

Foster Youth Forgotten Youth

Edgar Poe, aided by the imp McCobber, has twenty-four hours to prove himself innocent of an act of mischief committed at the home of the judge who lives beside John Allan, foster father of the orphaned author-to-be. Imagine a young boy who has never had a loving home. His only possessions are the old, torn clothes he carries in a paper bag. The only world he knows is one of isolation and fear. Although others had rescued this boy from his abusive alcoholic mother, his real hurt is just beginning -- he has no place to call home. This is Dave Pelzer's long-awaited sequel to *A Child Called "It"*. In *The Lost Boy*, he answers questions and reveals new adventures through the compelling story of his life as an adolescent. Now considered an F-Child (Foster Child), Dave is moved in and out of five different homes. He suffers shame and experiences resentment from those who feel that all foster kids are trouble and unworthy of being loved just because they are not part of a "real" family. Tears, laughter, devastation and hope create the journey of this little lost boy who searches desperately for just one thing -- the love of a family.

Abstract: This report concludes the study of the Forgotten Half --the approximately 20 million 16 to 24-year-olds who are unlikely to attend college and will miss out on the privileges accorded to the college-educated. Report commendations focus on four major strategies: (1) to enhance the quality of youth-adult relationships, both in and out of the family; (2) to expand community supports, with an emphasis on youth services and youth leadership activities, to help integrate all young people into their communities and the nation; (3) to extend and improve current opportunities for more non-college-bound youth; and (4) to take a long stride toward more equitable youth education and training policies with a proposed new Fair Change: Youth Opportunities Demonstration Act. A chapter suggests methods for youth organizations to be more effective meeting the needs of these youth. The resource directory, appendix and publications list suggest many sources of youth development information.

Youth Leaving Foster Care

An Interactional Perspective

The Lost Boy

No House to Call My Home

Social Security Revision

Who are the forgotten? In the world of foster care there are many who have not been heard. The forgotten include, but are not limited to the children and youth in foster homes, tots and adolescents in institutions or children's homes, or those "throwaway" kids living in the garbage dumps or on the streets. . . IFCO, the International Foster Care Organization, is a committed band of people, spread across the globe, who care about, and care for the children, and many of the other forgotten ones, the families of the children, the caregivers, the social workers, the community. This book includes chapters from leading figures in foster care around the world. It also bears witness to more than thirty years of struggle and success to build an international network that has accomplished the following: * Working in many countries to move children from institutions to family care; * Providing a place where children and youth in care can be heard and empowered; * Advocating internationally for the United Nations Convention on Rights of Children. The story is powerful, shaking the soul and moving the conscience as we hear the voices of the forgotten ringing across the years.

"Discover an innovative framework for addressing intersectionality within educational spaces designed to combat the cumulative effects of systemic marginalization due to race, gender, disability, class, sexual orientation, and other identity-based labels. Highlighting diverse ways of knowing, this book will generate insights that can inform more equitable policy analysis, research, and practice"--

The Oxford Handbook of Children and the Law presents cutting-edge scholarship on a broad range of topics covering the life course of humans from before birth to adulthood, by leading scholars in law, medicine, social work, sociology, education, and philosophy, and by practitioners in law and medicine. An international collection of authors presents and analyzes the law and science pertaining to reproduction; prenatal life (including fetal exposure to toxic substances and abortion); parentage (including biology-based rights, background checks on birth parents, adoption, the status of gamete donors, and surrogacy); infant development and vulnerability; child maltreatment (including corporal punishment and religious defences to abuse and neglect); child protection policy and systems; foster care; child custody disputes between parents or between parents and other caregivers; schooling (including financing, resegregation, religious expression in public schools, at-risk students, special education, regulation of private schools, and homeschooling); delinquency; minimum-age laws; and child advocacy. Most chapters follow a format wherein they first describe the most debated or dynamic issues in each topical area, then explain in depth the law and/or science pertaining to the author's particular focus, and finally offer arguments and recommendations as to law and policy in that area. The normative component aims to advance discussions and debates in vital areas of contemporary child welfare law and policy. The Handbook is an essential resource for scholars and professionals interested in the intersection of children and the law.

