1001 Drum Grooves

W.B.

Part of the New Perspectives series, this text offers a case-based, problem-solving approach and innovative technology for meaningful learning of Microsoft PowerPoint 2003.

"These notes are

Download File

PDF Ford

Expedition

Diagram

about the process of design: the process of inventing things which display new physical order, organization, form, in response to function." This book, opening with these words, presents an entirely new theory of the process of design. In the first part of the book, Christopher Alexander discusses

Download File

PDF Ford

Expedition

Diagram

the process by which a form is adapted to the context of human needs and demands that has called it into being. He shows that such an adaptive process will be successful only if it proceeds piecemeal instead of all at once. It is for this reason that forms from traditional un-self-

Download File

PDF Ford

Expedition

Diagram

conscious cultures,
molded not by
designers but by the
slow pattern of
changes within
tradition, are so
beautifully organized
and adapted. When
the designer, in our
own self-conscious
culture, is called on to
create a form that is
adapted to its context
he is unsuccessful,

Download File

PDF Ford

Expedition

Diagram

because the preconceived categories out of which he builds his picture of the problem do not correspond to the inherent components of the problem, and therefore lead only to the arbitrariness, willfulness, and lack of understanding which plague the

Download File

PDF Ford

Expedition

Diagram

design of modern buildings and modern cities. In the second part, Mr. Alexander presents a method by which the designer may bring his full creative imagination into play, and yet avoid the traps of irrelevant preconception. He shows that, whenever a problem is stated, it

Download File

PDF Ford

Expedition

Diagram

is possible to ignore existing concepts and to create new concepts, out of the structure of the problem itself, which do correspond correctly to what he calls the subsystems of the adaptive process. By treating each of these subsystems as a separate subproblem,

Download File

PDF Ford

Expedition

Diagram

the designer can translate the new concepts into form. The form, because of the process, will be well-adapted to its context, non-arbitrary, and correct. The mathematics underlying this method, based mainly on set theory, is fully developed in a long appendix. Another
