

## Framed

**The highly anticipated follow-up to Framed Ink from Marcos Mateu-Mestre, Framed Ink 2 provides insight into another compositional tool that Marcos uses every day to create his amazing artwork--the energy within the working frame. In each piece of art, regardless of its format, one must consider essential factors such as the push-pull, tension-relaxation, pressure-release, balance and imbalance that happen inside the working area to support our storytelling. All of these factors apply in any aspect ratio, whether it be horizontal, vertical or square, each a format to consider when working in the movie, gaming, animation and graphic novel industries, which in our day and age can be presented through a variety of outlets such as a movie theater, home theater, social media and a number of personal devices. Marcos encourages and educates us on how not to be limited by the format but to embrace and rise to the challenge of designing for each format. A perfect accompaniment to his prior releases Framed Ink, Framed Perspective Vol. 1 and Vol. 2 and Framed Drawing Techniques, this book will take a reader's knowledge base to the next level and allow them to build on their expertise as an effective visual storyteller.**

**Building on the foundation established with the first book in the series, Framed Perspective 2 guides artists through the challenging tasks of projecting shadows in proper perspective on a variety of environments and working with characters in perspective set in particular situation or setting. Author and artist Marcos Mateu-Mestre reveals the many techniques and mechanics he has used to become**

**proficient in such endeavors, including using anatomy, shadows, and clothing folds to define the shape and volume of characters within an environment. He also shares how to effectively observe a model or object to extract the right amount of information to then translate it into an impactful graphic and visual image, the goal of every visual storyteller.**

**Christopher R. Martin argues that the mainstream news media (and the large corporations behind them) put the labor movement in a bad light even while avoiding the appearance of bias. Martin has found that the news media construct "common ground" narratives between labor and management positions by reporting on labor relations from a consumer perspective. Martin identifies five central storytelling frames using this consumer orientation that repeatedly emerged in the news media coverage of major labor stories in the 1990s: the 1991–94 shutdown of the General Motors Willow Run Assembly Plant in Ypsilanti, Michigan; the 1993 American Airlines flight attendant strike; the 1994–95 Major League Baseball strike, the 1997 United Parcel Service strike, and the 1999 protests against the World Trade Organization's conference in Seattle. In Martin's view, the news media's consumer "take" on the labor movement has the effect of submerging issues of citizenship, political activity, and class relations, and elevating issues of consumption and the myth of a class-free America. Instead of facilitating a public sphere, the democratic ideal in which the public can engage in discovery and rational-critical debate, Martin says, news organizations have fostered a consumer sphere, in which public discourse and action is defined in terms of consumer**

interests—the impact of strikes, lock-outs, shut-downs, and protests on the general consumer economy and the price, quality, and availability of things such as automobiles, airline flights, and baseball tickets.

Writers in sixteenth-century England often kept commonplace books in which to jot down notable fragments encountered during reading or conversation, but few critics have fully appreciated the formative influence this activity had on humanism. Focusing on the discursive practices of "gathering" textual fragments and "framing" or forming, arranging, and assimilating them, Mary Crane shows how keeping commonplace books made up the English humanists' central transaction with antiquity and provided an influential model for authorial practice and authoritative self-fashioning. She thereby revises our perceptions of English humanism, revealing its emphasis on sayings, collectivism, shared resources, anonymous inscription, and balance of power--in contrast to an aristocratic mode of thought, which championed individualism, imperialism, and strong assertion of authorial voice. Crane first explores the theory of gathering and framing as articulated in influential sixteenth-century logic and rhetoric texts and in the pedagogical theory with which they were linked in the humanist project. She then investigates the practice of humanist discourse through a series of texts that exemplify the notebook method of composition. These texts include school curricula, political and economic treatises (such as More's Utopia), contemporary biography, and collections of epigrams and poetic miscellanies. Originally published in 1993. The Princeton Legacy Library uses the latest print-

Perspective is a discipline often set aside when it comes to general art study, though it is essential to master in order to produce any piece of art that is and feels realistic. As intimidating as perspective may seem, best-selling author and artist Marcos Mateu-Mestre delivers each lesson in an accessible and informative way that takes the mystery out of achieving successful scenes.

