selections of their writings but an appendix of about seventy pages of biblical material. Only one criticism of the book is offered: references to modern writers need to be noted so the reader can pursue them. Otherwise, this book is a gem. Jerrilyn Szelle Crisis April, 1996

This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 5th International Conference on ICT for Sustainable Development (ICTASD 2020), held in Goa, India, on 23 – 24 July 2020. The conference provided a valuable forum for cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Savannas and woodlands are one of the most challenging targets for remote sensing. This book provides a current snapshot of the geographical focus and application of the latest sensors and sensor combinations in savannas and woodlands. It includes feature articles on terrestrial laser scanning and on the application of remote sensing to characterization of vegetation dynamics in the Mato Grosso, Cerrado and Caatinga of Brazil. It also contains studies focussed on savannas in Europe, North America, Africa and Australia. It should be important reading for environmental practitioners and scientists globally who are concerned with the sustainability of the global savanna and woodland biome.

Growing evidence shows that a dietary pattern inspired by Mediterranean diet principles is associated with numerous health benefits. A Mediterranean-type diet has been demonstrated to exert a preventive effect toward cardiovascular diseases, in both Mediterranean and non-Mediterranean populations. Part of these properties may depend on a positive action toward healthier metabolism, decreasing the risk of diabetes and metabolic-syndrome-related conditions. Some studies also suggested a potential role in preventing certain cancers. Finally, newer research has showed that a higher adherence to the Mediterranean diet is associated with a lower risk of cognitive decline, depression, and other mental disorders. Overall, a better understanding of the key elements of this dietary pattern, the underlying mechanisms, and targets, are needed to corroborate current evidence and provide insights on new and potential outcomes.This Special Issue welcomes original research and reviews of literature concerning the Mediterranean diet and various health outcomes:Observational studies on established nutritional cohorts (preferred), case-control studies, or population sample on the association with non-communicable diseases;Level of evidence on the association with human health, including systematic reviews and metaanalyses; Evaluation of application of Mediterranean diet principles in non- Mediterranean countries;Description of mechanisms of action, pathways, and targets at the molecular level, including interaction with gut microbiota.

The aim of this volume is to record the resurgent influence of Language Learning in Translation Studies and the various contemporary ways in which translation is used in the fields of Language Teaching and Assessment. It examines the possibilities and limitations of the interplay between the two disciplines in attempting to investigate the degree to which recent calls for reinstating translation in language learning have borne fruit. The volume accommodates high-quality original submissions that address a variety of issues from a theoretical as well as an empirical point of view. The chapters of the volume raise important questions and demonstrate the beginning of a new era of conscious epistemological traffic between the two aforementioned disciplines. The contributors to the volume are academics, researchers and professionals in the fields of Translation Studies and Language Teaching and Assessment from various countries and educational contexts, including the USA, Canada, Taiwan R.O.C., and European countries such as Belgium, Germany, Greece, Slovenia and Sweden, and various professional and instructional settings, such as school sector and graduate, undergraduate and certificate programs. The contributions approach the interplay between the two disciplines from various angles, including functional approaches to translation, contemporary types of translation, and the discursive interaction between teachers and students.

This book is the outcome of the work of contributors who participated in the wo-orkshop ‘Mapping Different Geographies (MDG)’ in February 2010, held in Puchberg am Schneeberg, Austria. This meeting brought together cartographers, artists and geoscientists who research and practice in applications that focus on enhancing o- to- one communication or develop and evaluate methodologies that provide inno- tive methods for sharing information. The main intention of the workshop was to investigate how ‘different’ geographies are being mapped and the possibilities for developing new theories and techniques for information design and transfer based on place or location. So as to communicate these concepts it was important to appreciate the many contrasting meanings of ‘mapping’ that were held by workshop participants. Also, the many (and varied) viewpoints of what different geographies are, were ela- rated upon and discussed. Therefore, as the focus on space and time was embedded within everyone’s fields of investigation, this was addressed during the workshop. This resulted in very engaging discourse, which, in some cases, exposed the restrictions that certain approaches need to consider. For participants, this proved to be most useful, as this allowed them to appreciate the limits and restrictions of their own approach to understanding and representing different geographies. As well, the workshop also was most helpful as a vehicle for demonstrating the common ground of interest held by the very diverse areas of endeavour that the workshop participants work within.

