In this volume of the World Citizen Comics series, Ian Rosenberg and Mike Cavallaro create a practical framework for understanding and appreciating the First Amendment. Freedom of speech is fiercely defended in America and has been since the First Amendment was written. But how does it work, and what laws shape it? Drawing on parallels between ten seminal Supreme Court cases and current events, Free Speech Handbook lays out the fundamentals of First Amendment law in an accessible and engaging way.

This “slim but indispensable new guide” offers “practical tips and delicious recipes that will help reduce kitchen waste and save money” (The Washington Post). Despite a growing awareness of food waste, many well-intentioned home cooks lack the tools to change their habits. This handbook—packed with engaging checklists, simple recipes, practical strategies, and educational infographics—is the ultimate tool for using more and wasting less in your kitchen. From a scientist at the Natural Resources Defense Council come these everyday techniques that call for minimal adjustments of habit, from shopping, portioning, and using a refrigerator properly to simple preservation methods including freezing, pickling, and cellaring. At once a good read and a go-to reference, this handy guide is chock-full of helpful facts and tips, including twenty “use-it-up” recipes and a substantial directory of common foods.

This is a comprehensive introduction to the traditional problem of free will and determinism. Written in language accessible to students and others with no prior knowledge of the subject, the text nonetheless manages to provide a comprehensive overview of all the latest views on this central problem of philosophy.

Dr. Brooke Spencer always felt different from other girls. Now a successful scientist, she is finally discovering where she belongs: working alongside the brilliant, trailblazing researcher Dr. Charles Samuelson. Dr. Samuelson has recently made a discovery that has eluded philosophers and dreamers for centuries: How to transmute iron into gold. Determined to use the knowledge for good,

Dr. Samuelson recruits Brooke to assist him with his new plan, his “Golden Manifesto.” But humans are not alone and his discovery has not gone unnoticed. Extraterrestrial visitors seek to control Dr. Samuelson’s Breakthrough, and before long, Brooke is all that stands between Earth and total Destruction. Will she be able to hold her ground? Or will the timeless temptation of gold prove too much for even the strongest of spirits? Brooke will soon face a choice that will make her question her background, her career, and the fate of the planet.

Have you ever wondered: What it’s like to daily bet hundreds of thousands of dollars working for some of the largest professional gamblers in Las Vegas? ... How to spend a summer house sitting one of the biggest stars in the world’s 11,000 square-foot mansion - without an invitation from it’s celebrity owner ... Whether the life of crime - specifically, running a shoplifting ring in a middle American mall - pays? ... What causes a son to finally say enough is enough ... and decide "Today is the day I am going to kill my dad." Comedian Brandt Tobler has the answers in this funny, touching and sometimes downright unbelievable memoir of a small town Wyoming kid turned "mall-fia" don, turned nationally touring comic. Brandt tells his life story with candor, detailing the many pit stops, wrong turns, crazy connections and lucky breaks he experienced along the way to his comedy career, all while trying to balance a toxic relationship with his unreliable jilted dad. In these pages Brandt will make you laugh (he better - it’s his job!) and believe as he does that, when it comes to defining family, blood isn’t always thicker than water. -- back cover.

A lush and haunting novel of a city steeped in decadent pleasures. . . . and of a man, proud and defiant, caught in a web of murder and betrayal. It is 1833. In the midst of Mardi Gras, Benjamin January, a Creole physician and music teacher, is playing piano at the Salle d’Orleans when the evenings festivities are interrupted—by murder. Ravishing Angelique Crozat, a notorious octoroon who travels in the city’s finest company, has been strangled to death. With the authorities reluctant to become involved, Ben begins his own inquiry, which will take him through the seamy haunts of riverboatmen and into the huts of voodoo-worshipping slaves. But soon the eyes of suspicion turn toward Ben—for, black as the slave who fathered him, this free man of color is still the perfect scapegoat. . . . Praise for A Free Man of Color “A smashing debut. Rich and exciting with both substance and spice.”—Star Tribune, Minneapolis “A sparkling gem.”—King Features Syndicate “An astonishing tour de force.”—Margaret Maron “Superb.”—Drood Review of Mystery “A darned good murder mystery.”—USA Today

A romantic tragedy set in the tough corporate world of a major airline. Intense suspense culminates in a shocking moment, reminiscent of D.B. Cooper’s infamous hijacking, as a man tumbles from a passenger jet ten thousand feet above a cool, moonlit Arizona desert night.A series of seemingly unrelated events have occurred over several months at TriCon Airlines. A routine flight turns tragic when a flight attendant is struck and paralyzed by a careening food cart. A massive bird strike rocks another flight and an engine explosion on yet another flight fatally injures a passenger. TriCon’s arrogant management wrongly places the blame for much that happened on long-time and respected senior engineer, Jack Traner, shattering his comfortable life with his wife Ann. Agonized by the way his life has been torn apart, he sets in motion a deadly quest for revenge. Highly trained, armed with insider knowledge, and virtually unlimited access to TriCon’s planes, he methodically and brilliantly sets the stage to exact retribution for his ruined life. An ordinary man, pushed too far, decides to push back.It’s story that no one could have predicted or thought possible in today’s environment of intense airport security and passenger awareness.

