

Formidable Profs Edition

This book celebrates the life, work and influence of Professor Roger W.H. Sargent of Imperial College London. It does so through a range of original contributions that span the wide academic and industry interests of Professor Sargent. Roger Sargent passed away in late 2018, but his legacy lives on through his enormous academic tree, which traces to the early 1960s. That huge body of work has also had significant impacts on industrial practices. Roger was regarded as "the father of Process Systems Engineering (PSE)". This area of Chemical Engineering continues to influence the modelling, design, control, optimization and integrated performance of industrial and related processes. This book highlights some of those impacts and the ongoing importance of PSE in helping to solve some of the grand challenges of our time.

24 stories from today's best Indian authors India's literary tradition has found a growing audience around the world. Many talented writers have arrived on the scene, each illuminating different parts of the Indian experience, from years of colonial

rule to the unique challenges of life in the West. This important anthology includes short stories and novel excerpts from Salman Rushdie, Kiran Desai, Rohinton Mistry, Jhumpa Lahiri, Ruth Praver Jhabvala, Anita Desai, Bharati Mukherjee, R. K. Narayan, and sixteen more.

The Professor at the Breakfast Table

The Mahābhārata

The original vision of Grimms' tales in English for the first time when Jacob and Wilhelm Grimm published their *Children's and Household Tales* in 1812, followed by a second volume in 1815, they had no idea that such stories as "Rapunzel," "Hansel and Gretel," and "Cinderella" would become the most celebrated in the world. Yet few people today are familiar with the majority of tales from the two early volumes, since in the next four decades the Grimms would publish six other editions, each extensively revised in content and style. For the very first time, *The Original Folk and Fairy Tales of the Brothers Grimm* makes available in English all 156 stories from the 1812 and 1815 editions. These narrative gems, newly translated and brought together in one beautiful book, are accompanied by sumptuous new illustrations from award-winning artist Andrea Dezsö. From "The Frog King" to "The Golden Key," wondrous worlds unfold—heroes and heroines are rewarded, weaker animals triumph over the strong, and simple bumpkins prove themselves not so simple after all. Esteemed fairy tale scholar Jack Zipes offers accessible translations that retain the spare description and engaging storytelling style of the originals. Indeed, this is what makes the

tales from the 1812 and 1815 editions unique—they reflect diverse voices, rooted in oral traditions, that are absent from the Grimms' later, more embellished collections of tales. Zipes's introduction gives important historical context, and the book includes the Grimms' prefaces and notes. A delight to read, The Original Folk and Fairy Tales of the Brothers Grimm presents these peerless stories to a whole new generation of readers.

The Early Adventures of Powered Flight in the UK

When the famous South African fish scientist Professor JLB Smith published Old Fourlegs - The Story of the Coelacanth in 1956 he created an international sensation. After all, this 400-million-year-old fish, known only from fossil remains, was thought to have become extinct around 66 million years ago! JLB Smith's dramatic account of the discovery of the first and second coelacanths in 1938 and 1952 turned him into a cult figure and put South African science on the world map. His book was eventually published in six English editions and translated into nine foreign languages. Mike Bruton's The Annotated Old

Fourlegs includes a facsimile reprint of the original book, to which he has added notes and images in the margins that provide an interesting and revealing commentary on Smith's text, as well as new introductory and explanatory chapters that bring the coelacanth story up to date.

From as early as the beginning of the nineteenth century, Britain was at the forefront of powered flight. Across the country many places became centres of innovation and experimentation, as increasing numbers of daring men took to the skies. It was in 1799, at Brompton Hall, that Sir George Cayley Bart put forward ideas which formed the basis of powered flight. Cayley is widely regarded as the father of aviation and his ancestral home the 'cradle' of British aviation. There were balloon flights at Hendon from 1862, although attempts at powered flights from the area later used as the famous airfield, do not seem to have been particularly successful. Despite this, Louis Bleriot established a flying school there in 1910. It was gliders that Percy Pilcher flew from the grounds of Stamford Hall, Leicestershire during the 1890s. He was killed in a crash there in 1899, but Pilcher had plans for a powered aircraft which experts believe may well have enabled him to beat the Wright Brothers in becoming the first to make a fixed-wing powered flight. At Brooklands attempts were made to build and fly a powered aircraft in 1906 even before the banked

racetrack was completed but these were unsuccessful. But on 8 June 1908, A.V. Roe made what is considered to be the first powered flight in Britain from there - in reality a short hop - in a machine of his own design and construction, enabling Brooklands to claim to be the birthplace of British aviation. These are just a few of the many places investigated by Bruce Hales-Dutton in this intriguing look at the early days of British aviation, which includes the first ever aircraft factory in Britain in the railway arches at Battersea; Larkhill on Salisbury Plain which became the British Army's first airfield, and Barking Creek where Frederick Handley Page established his first factory.