The Privilege of Youth

The Epic Struggle to Change Foster Care

Spiritual Healing for Children in Foster Care

A Self-Reflection and How-To Guide for Pursuing Foster Care Adoption

Each year more than 25,000 youth age out of the American foster care system to face uncertain futures as young adults. Many of them have experienced the trauma of abuse, neglect, disrupted family relationships, and multiple foster care placements. The past two decades have seen increased funding and services in a society-wide attempt to mitigate the effects of such childhood adversity, but a consistent pattern of loss and broken attachments adds up. Development and education are severely compromised. A quarter of youth experience homelessness after exiting care; 25-50% will not complete high school, and only 3-6% will graduate college. Four years after leaving care, less than half are employed, and their earnings remain well below the poverty line. Rates of mental health disorders, early pregnancy and parenthood, and involvement in the criminal justice system are all heightened. Youth Leaving Foster Care is the first comprehensive text to focus on youth emerging from care, offering a new theoretical framework to guide programs, policies, and services. The book argues that understanding infant, child, and adolescent development; attachment experiences and disruptions; and the impacts of unresolved trauma and loss on development are critical to improving long-term outcomes. It provides an overview of the foster care context, detailed discussion of the effects of maltreatment on development from infancy through young adulthood, and common mental health problems and treatment recommendations. It includes a discussion of delinquency and the juvenile justice system, as well as issues facing pregnant and parenting youth, LGBT youth, and youth with disabilities. Presenting the best practices in transitional living programs and policy and research recommendations, this crucial guide also reviews and summarizes the latest research, which are enhanced with illustrative case vignettes. Each mental health and program chapter concludes with key practice principles reflecting the relationship-based approach. Presenting a multidimensional, integrated perspective that gives greater consideration to psychological and interpersonal needs, this vital guide offers an approach that will strengthen the capacity of youth leaving care to transition into successful adult lives.

Psychology of the Americas: Mestizo Perspectives on Personality and Mental Health presents the framework for a personality psychology and psychiatry of the Americas. This framework is based on the mestizo world view, a perspective that emerged from sociopolitical events which are unique to the development of many of the nations of the Americas. The word "mestizo" refers to the synthesis of native American and European people, cultures, and life styles. This book is divided into nine chapters and starts with a discussion of the concepts and principles of developmental, personality, community, and clinical psychology/psychiatry, which are reflected in the cultures of the indigenous peoples of North and South America, as well as the Caribbean. Considerable chapters offer some models that are based on the paradigms of diversity and synthesis, specifically a values/belief systems-cognitive styles framework based on research that has explored the relationship between traditionalism-modernism and cognitive styles. The specific models focus on individual development of pluralistic identities, the mental health of families coping with acculturation stress, person-environment fit of migrating individuals who are mismatched with institutions and agencies of the community, and on intergroup and international relations in situations of conflict. The remaining chapters deal with the tenets and assumptions of a psychology and psychiatry, including theories and approaches which differ in many respects from the European world view-based personality psychology and psychiatry of the past. This book is of value to psychologists, psychiatrists, researchers, and students.

Presents new ways of reaching out to teens in the classroom by offering essential principals for teaching, detailing guidelines for creating curriculum, and including examples of the authors' experiences teaching at an urban school.

Lost Kids

Give Smart

Child Welfare for the Twenty-first Century

The American Way of Poverty

Foster Youth

A CHANCE IN THE WORLD

In the first half of the twenty-first century, giving to family and community foundations alone will be ten times in today's dollars what it was throughout the entire twentieth century. Yet despite tremendous innovation in the social sector, philanthropy's natural state is under-performance. Not since Andrew Carnegie wrote The Gospel of Wealth has a book been written that provides practical guidance for donors to get the most impact from their giving. Almost a decade ago, Thomas J. Tierney left Bain & Company to co-found The Bridgespan Group, a nonprofit focused on helping donors and nonprofit leaders to develop and execute strategies to accelerate social change. In Give Smart, Tierney pools his hands-on knowledge with philanthropy expert Joel L. Fleishman to create a much-needed primer for philanthropists and the nonprofit organizations they support. Drawing from personal experiences, testimonials, and Bridgespan's case studies, including those of the Bill and Melinda Gates Foundation and the John D. and Catherine T. MacArthur Foundation, Give Smart picks up where Jim Collins' Good to Great and the Social Sectors left off and presents the first in-depth, expert guide for engaged donors and nonprofit leaders.