CAPTURING THE POETRY OF TODAY - This is the seventh, annual, international poetry anthology in The Poetic Bond Series - 112 poems by 60 poets from 11 countries, drawn from new media, professional and social networking, giving a snapshot of 2017 which could be said to capture the zeitgeist of contemporary poetry. The Poets of 2017 are : Amber Jimenez-Flores (US), Annel Bell Martin (US), April Fallon (US), Belinda DuPret (UK) Betty Bleen (US), Melissa Bird (UK), Diane Burrow (UK), Christine Anderes (US), Cigang Zhang (China), Chris Maynard (UK), Darrell Wright (US), Deborah Nyamekye (Ghana), Denisa Parsons (US), Elaine Battersby (UK), Fiona Sullivan (UK), Bonnie J. Flach (US), Flavia Cosma (Canada), Gil Franke (US), Kelli Gunn (Canada), Pamela Gunn (Canada), Jane Johann (US), Joseph Simmons (US), Joseph Sinclair (UK), Karen Henneberry (Canada), Karen Nurenberg-Rothstein (US), Kayla Matheson (US), Sajida Khan (UK), Lee Landau (US), Lexene Burns (Australia), Madeline Lipton (US), Lizzie La Pool (UK), Tianshan Loncarec (Croatia), Low Kwai Chee (Malaysia), Marcia Weber (US), Mariangela Canzi (Italy), Nancy Scott (US), Padio Cunha (Portugal), Richard Glen Smith (US), Nancy Scott (US), Robin Ouzman Hislop (Spain), Suzanne Ashkam (UK), Nana Tokali (Greece), Tom Sterner (US), Trevor Maynard (UK), Vensa Adriana Arsenic (US), Brian Walker (UK), William DiBenedetto (US), Wbyrjg J. De Vries (Friesian and Canada), Lynne Zotalis (US).New for 2017 THE POETIC BOND CHOICE POETS’ CHOICE AWARDS 2017. Poets selected for the anthology, this year, got to vote for the three poems in the anthology which they find most engage and inspire them. The poems that win the most votes, in a 1-2-3 preferential voting system, will receive an cash award. This year The Poetic Bond Poets’ Choice Award Winners for 2017 are Betty Bleen for "Dancing in the Moonlight" Flavia Cosma for "I Gathered It All..." and Fiona Sullivan for "Coming Home" . THE POETIC BOND is an annual anthology, accepting submission every year from 31st March to 30th June.

This book is a companion to Professional Cheerleading Audition Secrets: How to Become an Arena Cheerleader for NFL, NBA, and Other Pro Cheer Teams.

Modern corporations are key participants in the new globalized economy. As such, they have been accorded tremendous latitude and granted extensive rights. However, accompanying obligations have not been similarly forthcoming. Chief among them is the obligation not to commit atrocities or human rights abuses in the pursuit of profit. Multinational corporations are increasingly complicit in genocides that occur in the developing world. While they benefit enormously from the crime, they are immune from prosecution at the international level. Prosecuting Corporations for Genocide proposes new legal pathways to ensure such companies are held criminally liable for their conduct by creating a framework for international criminal jurisdiction. If a state or a person commits genocide, they are punished, and international law demands such. Nevertheless, corporate actors have successfully avoided this through an array of legal arguments which Professor Kelly challenges. He demonstrates how international criminal jurisdiction should be extended over corporations for complicity in genocide and makes the case that it should be done promptly.

This book constitutes revised papers from the eight International Workshops held at the 16th International Conference on Business Process Management, BPM 2018, in Sydney, Australia, in September 2018; BPI 2018: 14th International Workshop on Business Process Intelligence; BPMS2 2018: 11th Workshop on Social and Human Aspects of Business Process Management-; PODS4H 2018: 1st International Workshop on Process-Oriented Data Science for Healthcare; AI4BPM 2018: 1st International Workshop on Artificial Intelligence for Business Process Management; CCBPM 2018: 1st International Workshop on Emerging Computing Paradigms and Context in Business Process Management; BP-Meet-IoT / PQ 2018: Joint Business Processes Meet the Internet-of-Things and Process Querying Workshop; DeHIMoP 2018: 1st Declarative/Decision/Hybrid Mining and Modelling for Business Processes Workshop; REBM /EdForum 2018: Joint Requirements Engineering and Business Process Management Workshop and Education Forum The 45 full papers presented in this volume were carefully reviewed and selected from 90 submissions.

