

Fredrick Mudenda

Land Politics examines the struggle to control land in Africa through the lens of land titling in Zambia and Senegal. Contrary to standard wisdom portraying titling as an inevitable product of economic development, Lauren Honig traces its distinctly political logic and shows how informality is maintained by local actors. The book's analysis focuses on chiefs, customary institutions, and citizens, revealing that the strength of these institutions and an individual's position within them impact the expansion of state authority over land rights. Honig explores common subnational patterns within the two very different countries to highlight the important effects of local institutions, not the state's capacity or priorities alone, on state building outcomes. Drawing on evidence from national land titling records, qualitative case studies, interviews, and surveys, this book contributes new insights into the persistence of institutional legacies and the political determinants of property rights.

Women judges are playing increasingly prominent roles in many African judiciaries, yet there remains very little comparative research on the subject. Drawing on extensive cross-national data and theoretical and empirical analysis, this book provides a timely and broad-ranging assessment of gender and judging in African judiciaries. Employing different theoretical approaches, the book investigates how women have fared within domestic African judiciaries as both actors and litigants. It explores how women negotiate multiple hierarchies to access the judiciary, and how gender-related issues are handled in courts. The chapters in the book provide policy, theoretical and practical prescriptions to the challenges identified, and offer recommendations for the future directions of gender and judging in the post-COVID-19 era, including the role of technology, artificial intelligence, social media, and institutional transformations that can help promote women's rights. Bringing together specific cases from Kenya, Uganda, Ghana, Nigeria, Zambia, Tanzania, and South Africa and regional bodies such as ECOWAS and the African Commission on Human and Peoples' Rights, and covering a broad range of thematic reflections, this book will be of interest to scholars, students, and practitioners of African law, judicial politics, judicial training, and gender studies. It will also be useful to bilateral and multilateral donor institutions financing gender-sensitive judicial reform programs, particularly in Africa.

Understanding Banking Law in Zambia

For the past sixty years, the Pentecostal and Charismatic movement has played a major role in Zambia. In this book, Naar Mfundisi-Holloway explains the history of this development and its impact on civic engagement. She opens a discussion on church-state relations and explains how the church presented a channel of hope in the wake of the HIV/AIDS pandemic, despite having a history that eschewed civic engagement. In fact, the pandemic propelled the church to work alongside the state in the fight against the disease. Using interviews and historical analysis, this book provides valuable insight into how Pentecostal and Charismatic churches have effectively engaged matters of civic concern in Zambia dating from colonial times.

With 1994: Includes information on National Dental Organizations, state and regional dental examining boards, foreign dental organizations, United States and Canadian dental schools, and dental trade organizations, as well as a geographical listing and specialty listing of U.S. dentists.

History, Politics, and Power in Zimbabwe

From putative 'success stories' such as Ghana and Rwanda to failed efforts in Zimbabwe and other countries, this volume brings together seven incisive case studies from diverse contexts including post-war Sierra Leone, Uganda, and the new nation of South Sudan to distil insights

into the troubled progress of reform across the African continent.

Thoracic Malignancies: Thoracic Malignancies is the first title in Radiation Medicine Rounds. These tumors take more lives than any others and they are among the most preventable of tumors. Thus it is crucial for the practitioner to be up-to-date on the latest insights regarding their management. Thoracic Malignancies addresses the multi-disciplinary nature of the care of these tumors. There is representation from radiation oncology, medical oncology, and surgery ensuring a well-rounded summarization of current practice. Included are chapters on lung cancer, esophageal cancer, and thymomas providing coverage of the vast majority of thoracic tumors. The multi-disciplinary nature of the articles provides readers with an up-to-date summary and a well-rounded review regarding these tumors and their care. Expert authors provide reviews and assessments of the most recent data and its implications for current clinical practice, along with insights into emerging new trends of importance for the near future. About the Series Radiation Medicine Rounds is an invited review publication providing a thorough analysis of new scientific, technologic, and clinical advances in all areas of radiation medicine. There is an emphasis throughout on multidisciplinary approaches to the specialty, as well as on quality and outcomes analysis. Published three times a year Radiation Medicine Rounds provides authoritative, thorough assessments of a wide range of hot topics and emerging new data for the entire specialty of radiation medicine. Features of Radiation Medicine Rounds include: Editorial board of nationally recognized experts across the spectrum of radiation medicine In-depth, up-to-date expert reviews and analysis of major new developments in all areas of Radiation Medicine Issues edited by an authority in specific subject area Focuses on major topics in Radiation Medicine with in-depth articles covering advances in radiation science radiation medicine technology, radiation medicine practice, and assessment of recent quality and outcomes studies Emphasizes multidisciplinary approaches to research and practice

Infectious Disease Epidemiology is a concise reference guide which provides trainees and practicing epidemiologists with the information that they need to understand the basic concepts necessary for working in this specialist area. Divided into two sections, part one comprehensively covers the basic principles and methods relevant to the study of infectious disease epidemiology. It is organised in order of increasing complexity, ranging from a general introduction to subjects such as mathematical modelling and sero-epidemiology. Part two examines key major infectious diseases that are of global significance. Grouped by their route of transmission for ease of reference, they include diseases that present a particular burden or a high potential for causing mortality. This practical guide will be essential reading for postgraduate students in infectious disease epidemiology, health protection trainees, and practicing epidemiologists.

What is distinctive about this book is its interdisciplinary approach towards deciphering the complex meanings of President Robert Mugabe of Zimbabwe making it possible to evaluate Mugabe from a historical, political, philosophical, gender, literal and decolonial perspectives. It is concerned with capturing various meanings of Mugabeism.

One Zambia, Many Histories

This title analyses the implementation of political and economic liberalisation in Zambia during the first two electin periods (1991 - 2001).

In contrast to the rich tradition of academic analysis and understanding of the pre-colonial and colonial history of Zambia, the trajectory of post-colonial Zambia has been all but ignored by historians. The assumptions of developmentalism, the cultural hegemony of United National Independence Party orthodoxy and its conflation with national interests, and a narrow focus on Zambia's diplomatic role in Southern African affairs, have all contributed to a dearth of studies centring on the diverse lived experiences of Zambians.