The Adoption and Safe Families Act (ASFA), which became law in 1997, elicited a major shift in federal policy and thinking toward child welfare, emphasizing children's safety, permanency, and well-being over preserving their biological ties at all costs. The first edition of this volume was the earliest major social work textbook to map the field of child welfare after ASFA's passage, detailing the practices, policies, programs, and research affected by the legislation's new attitude toward care. This second edition highlights the continuously changing child welfare climate in the U.S., including content on the Fostering Connections Act of 2008. Gerald P. Mallon and Peg McCartt Hess have updated the text throughout, drawing from real world case examples, using data obtained from the national Child and Family Services Reviews and emerging empirically based practices. They have also added chapters addressing child welfare workforce issues, supervision, and research and evaluation. Divided into four sections—child and adolescent well-being, child and adolescent safety, permanency for children and adolescents, and systemic issues within services, policies, and programs—this newly edited volume provides a current understanding of family support and child protective services, risk assessment, substance and sexual abuse issues, domestic violence issues, guardianship, reunification, kinship and foster family care, adoption, and transitional living programs. Recognized scholars, practitioners, and policy makers also discuss meaningful engagement with families, particularly Latino families; health care for children and youth, including mental health care; effective practices with LGBT youth and their families; placement stability; foster parent recruitment and retention; and the challenges of working with immigrant children, youth, and families.

This children's book is a motivational and spiritual book for children and teenagers. It was written to help inspire and heal the children that come from the dysfunctional juvenile dependency court and family court systems in the United States of America. This system hurts both dysfunctional families and non-dysfunctional families. While there is real child abuse going on within families, there are also families that are falsely accused of breaking child abuse laws. It is no wonder state and federal judges have stated, ..". our youth is out of control in this country, and it is chilling." If our society does not do something to help these children and families, we will lose the battle with our children. Spiritual Healing for Children in Foster Care seeks to help those children that are feeling lost, alone, isolated, abandoned, and frightened. They may be feeling different from other children when they are not, or feeling suicidal because they feel like nobody cares about them. Author Ruby Judah wants these children to know that they are loved and cared about. This book was also written to help children heal from their past hurts, to help them feel loved, and to give them inspiration, motivation, and a healthy outlook on life. They don't have to live in darkness; they can live with the light shining in their lives. They can be the light of the world and shine brightly like stars.

The Foster Youth Museum's mission is to "build awareness of the foster youth experience, from vulnerability and trauma to healing and transformation. By bearing witness to the art, artifacts, voices, and stories of youth who have journeyed through the foster care system, the museum ignites compassion and action so you can be part of empowering youth through supportive and meaningful connection."¹ The Youth Training Project (YTP) and California Youth Connection (CYC) created the Foster Youth Museum (FYM) in 2006 and it is in the infancy/growth stage of its organizational lifecycle. The overarching objective for this capstone project was to assist in the creation and execution of The FYM's inaugural exhibition "Lost Childhoods."

The text is about a single parent's choice to become a foster parent to very difficult boys. In here, readers will discover several Do's and Don'ts for dealing with children as it shares the myths versus the facts of foster care and adoption options. Not only will you learn more about the challenge of taking care of foster kids in modern society, you will also find out that some out-of-the-box ways to address daily issues. How should one parent tackle the hygiene issues of the child? How should they be disciplined? The answers to these tough questions are just waiting to be discovered by you.

The increasing and disturbing problem of homeless children in the United States is the focus of this book. Paul G Shane considers the social factors that can create homeless situations for children, and examines the personal and educational problems that can result from their homelessness. The health risks to this population - such as unsanitary living conditions, poor nutrition, physical assault and lack of access to health care - are also explored. Ethnographic case studies of homeless youth are presented, and the book concludes with recommendations for policies and programmes designed to ease the problem.

Homeless Youth

Who Knows? Who Cares?

Social Work Practice with LGBTQIA Populations

A Foster Child's Search for the Love of a Family

Abstract: The purpose of this study was to explore social workers' perceptions of the effects the foster care system and multiple placements have on the ability of children and youth to create healthy attachments. Face-to-face interviews with 15 social workers employed with the Department of Children and Family Services, Los Angeles County, were conducted to explore their perceptions of attachment in foster children and youth. This study revealed ambiguity from the majority of social workers as to whether the foster care system could promote healthy attachments in foster children and youth. A higher percentage of participants believed the biggest barriers to be an overloaded foster care system, too many people involved in the decision-making process, and a long turn-around time for services. Additionally, social workers perceived that multiple placements had a significant negative effect on foster children and youth that often led to lost peer relationships, a decrease in a child or youth's educational progress, and a lack of motivation to adapt to new environments and therefore limiting any possible attachment to future caregivers. Additional research is needed to further explore the system's effect on attachment outcomes for children and youth in foster care who experience multiple placements.