This book presents the proceedings of the 8th International Workshop on Soft Computing Applications, SOFA 2018, held on 13-15 September 2018 in Arad, Romania. The workshop was organized by Aurel Vlaicu University of Arad, in conjunction with the Institute of Computer Science, Iasi Branch of the Romanian Academy, IEEE Romanian Section, Romanian Society of Control Engineering and Technical Informatics - Arad Section, General Association of Engineers in Romania - Arad Section and BTM Resources Arad. The papers included in these proceedings, published post-conference, cover the research including Knowledge-Based Technologies for Web Applications, Cloud Computing, Security Algorithms and Computer Networks, Business Process Management, Computational Intelligence in Education and Modelling and Applications in Textiles and many other areas related to the Soft Computing. The book is directed to professors, researchers, and graduate students in area of soft computing techniques and applications.

In many European languages the National Standard Variety is converging with spoken, informal, and socially marked varieties. In Italian this process is giving rise to a new standard variety called Neo-standard Italian, which partly consists of regional features. This book contributes to current research on standardization in Europe by offering a comprehensive overview of the re-standardization dynamics in Italian. Each chapter investigates a specific dynamic shaping the emergence of Neo-standard Italian and Regional Standard Varieties, such as the acceptance of previously non-standard features, the reception of Old Italian features excluded from the standard variety, the changing standard language ideology, the retention of features from Italo-Romance dialects, the standardization of patterns borrowed from English, and the developmental tendencies of standard Italian in Switzerland. The contributions investigate phonetic/phonological, prosodic, morphosyntactic, and lexical phenomena, addressed by several empirical methodologies and theoretical vantage points. This work is of interest to scholars and students working on language variation and change, especially those focusing on standard languages and standardization dynamics.

'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends directly on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourila, Judge Liu Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingling, Professor ZHU Lijiang and Mr. GUO Yang.

Recent Trends in Image Processing and Pattern Recognition

This two-volume set constitutes the refereed proceedings of the Third International Conference on Recent Trends in Image Processing and Pattern Recognition (RTIP2R) 2020, held in Aurangabad, India, in January 2020. The 78 revised full papers presented were carefully reviewed and selected from 329 submissions. The papers are organized in topical sections in the two volumes. Part I: Computer vision and applications; Data science and machine learning; Document understanding and Recognition. Part II: Healthcare informatics and medical imaging; Image analysis and recognition; Signal processing and pattern recognition; Image and signal processing in Agriculture.

Analyzes courts in fourteen selected Asian jurisdictions to provide the most up-to-date and comprehensive interdisciplinary book available.

"Why are there no effective treatments for my condition?" Why do researchers exclude patients with primary progressive multiple sclerosis from enrolling in clinical trials? Please let me know if you hear of studies that I might be allowed to enter or treatments that I could try for my condition. * Thus, in recent years, the sad lament of the patient with primary progressive MS (PPMS). This variant, often in the guise of a chronic progressive myelopathy or, less commonly, progressive cerebellar or bulbar dysfunction, usually responds poorly to corticosteroids and rarely seems to benefit to a significant degree from intensive immunosuppressive treatments. In recent years, most randomized clnical trials have excluded PPMS patients on two counts. Clinical worsening develop ops slowly in PPMS and may not be recognized during the course of a 2- or 3-year trial even in untreated control patients. This factor alone adds to the potential for a type 2 error or, at the very least, inflates the sample size and duration of the trial. In addition, there is mounting evidence that progressive axonal degeneration and neuronal loss (rather than acute, recurrent inflammation) may be important components of the pathology in this form of the disease. Although contemporary trials are evaluating whether PPMS patients may benefit from treatment with the -interferon and glatiramer acetate, preliminary, uncontrolled clinical experi- ence suggests that the results may not be dramatic.

This book provides readers with a thorough review on cervical cancer, treatment guidelines and emerging therapies available for the disease. It reviews the epidemiology clinical features, diagnosis, and medical management of cervical cancer. Given the increasing need for preventive strategies, treatment optimization with collaborative and integrative work, this book improves the actual and integral knowledge in this neoplasm. Given the high prevalence of this disease in Latin America, this is an important text for clinicians in this region. This book outlines the state of the art in cervical cancer treatments and is an indispensable companion for oncologists, gynecologists, surgeons and medical students.

This book presents high-quality peer-reviewed papers from the International Conference on Advanced Communication and Computational Technology (ICACCT) 2019 held at the National Institute of Technology, Kurukshetra, India. The contents are broadly divided into four parts: (i) Advanced Computing, (ii) Communication and Networking, (iii) VLSI and Embedded Systems, and (iv) Optimization Techniques.The major focus is on emerging computing technologies and their applications in the domain of communication and networking. The book will prove useful for engineers and researchers working on physical, data link and transport layers of communication protocols. Also, this will be useful for industry professionals interested in manufacturing of communication devices, modems, routers etc. with enhanced computational and data handling capacities.
