questions are
scored based on
the statistical
knowledge and

the student
used to answer
the question.
The statistical

include

identifying the

anxieties.*

*Listed below
are ways to
help yourself
become
accustomed to
the AP exam,
some of which*

may also be applied to other standardized tests. Become comfortable with the format of the AP Examination in Statistics. When you are practicing to take the

exam(s), simulate the conditions under which you will be taking the actual test(s). You should practice under the same time constraints as well. Stay calm and pace

first. If you find yourself working too long on one question, make a mark next to it in your test booklet and continue. After you have answered all of the questions that you can,

go back to the ones you have skipped. Use the process of elimination when you are unsure of an answer. If you can eliminate three of the answer choices, you have given yourself a

chance of
getting the
item correct
since there
will only be
two choices
left from which
to make a
guess. If you