This second edition of the Oxford Handbook of Free Will is intended to be a sourcebook and guide to current work on free will and related subjects. Its focus is on writings of the past forty years, in which there has been a resurgence of interest in traditional issues about the freedom of the will in the light of new developments in the sciences, philosophy and humanistic studies. Special attention is given to research on free will of the first decade of the twenty-first century since the publication of the first edition of the Handbook. All the essays have been newly written or rewritten for this volume. In addition, there are new essayists and essays surveying topics that have become prominent in debates about free will in the past decade, including new work on the relation of free will to physics, the neurosciences, cognitive science, psychology and empirical philosophy, new versions of traditional views (compatibilist, incompatibilist, libertarian, etc.) and new views (e.g. revisionism) that have emerged. The twenty-eight essays by prominent international scholars and younger scholars cover a host of free will related issues, such as moral agency and responsibility, accountability and blameworthiness in ethics, autonomy, coercion and control in social theory, criminal liability, responsibility and punishment in legal theory, issues about the relation of mind to body, consciousness and the nature of action in philosophy of mind and the cognitive and neurosciences, questions about divine foreknowledge, providence and human freedom in philosophy of religion, and general metaphysical questions about necessity and possibility, determinism, time and chance, quantum reality, causation and explanation.

For more than three decades, Bernard Bass’s handbook has been indispensable bible for every serious student of leadership. For thirty-three years and through three editions, Bass & Stogdill’s Handbook of Leadership has been the indispensable bible for every serious student of leadership. Since the third edition came out in 1990, the field of leadership has expanded by an order of magnitude. This completely revised and updated fourth edition reflects the growth and changes in the study of leadership over the past seventeen years, with new chapters on transformational leadership, ethics, presidential leadership, and executive leadership. Throughout the Handbook, the contributions from cognitive, social psychology and the social, political, communications, and administrative sciences have been expanded. As in the third edition, Bernard Bass begins with a consideration of the definitions and concepts used, and a brief review of some of the better-known theories. Professor Bass then focuses on the personal traits, tendencies, attributes, and values of leaders and the knowledge, intellectual competence, and technical skills required for leadership. Next he looks at leaders’ socioemotional talents and interpersonal competencies, and the differences in these characteristics in leaders who are imbued with ideologies, especially authoritarianism, Machiavellianism, and self-aggrandizement. A fuller examination of the values, needs, and satisfactions of leaders follows, and singled out for special attention are competitiveness and the preferences for taking risks. In his chapters on personal characteristics, Bass examines the esteem that others generally accord to leaders as a consequence of the leaders’ personalities. The many theoretical and research developments about charisma over the past thirty years are crucial and are explored here in depth. Bass has continued to develop his theory of transformational leadership – the paradigms of the last twenty years – and he details how it makes possible the inclusion of a much wider range of phenomena than when theory and modeling are limited to reinforcement strategies. He also details the new incarnations of transformational leadership since the last edition. Bass has greatly expanded his consideration of women and racial minorities, both of whom are increasingly taking on leadership roles. A glossary is included to assist specialists in a particular academic discipline who may be unfamiliar with terms used in other fields. Business professors and students, executives in every industry, and politicians at all levels have relied for years on the time-honored guidance and insight afforded by the Handbook.

The application of causal inference methods is growing exponentially in fields that deal with observational data. Written by pioneers in the field, this practical book presents an authoritative yet accessible overview of the methods and applications of causal inference. With a wide range of detailed, worked examples using real epidemiologic data as well as software for replicating the analyses, the text provides a thorough introduction to the basics of the theory for non-time-varying treatments and the generalization to complex longitudinal data.

“Ross Gay’s eye lands upon wonder at every turn, bolstering my belief in the countless small miracles that surround us.” —Tracy K. Smith, Pulitzer Prize winner and U.S. Poet Laureate The winner of the NBCC Award for Poetry offers up a spirited collection of short lyric essays, written daily over a tumultuous year, reminding us of the purpose and pleasure of praising, extolling, and celebrating ordinary wonders. Ross Gay’s The Book of Delights is a genre-defying book of essays—some as short as a paragraph; some as long as five pages—that record the small joys that occurred in one year, from birthday to birthday, and that we often overlook in our busy lives. His is a meditation on delight that takes a clear-eyed view of the complexities, even the terrors, in his life, including living in America as a black man; the ecological and psychic violence of our consumer culture; the loss of those he loves. Among Gay’s funny, poetic, philosophical delights: the way Botan Rice Candy wrappers melt in your mouth, the volunteer crossing guard with a pronounced tremor whom he imagines as a kind of boat-woman escorting pedestrians across the River Styx, a friend’s unabashed use of air quotes, pickup basketball games, the silent nod of acknowledgment between black people. And more than any other subject, Gay celebrates the beauty of the natural world—his garden, the flowers in the sidewalk, the birds, the bees, the mushrooms, the trees. This is not a book of how-to or inspiration, though it could be read that way. Fans of Roxane Gay, Maggie Nelson, and Kiese Laymon will revel in Gay’s voice, and his insights. The Book of Delights is about our connection to the world, to each other, and the rewards that come from a life closely observed. Gay’s pieces serve as a powerful and necessary reminder that we can, and should, stake out a space in our lives for delight.

Bullshit is everywhere. Some of it is just lazy, some is complete nonsense, and yet some is at least trying to communicate something, even if it fails. Bestselling author Kevin Duncan has been on a life mission to improve business language and understanding. In his latest book, he weeds out the worst offenders, and the contexts in which they most frequently occur, to provide readers with a path to clear communication. The book starts with an examination of why we seem to use so much jargon and non-sensical words and phrases in our daily working lives. Duncan then lists and analyses the 100 most popular examples of bullshit used internally and externally, their real meaning, and rates how harmless or dangerous they are. The book ends with advice on dealing with bullshitters and a manifesto to help anyone achieve clear, bullshit-free communication.

“Outstanding. A great entry point for the developer and investor.” - Brian Calle, Orange County Register “Combines the experience of the authors to give a unique perspective on the important EB-5 program which drives capital formation and jobs across our country.” - Congressman Jared Polis Whether you are a foreign investor seeking a United States green card or a domestic developer sourcing capital for your latest project, the United States EB-5 visa program offers unique opportunity.