It is a great pleasure to offer this volume from Michael J. Nakkula, Karen C. Foster, Marc Mannes, and Shenita Bolstrom as the latest in the Search Institute Series on Developmentally Attentive Community and Society. Its importance to the series and this field of inquiry and practice is readily evident in its title, Building Healthy Communities for Positive Youth Development. Since the early 1990s, Search Institute has invited and encouraged communities of all shapes and sizes to use its framework of Developmental Assets and principles of asset building to create strong, vibrant, and welcoming communities for children and youth. We have operated largely at the grassroots level, encouraging innovation and adaptation around a shared vision, rather than proposing a program or model for replication. We seek to learn as much from the communities as they learn from us. This book offers in-depth case studies of what happened in eight diverse communities that took up our invitation. In them, we see a wide array of strategies and approaches that, on the surface, seem to have little coherence. But, as Nakkula and colleagues found, underlying each of these distinct efforts was a deep commitment to transforming the social norms of community life to more effectively attend to young people's healthy development throughout the first two decades of life. There have been many ambitious efforts aimed at comprehensive community change on behalf of young people.

Children and youth occupy important social and political roles, even as they sleep in cribs or hang out on street corners. Conceptualized as either harbingers or saboteurs of a bright, secure tomorrow, they have motivated many adult-driven schemes to effect a positive future. But have all children benefited from these programs and initiatives? Lost Kids examines adults' misgivings about, and the inadequate care of, vulnerable children. From explorations of interracial adoption and the treatment of children with disabilities to discussions of the cultural construction of the hopeless child, this multifaceted collection rejects the essentialism of the "priceless child" or "lost youth" simplistic categories that continue to shape the treatment of those who deviate from the so-called norm.

In this lyrical debut, Ryan Berg immerses readers in the gritty, dangerous, and shockingly underreported world of homeless LGBTQ teens in New York. As a caseworker in a group home for disowned LGBTQ teenagers, Berg witnessed the struggles, fears, and ambitions of these disconnected youth as they

resisted the pull of the street, tottering between destruction and survival. Focusing on the lives and loves of eight unforgettable youth, *No House to Call My Home* traces their efforts to break away from dangerous sex work and cycles of drug and alcohol abuse, and, in the process, to heal from years of trauma. From Bella's fervent desire for stability to Christina's irrepressible dreams of stardom to Benny's continuing efforts to find someone to love him, Berg uncovers the real lives behind the harrowing statistics: over 4,000 youth are homeless in New York City—43 percent of them identify as LGBTQ. Through these stories, Berg compels us to rethink the way we define privilege, identity, love, and family. Beyond the tears, bluster, and bravado, he reveals the force that allows them to carry on—the irrepressible hope of youth.

There are many misconceptions about young refugees and asylum seekers in Britain. Declan Henry dispels the myths and gives a compassionate and empathetic view of the daily struggles they face including discrimination, racism and poverty. This book explores the reasons why they came to the UK and the safeguarding issues involved, the services they receive and the gaps and inequalities in the system as a whole. The injustice of long Home Office delays in the processing of applications and appeal processes are outlined and, as it is becoming more difficult for many young people to get Leave to Remain, the impact on their lives in terms of accommodation, education and planning for the future are explored. The author also looks at the emotional and mental health needs of young people including those with undiagnosed learning needs and difficulties. Ultimately, the book paints a graphic picture of what life is like in Britain for young people – cut off from their country of their origin and families – and how they are expected to make a new life in Britain with limited resources. There are works of non-fiction that are not only timely but also extremely important. *Young Refugees And Asylum Seekers* by author Declan Henry is one of them. The refugee crisis, and the plight of children and young adults, is brought into sharp focus in this powerful, challenging and well-written book. With precision, this author highlights both the lack of resources and unfair treatment of those who enter a new country without a caregiver as well as the monumental efforts of good people who work within a challenging system to exact change while practicing kindness. The importance of seeing children as children first is at the core of this valuable book. And we are reminded that the way we treat the most vulnerable is a testament to who we are, fundamentally, as human beings and a society. I highly recommend this book to anyone who wants to better understand the refugee crisis and to those in search of an opportunity to make a difference. Nancy Richardson Fischer, author of *When Elephants Fly*, *The Speed of Falling Objects*