"What the women I write about have in common is that they are all rebels with a cause, and I see myself represented in their mirror," asserts Alicia Gaspar de Alba. Looking back across a career in which she has

written novels, poems, and scholarly works about Sor Juana Inés de la Cruz, la Malinche, Coyolxauhqui, the murdered women of Juárez, the Salem witches, and Chicana lesbian feminists, Gaspar de Alba realized that what links these historically and socially diverse figures is that they all fall into the category of "bad women," as defined by their place, culture, and time, and all have been punished as well as remembered for rebelling against the "frames" imposed on them by capitalist patriarchal discourses. In [Un]Framing the "Bad Woman," Gaspar de Alba revisits and expands several of her published articles and presents three new essays to analyze how specific brown/female bodies have been framed by racial, social, cultural, sexual, national/regional, historical, and religious discourses of identity—as well as how Chicanas can be liberated from these frames. Employing interdisciplinary methodologies of activist scholarship that draw from art, literature, history, politics, popular culture, and feminist theory, she shows how the "bad women" who interest her are transgressive bodies that refuse to cooperate with patriarchal dictates about what constitutes a "good woman" and that queer/alter the male-centric and heteronormative history, politics, and consciousness of Chicano/Mexicano culture. By "unframing" these bad women and rewriting their stories within a revolutionary frame, Gaspar de Alba offers her compañeras and fellow luchadoras empowering models of struggle, resistance, and rebirth.

***Get to know the only kid on the FBI Director's speed dial and several international criminals' most wanted lists all because of his Theory of All Small Things in this hilarious start to a brand-new middle grade mystery series. So you're only halfway through your homework and the Director of the FBI keeps texting you for help...What do you do? Save your grade? Or save the country? If you're Florian Bates, you figure out a way to do both. Florian is twelve years old and has just moved to Washington. He's learning his way around using TOAST, which stands for the Theory of All Small Things. It's a technique he invented to solve life's little mysteries such as: where to sit on the on the first day of school, or which Chinese restaurant has the best eggrolls. But when he teaches it to his new friend Margaret, they uncover a mystery that isn't little. In fact, it's HUGE, and it involves the National Gallery, the FBI, and a notorious crime syndicate known as EEL. Can Florian decipher the clues and finish his homework in time to help the FBI solve the case? A major characteristic of any natural language is that the same communication, idea, or intention can be articulated in different ways—in other words, the same message can be "framed" differently. The same medical treatment can be portrayed in terms chance of chance of success or chance of failure; energy reduction can be expressed in terms of savings per day or savings per year; and a task can be described as 80% completed or 20% uncompleted. *The notion of the frame in art can refer not only to a material frame bordering an image, but also to a conceptual frame. Both meanings are essential to how the work is perceived. In Framing Russian Art, art historian Oleg Tarasov investigates the role of the frame in its literal function of demarcating a work of art and in its conceptual function affecting the understanding of what is seen. The first part of the book is dedicated to the framework of the Russian icon. Here, Tarasov explores the historical and cultural meanings of the icon's setting, and of the iconostasis. Tarasov's study then moves through Russian and European art from ancient times to the twentieth century, including abstract art and Suprematism. Along the way, Tarasov pays special attention to the Russian baroque period and the famous nineteenth century Russian battle painter Vasily Vereshchagin. This enlightening account of the cultural phenomenon of the frame and its ever-changing functions will appeal to students and*