The Professor's House Willa Cather - The Professor's House is a novel by American novelist Willa Cather. Published in 1925, the novel was written over the course of several years. Cather first wrote the centerpiece, Tom Outland's

Story, and then later wrote the two framing chapters *The Family* and *The Professor*. Willa Cather's lyrical and bittersweet novel of a middle-aged man losing control of his life is a brilliant study in emotional dislocation and renewal. Professor Godfrey St. Peter is a man in his fifties who has devoted his life to his work, his wife, his garden, and his daughters, and achieved success with all of them. But when St. Peter is called on to move to a new, more comfortable house, something in him rebels. And although at first that rebellion consists of nothing more than mild resistance to his family's wishes, it imperceptibly comes to encompass the entire order of his life. *The Professor's House* combines a delightful grasp of the social and domestic rituals of a Midwestern university town in the 1920s with profound spiritual and psychological introspection.

How Science, Engineering, and Supply Chains Converged to Vaccinate the World

The Miscellaneous Works of Oliver Goldsmith. With Biographical Introduction by Professor Masson. (The Globe Edition.).

In *A Shot in the Arm*, MIT Professor Yossi Sheffi recounts the extraordinary journey to deliver Covid-19 vaccines: from scientific advancements to candidate vaccines and mass vaccination. It is a story of bold innovation, risk-taking, and teamwork as scientists, engineers, supply chain experts, manufacturers, and governments collaborated on the greatest product launch in history. The book also highlights the breathtaking potential of revolutionary mRNA technology and the vital lessons for combating other global challenges, including climate change.

In a world where what you see isn't always what it seems. A world where the people are lost and deceived by the masses. A select few will rise to do their part to return the balance and return hope. With creativity and passion for art, he is driven to change the hearts and minds of readers. Not only from his scripted like style of writing, to his similar yet different take on heroes and villains. His stories are captivating and hard to stop reading once you start. His stories are so intense and mind gripping, it will be hard for just about anyone to put one of his books down. He captures your mind and heart with each and every gripping story. Although simple, he has made his arrival known with *Soul Assailants*. Experience the beginning of a new set of warriors who will not only leave you wanting more, but have you on the edge of your seats each chapter.

A Shot in the Arm

This is a guide for anyone in the academy – faculty member, administrator or professional staff – at whatever point she or he may be along the career path. Whether you are a newly-minted Ph.D. landing your first job, at mid career, or even already retired and concerned about how long your money might last, Ed Bridges offers you a straightforward, easy-to-grasp, and structured way to think about money, learn how it works, understand the priorities for your stage in life, determine your objectives, and develop a personal plan most likely to achieve them. Why a book specifically for those who work in higher education? The chances are that your retirement funds are mostly invested in TIAA-CREF funds, and that the plans created by the different institutions where you have worked, or will work, impose sometimes conflicting limitations of how you can manage your retirement money. This is potentially complex terrain with which many professional financial advisors are unfamiliar. This book provides ample guidance for you to manage your retirement funds, but if you do prefer to seek professional advice, it sets out the criteria for choosing a reliable advisor, and may even be a book from which your advisor can benefit if he or she is not fully conversant with TIAA-CREF's offerings, and the quirks of academic retirement plans. What makes this book unique is that Ed Bridges shares with you his self-education about the risky business of investing and retirement planning. As he writes, "In schooling myself, I adopted the mind-set that I had used as a social scientist for the past forty-six years. I distinguished between fact and opinion

and scrutinized the evidence behind every author's claims; moreover, I searched for research that might corroborate or refute these claims. In the process, I learned a great deal about the route I should have taken to retirement from the time I accepted my first academic appointment to the time I submitted my intention to retire. Join me as I relive my long journey so that you may avoid my wrong turns and succeed in reaching your ultimate destination, a worry-free retirement, despite the risks and uncertainties you will surely face when you retire." The book includes simple questionnaires and worksheets to help you determine where you stand, and think through your options.

This is a smashing good crime novel with a modern tone and a plot that only Hitchcock could have done justice to. Screenplays were written for it but somehow it was never brought to the screen. It should have been made into a film. Involving The League of Nations and Geneva in the early '20s, secret societies, villains and heroes, even a hint of sex slavery, this fast-paced thriller will keep you turning the pages and rooting for the good guys.

The lost world is an area inhabited by dinosaurs, mammals, man-eaters and primitive people of the Stone Age. This territory - a rocky and inaccessible plateau - was discovered by Professor Challenger. But in scientific circles no one believes him. The scientist then organizes a second expedition to study the terrain. Its participants fall into various extreme situations, they face dinosaurs and ancient pterodactyls. With great difficulty they manage to get out of this mysterious plateau. Pretty illustrations by Vladislav Kolomoets provide you with new impressions from reading this legendary story.