Love, Family, and Other Transgressions

Vulnerable Children and Youth in Twentieth-Century Canada and the United States

11 Steps to Self-Sufficiency

Love and Forgiveness

Fostering the Forgotten Child

Disconnected and Disadvantaged Youth

The Forgotten Adoption Option

Over 400,000 US youth are in foster care, mainly due to neglect and abuse by their parents. These youth endure instability as they move from home to home, and uncertainty about their future as others make the decision as to whether they should be reunited with their families or become available for adoption. *Foster Youth* presents a powerful, real-world look at the lives of these vulnerable young people.

A deeply affecting exposé of America's hidden crisis of disconnected youth, in the tradition of Matthew Desmond and Adrian Nicole LeBlanc For the majority of young adults today, the transition to independence is a time of excitement and possibility. But 4.5 million young people—or a stunning 11.5 percent of youth aged sixteen to twenty-four—experience entry into adulthood as abrupt abandonment, a time of disconnection from school, work, and family. For this growing population of Americans, which includes kids aging out of foster care and those entangled with the justice system, life screeches to a halt when adulthood arrives. *Abandoned* is the first-ever exploration of this tale of dead ends and broken dreams. Author Anne Kim skillfully weaves heart-rending stories of young people navigating early adulthood alone, in communities where poverty is endemic and opportunities almost nonexistent. She then describes a growing awareness—including new research from the field of adolescent brain science—that “emerging adulthood” is just as crucial a developmental period as early childhood, and she profiles an array of unheralded programs that provide young people with the supports they need to achieve self-sufficiency. A major work of deeply reported narrative nonfiction, *Abandoned* joins the small shelf of books that change the way we see our society and point to a different path forward.

Selected as A Notable Book of the Year by The New York Times Book Review Fifty years after Michael Harrington published his groundbreaking book *The Other America*, in which he chronicled the lives of people excluded from the Age of Affluence, poverty in America is back with a vengeance. It is made up of both the long-term chronically poor and new working poor—the tens of millions of victims of a broken economy and an ever more dysfunctional political system. In many ways, for the majority of Americans, financial insecurity has become the new norm. *The American Way of Poverty* shines a light on this travesty. Sasha Abramsky brings the effects of economic inequality out of the shadows and, ultimately, suggests ways for moving toward a fairer and more equitable social contract. Exploring everything from housing policy to wage protections and affordable higher education, Abramsky lays out a panoramic blueprint for a reinvigorated political process that, in turn, will pave the way for a renewed War on Poverty. It is, Harrington believed, a moral outrage that in a country as wealthy as America, so many people could be so poor. Written in the wake of the 2008 financial collapse, in an era of grotesque economic extremes, *The American Way of Poverty* brings that same powerful indignation to the topic.

120,000 U.S. children who are ready to be adopted are hoping you'll pick up this book. Have you ever thought you'd adopt a child(ren), but finding out it costs thousands of dollars kicked that idea out of your mind? I believe that all children in foster care return to their biological families. Many do not know that 50% of children in foster care need an adoptive family and that adopting children through foster care is the best way. Countless times friends and friends of friends have reached out asking about foster care adoption and how we adopted our children through foster care. My intent is to help you evaluate your own process of foster care adoption so you can help a child who is hoping you will find them. While I cannot promise you that the process will be easy, I can tell you that going down this path has been worth it for my family.

A heart-rending but uplifting story of the human spirit's ability to prevail. From the day he is five-years-old and dropped off at his foster home of the next eleven years, Stephen is mentally and physically abused by the system can help him. No one can tell him if he has a family. No one can tell him why, with obvious African-American features, he has the last name of Klakowicz. Along the way, a single faint light in a neighbor's small acts of kindness and caring—and a box of books. From one of those books he learns that he has to fight in any way he can—for victory is in the battle. His victory is to excel in school. The author succeeded. He attended college, graduated, became a successful corporate executive, and married a wonderful woman with whom he established a loving family of his own. Through it all, he kept records and files and found his history, his birth family—and the ultimate disappointment as some family members embrace him, but others reject him. Readers won't be the same after reading this book. They will share in the hurts and despair but also in the triumph against daunting obstacles. They will share this story with their family, with their friends, with their neighbors.