***billionaire banker Edmond Safra died in the ashes of Monaco's La Belle Époque on December 3, 1999, the event made international headlines—for many reasons. One, of course, was the sheer wealth of the Lebanese mogul and his formidable presence in the international banking world. But the more seductive reason for the worldwide attention was the strange and intriguing way Safra died—ensconced within the armored walls of his vigilantly secured residence in the “safest city in the world.” At 4:45 in the morning, a firestorm gutted Safra's opulent Monte Carlo penthouse, trapping—and killing—Safra and one of his nurses, Vivian Torrente. The fire was ruled arson. Safra's death, the result. The person responsible: ex-Green Beret Ted Maher, another of Safra's nurses. Or so he stood accused. The true details concerning the bizarre circumstances that led to Safra's death and the subsequent conviction and imprisonment of Ted Maher are contained within the pages of Framed in Monte Carlo: Why I Spent Eight Years in Prison for a Murder I Did Not Commit. It features play-by-play of the night Edmond Safra died, as well as Maher's sham of a trial and his subsequent imprisonment for seven years and eight months. Dangerous French prisons, prison breaks straight out of The Great Escape, daily strip searches, and more pepper the pages of Framed in Monte Carlo. After Maher had already served over ninety-five percent of his sentence, the chief investigative judge publicly denounced Maher's trial as a sham, one the judge himself had participated in.***

This book is both a contribution to an interdisciplinary study of literature and other media and a pioneering application of cognitive and frame-theoretical approaches to these fields. In the temporal media a privileged place for the coding of cognitive frames are the beginnings while in spatial media physical borders take over many framing functions. This volume investigates forms and functions of such framing spaces from a transmedial perspective by juxtaposing and comparing the framing potential of individual media and works. After an introductory theoretical essay, which aims to clarify basic concepts, the volume presents eighteen contributions by scholars from various disciplines who deal with individual media. The first section is dedicated to framing in or through the visual arts and includes discussions of the illustrations of medieval manuscripts, the practice of framing pictures from the Middle Ages to Magritte and contemporary American art as well as framings in printmaking and architecture. The second part deals with literary texts and ranges from studies centred on framings in frame stories to essays focussing on the use of paratextual, textual and non-verbal media in the framings of classical, medieval and modern German and American narrative literature; moreover, it includes studies on defamiliarized framings, e.g. by Julio Cortazar and Jasper Fforde, as well as an essay on end-framing practices. Sections on framings in film (including the trailers of Tolkien's "The Lord of the Rings") and in music (operatic overtures and Schumann's piano pieces) provide perspectives on further media. The volume is of relevance to students and scholars from various fields: intermedia studies, cognitive approaches to the media, literary and film studies, history

of art, and musicology."

"Offers an impassioned, personal critique of the British legal system and has become a classic text. Helena Kennedy focuses on the treatment of women in our courts - on the prejudices of judges, the misconceptions of jurors, the labyrinths of court procedures and the influence of the media. But the inequities she uncovers could apply equally to any disadvantaged group - to whose whose cases are subtly affected by race, class poverty or politics, or who are burdened, even before they appear in court, by misleading stereotypes"--Unedited summary from book cover.

*In Framed, Levinson challenges our belief that the most important features of our constitutions concern what rights they protect. Instead, he focuses on the fundamental procedures of governance such as congressional bicameralism; the selection of the President by the electoral college, or the dimensions of the President's veto power--not to mention the near impossibility of amending the United States Constitution. These seemingly "settled" and "hardwired" structures contribute to the now almost universally recognized "dysfunctionality" of American politics. Levinson argues that we should stop treating the United States Constitution as uniquely exemplifying the American constitutional tradition. Kirkman and Scott don't just have their fingers on the pulse of the modern middle-class family; they have a grip on its wrist like a mother pulling a three-year-old past a grocery store cookie aisle. Tadpoles in the toilet, backseat border wars, emergency homemade diapers . . . welcome to another year in the life of the never-a-dull-moment McPherson family. While

