Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

One Man's Quest to Document the World's Animals

The Adventures of Henry & Baloo

Arctic Bibliography

The Photo Ark

Publications Du Gouvernement Canadien Catalogue

*This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art-to know these animals is to save them.Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.*

*"Extraordinary. . . . Berger is a hero of biology who deserves the highest honors that science can bestow."-Tim Flannery, New York Review of Books On the Tibetan Plateau, there are wild yaks with blood cells thinner than those of horses' by half, enabling the endangered yaks to survive at 40 below zero and in the lowest oxygen levels of the mountaintops. But climate change is causing the snow patterns here to shift, and with the snows, the entire ecosystem. Food and water are vaporizing in this warming environment, and these beasts of ice and thin air are extraordinarily ill-equipped for the change. A journey into some of the most forbidding landscapes on earth, Joel Berger's Extreme Conservation is an eye-opening, steely look at what it takes for animals like these to live at the edges of existence. But more than this, it is a revealing exploration of how climate change and people are affecting even the most far-flung niches of our planet. Berger's quest to understand these creatures' struggles takes him to some of the most remote corners and peaks of the globe: across Arctic tundra and the frozen Chukchi Sea to study muskoxen, into the Bhutanese Himalayas to follow the rarely sighted takin, and through the Gobi Desert to track the proboscis-swinging saiga. Known as much for his rigorous, scientific methods of developing solutions to conservation challenges as for his penchant for donning moose and polar bear costumes to understand the mindsets of his subjects more closely, Berger is a guide par excellence. He is a scientist and storyteller who has made his life working with desert nomads, in zones that typically require Sherpas and oxygen canisters. Recounting animals as charismatic as their landscapes are extreme, Berger's unforgettable tale carries us with humor and expertise to the ends of the earth and back. But as his adventures show, the more adapted a species has become to its particular ecological niche, the more devastating climate change can be. Life at the extremes is more challenging than ever, and the need for action, for solutions, has never been greater.*

Snow Leopard Crime Revisited

An Ounce of Prevention

*This deft and thorough update ensures that The Wildlife Techniques Manual will remain an indispensable resource, one that professionals and students in wildlife biology, conservation, and management simply cannot do without.*

*Meet the dog-and-cat duo taking outdoor adventure to new heights. Henry and Baloo are a real-life dog/cat sibling pair, based in Colorado, whose unconventional friendship has won the hearts of humans worldwide. Whether they're scaling mountains or cozying down in a tent, these two are never far from each other's side and always ready for their next trek. Wanting to share their explorations with friends and family, photographer and the pair's proud owner, Cynthia Bennett, began capturing Henry and Baloo on their outdoor adventures—with vivid colors and stunning backdrops surrounding them in every shot. Now never-before-seen photos and untold stories are compiled in a book for fans to enjoy. More than beautiful photography and a sweet story, *Our Wild Tails* champions friendship in the most unlikely of places and proves to readers that love is universal. Cynthia Bennett, photographer and explorer, lives in Colorado Springs, Colorado, with her dog (Henry), cat (Baloo), and partner, Andre.*

Track the facts about snow leopards and other amazing wild cats in this nonfiction companion to the bestselling Magic Tree House series! When Jack and Annie came back from their adventure in Magic Tree House #36: Sunlight on the Snow Leopard, they had lots of questions. Where do snow leopards live? Why are they endangered? Which wild cat has the longest fangs? How do lions hunt? Find out the answers to these questions and more as Jack and Annie track the facts about snow leopards and wild cats from all over the world. Filled with up-to-date information, photographs, illustrations, and fun tidbits from Jack and Annie, the Fact Trackers are the perfect way for kids to find out more about the topics they discover in their favorite Magic Tree House adventures. Did you know that there's a Magic Tree House book for every kid? Magic Tree House: Adventures with Jack and Annie, perfect for readers who are just beginning chapter books Merlin Missions: More challenging adventures for the experienced reader Fact Trackers: Nonfiction companions to your favorite Magic Tree House adventures

Presents extended reviews of noteworthy books, short reviews, essays and articles on topics and trends in publishing, literature, culture and the arts. Includes lists of best sellers (hardcover and paperback).

Social Assistance in Albania

Nineteen Eighty-Four

Canadian Government Publications

Snow Leopard

Ten on the Sled

Urban Carnivores

**Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.**

**This story is about two sisters, a walk in the snowy forest, and the appearance of an enchanted rabbit.**

*"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life*

*was like before the Party came to power.*

*Did you know that European royalty once used cheetahs to hunt deer, or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start? Have you ever wondered whether domestic cats really do land on their feet when they fall, or how Canada lynx can stalk their prey in the winter without falling through the deep snow? Wild Cats of the World is a treasure trove of answers to questions like these, and many others, for anyone who's interested in learning more about the world's felids, including the ones with whom we share our homes. Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source, many of them quite difficult to find, including scientific papers, descriptions of hunts, archeological findings, observations by naturalists and travelers, reports from government agencies, and newsletters from a wide variety of organizations. Weaving information from these sources together with their own experiences observing wild cats around the world, the Sunquists have created the most comprehensive reference on felids available. Each of their accounts of the 36 species of cat contains a description of the cat, including human interactions with it, as well as detailed data on its distribution, ecology and behavior, status in the wild, and efforts to conserve it. Numerous photographs, including more than 40 in full color, illustrate these accounts. Ranging from the two-pound black-footed cat to the five-hundred-pound tiger, and from the African serval with its satellite-dish ears to the web-footed fishing cat of Asia, Wild Cats of the World will fascinate and educate felid fans of any stripe (or spot).*