In 1973 Marcia Lowry, a young civil liberties attorney, filed a controversial class-action suit that would come to be known as Wilder, which challenged New York City's operation of its foster-care system. Her contention was that the system failed the children it was meant to help because it placed them according to creed and convenience, not according to need. The plaintiff was thirteen-year-old Shirley, a runaway whose childhood had been shaped by the system's inequities. Within a year Shirley would give birth to a son and relinquish him to the same failing system. Seventeen years later, with Wilder still in court, Nina Bernstein tried to find out what had happened to Shirley and her baby. She was told by child-welfare officials that Shirley had disappeared and that her son was one of thousands of children whose circumstances are concealed by the veil of confidentiality that hides foster care from public scrutiny. But Bernstein persevered. The Lost Children of Wilder gives us, in galvanizing and compelling detail, the full history of a case that reveals the racial, religious, and political fault lines in our child-welfare system, and lays bare the fundamental contradiction at the heart of our well-intended efforts to protect needy children from the fate of their parents. Bernstein takes us behind the scenes of far-reaching legal and legislative battles, at the same time as she traces, in heartbreaking counterpoint, the story played out in the life of Shirley's son, Lamont. His terrifying journey through the system has produced a man with deep emotional wounds, a stifled yearning for family, and a son growing up in the shadow of a recounting the failure of the promise of benevolence, The Lost Children of Wilder makes clear how welfare reform can also damage its intended beneficiaries. A landmark achievement of investigative journalism and de force of social observation, this book will haunt every reader who cares about the needs of children.

An Orphan Boy, a Mysterious Past, and How He Found a Place Called Home

The Lost Childhoods Exhibition and the Foster Youth Museum

Strategies and Methods for Implementing Trauma-Informed Pedagogy

Social Security Revision. Hearings ... on H.R. 6000, Part 1

Intersectionality in Education

Abandoned

Teaching English/Language Arts in Today's Forgotten High Schools

Social Work Practice with LGBTQIA Populations provides an overview of key issues for social workers working with LGBTQIA clients. Each chapter considers clients' experiences in different social and interpersonal contexts. This text encourages students to think critically about the barriers and discriminations clients might face in their lives and how social workers can be equipped to address these issues. Students are challenged to develop approaches that extend support to these clients and that remove structural barriers that clients face within the systems they encounter. Utilizing intersectionality theory, students will gain an understanding of the risks and protective factors unique to this population in social work contexts.

Twenty-first century classrooms are diverse in nature and everchanging. Students enter classrooms with many experiences, both positive and negative, that influence and affect their ability to learn. More specifically, children who have experienced trauma often struggle socially, emotionally, and academically. Unfortunately, many educators are not adequately trained to identify the signs of trauma in children. In fact, they may misinterpret the outward behavioral manifestations of trauma as other conduct disorders. *Strategies and Methods for Implementing Trauma-Informed Pedagogy* is a critical reference book that helps teachers and administrators identify manifestations of trauma in children and explain the characteristics and classroom interventions and resources that can aid educators in supporting students who have experienced trauma. This text explains the effects of trauma and the ways in which it manifests in children, explores resources and community options to support children who have experienced trauma, presents strategies to help students who have experienced trauma to learn in the classroom, and teaches the management of behaviors in positive ways to cultivate a community of learners. Covering topics such as positive behavioral interventions and supports (PBIS), racial trauma, and student classroom behavior, this text is essential for classroom teachers, teachers in training, school counselors, school psychologists, preservice teachers, administrators, researchers, and academicians.

The #1 New York Times and #1 internationally bestselling author who is a shining example of what overcoming adversity really means now shares the lost chapter of his uplifting

journey, which has touched the lives of millions. From A Child Called “ It ” to The Lost Boy, from A Man Named Dave to Help Yourself, Dave Pelzer ’ s inspirational books have helped countless others triumph over hardship and misfortune. In The Privilege of Youth, he shares the missing chapter of his life: as a boy on the threshold of adulthood. With sensitivity and insight, he recounts the relentless taunting he endured from bullies; but he also describes the thrill of making his first real friends—some of whom he still shares close relationships with today. He writes about the simple pleasures of exploring his neighborhood, while trying to forget the hell waiting for him at home. From high school to a world beyond the four walls that were his prison for so many years, The Privilege of Youth bravely and compassionately charts this crucial turning point in Dave Pelzer ’ s life and will inspire a whole new generation of readers.