sister Zoe and brother Hammie's budding sibling rivalry reaches new heights (and volumes), baby Wren is making great strides of her own. With the advent of "the climbing phase" no coffee table, countertop, or bookshelf is too high. For years, the team of Rick Kirkman and Jerry Scott have given readers a too-funny-to-be-true, too-real-not-to-be insider's view of the American dream. They get the details and dilemmas so right, in fact, that it's a wonder they haven't been indicted for domestic surveillance. This book contains all the information necessary for framing houses and light commercial buildings. Includes shortcuts to laying out, speed cutting trimmers and plates, rake walls, installing ceiling backing, ceiling joists and truss joists, arches and drop ceilings--all with time-saving techniques. Over 100 on-the-job photos of how to do it right and what can go wrong.

How much can you trust your closest friend? Beth Montgomery seems to have the perfect life: a beautiful house in the hills above Los Angeles, a

handsome, ambitious husband, and plans of starting a family. So it doesn't occur to her to worry when the news breaks of a quadruple homicide across town, a botched drug deal that leaves an undercover officer among the dead. Beth certainly would never think to tie the murders to the sudden reappearance in her life of wild, sexy Cassie Ogilvy, the estranged best friend she hasn't seen since they were college roommates. As Cassie confidently settles into Beth's new life, making herself comfortable not only in Beth's guestroom but with her husband as well, it becomes increasingly clear that her old friend has a lot to hide. But it isn't until a shocking late-night phone call, and Cassie's even more startling disappearance, that Beth begins to understand that her world, as she knew it, is gone forever. Unfurling over the span of three fraught, heart-pounding days, McInnis's masterful suspense debut is fast-paced and diabolically unpredictable--a fresh, surprising, and powerfully smart twist on the traditional thriller.

What would you do if your faith was put to the test; everything you believed in was turned upside down; and you suddenly found yourself under arrest and on trial for the crime of being a Catholic? Would there be enough evidence to convict you? The Prosecutor of Michigan's remote Keweenaw County thought so. In 2010, following the process set forth by the United States Council of Catholic Bishops, a father trustingly made a report of attempted sexual abuse by a monk of a Ukrainian monastery on behalf of his young daughter, with the Ukrainian Catholic Diocese of St. Nicholas in Chicago. What happened after that has been said to be one of the most documented cases of religious persecution of a Catholic in America in recent history. With the suspense of a detective novel, FRAMED shares victim-author Tim Schoonard's incredible true story; chronicling the events surrounding his arrest and criminal prosecution in Keweenaw County, after he was framed for extortion by Ukrainian Catholic Church officials in what was revealed to be an elaborate attempt to cover up misconduct complaints against one of their clergy. Being betrayed or injured by trusted Church leaders can often lead to blaming the entire Catholic Church for the evil actions of a few. Standing together against overwhelming odds, in a remarkable testimony to faith and family, Tim Schoonard shares his family's struggles with faith, the long and difficult road to healing, and the decisions they made to stay firmly Catholic. Against the backdrop of the real-life courtroom drama, FRAMED gives witness to how times like these can

reveal for those who seek it, God's manifest mercy, grace, and blessings in ways we would never expect.

In an advanced society like the U.S., where an array of processes work against gender inequality, how does this inequality persist? Integrating research from sociology, social cognition and psychology, and organizational behavior, *Framed by Gender* identifies the general processes through which gender as a principle of inequality rewrites itself into new forms of social and economic organization. Cecilia Ridgeway argues that people confront uncertain circumstances with gender beliefs that are more traditional than those circumstances. They implicitly draw on the too-convenient cultural frame of gender to help organize new ways of doing things, thereby re-inscribing trailing gender stereotypes into the new activities, procedures, and forms of organization. This dynamic does not make equality unattainable, but suggests a constant struggle with uneven results. Demonstrating how personal interactions translate into larger structures of inequality, *Framed by Gender* is a powerful and original take on the troubling endurance of gender inequality.