Environmental DNA (eDNA) refers to DNA that can be extracted from environmental samples (such as soil, water, feces, or air) without the prior isolation of any target organism. The analysis of environmental DNA has the potential of providing high-throughput information on taxa and functional genes in a given environment, and is easily amenable to the study of both aquatic and terrestrial ecosystems. It can provide an understanding of past or present biological communities as well as their trophic relationships, and can thus offer useful insights into ecosystem functioning. There is now a rapidly-growing interest amongst biologists in applying analysis of environmental DNA to their own research. However, good practices and protocols dealing with environmental DNA are currently widely dispersed across numerous papers, with many of them presenting only preliminary results and using a diversity of methods. In this context, the principal objective of this practical handbook is to provide biologists (both students and researchers) with the scientific background necessary to assist with the understanding and implementation of best practices and analyses based on environmental DNA.

With a nod to Richard Scarry, this inventive picture book surprises readers with every turn of the page! Hiss! Screech! Roar! It's a noisy day in Bumperville! But are the sounds what you think they are? That Honk! must surely be a goose. But turn the page and it's the taxi that a goose is driving! Using cleverly placed die-cuts, this inventive book hints at what is making the sound, but with each turn of the page, it's an eye-opening surprise and part of an unfolding story that is part guessing game and part giggle-inducing caper. Abi Cushman is the master of surprise and silliness in this absolutely delightful picture book.

*A Novel*

**A spellbinding new Nature Storybook about one of the most beautiful creatures in the world, with words by Planet Earth producer Justin Anderson and pictures by award-winning Patrick Benson. "Something moves in the rocks ahead. My hands start to tremble. My heart is beating fast. There, just a few footsteps away, is a snow leopard..." Join us on a journey high into the snowy peaks of the Himalaya, and discover the secret world of a rare and utterly majestic creature - how it has adapted to the harsh environment it lives in and how it looks after its young. Complete with an index and a conservation note, this is a wonderful addition to the series and the debut of an exciting new voice in non-fiction writing for children.**

**The “brilliantly realized” (The New York Times Book Review) modern classic that coined the term “metaverse”—one of Time’s 100 best English-language novels and “a foundational text of the cyberpunk movement” (Wired) In reality, Hiro Protagonist delivers pizza for Uncle Enzo’s CosoNostra Pizza Inc., but in the Metaverse he’s a warrior prince. Plunging headlong into the enigma of a new computer virus that’s striking down hackers everywhere, he races along the neon-lit streets on a search-and-destroy mission for the shadowy virtual villain threatening to bring about infocalypse. Snow Crash is a mind-altering romp through a future America so bizarre, so outrageous . . . you’ll recognize it immediately.**

***Part of the Penguin Orange Collection, a limited-run series of twelve influential and beloved American classics in a bold series design offering a modern take on the iconic Penguin paperback Winner of the 2016 AIGA + Design Observer 50 Books | 50 Covers competition For the seventieth anniversary of Penguin Classics, the Penguin Orange Collection celebrates the heritage of Penguin's iconic book design with twelve influential American literary classics representing the breadth and diversity of the Penguin Classics library. These collectible editions are dressed in the iconic orange and white tri-band cover design, first created in 1935, while french flaps, high-quality paper, and striking cover illustrations provide the cutting-edge design treatment that is the signature of Penguin Classics Deluxe Editions today. The Snow Leopard In 1973, Peter Matthiessen and field biologist George Schaller traveled high into the remote mountains of Nepal to study the Himalayan blue sheep and possibly glimpse the rare and beautiful snow leopard. Matthiessen, a student of Zen Buddhism, was also on a spiritual quest to find the Lama of Shey at the ancient shrine on Crystal Mountain. The result is a remarkable account of a journey both physical and spiritual, as the arduous climb yields to Matthiessen a deepening Buddhist understanding of reality, suffering, impermanence, and beauty.***

***In Malamute Man: Memoirs of an Arctic Traveler, Joe Henderson, who came to Alaska in search of adventure, finds himself on a remarkable journey exploring the Arctic with his Alaskan malamute sled dog team. He ventures into one of the most brutal environments on earth where extreme subzero temperatures are a constant reminder of mortality, and the will to survive is unselfishly shared by both man and dog. Together, they must fend off charging grizzly bears, endure powerful blizzards, and suffer the horror of plunging through thin ice. Joe's gripping tales of perseverance and his fearless, free-spirited dogs are both humorous and astonishing.***
