***It's amazing to be a dominant wolf... if you're male. When you're a nineteen year-old girl who can beat the crap out of every wolf in your pack, suddenly it's not so great. Love isn't everything, I know; but even the most powerful she-wolf submits to her mate. If you can't be dominated, you can't be mated. And an unmated wolf has no place in the pack. My one hope is the clan gathering in the Blackwood Fortress. Every wolf in the continent attends, and a few seriously sexy wolves catch my eye. I'm bound to find at least one who can match me, right? Then there's my other problem: My alpha is a grade-A jerk. After treating me like a genetic freak my whole life, he suddenly decides to stake a claim. "Lock your doors. Hold them tight. Close your windows. Every night. Don't go out, in case he's there. Always live in total fear." Everyone knows of Alpha Kaden, a man of twisted riddles and cryptic puzzles. His identity is one of them. His touch, another. He is feared throughout all 13 packs for his reputation of stealing young women out of their beds. And tonight he has come to steal Mara to make her a player in his wicked game. But when Mara discovers the truth behind his sadistic mind games everything changes and she finds herself questioning what is real, and what is not. Mara always assumed her mate would be a man from her own pack. A good man. Not a sadistic, sinful Alpha named Kaden.

**Hydrocolloids are among the most widely used ingredients in the food industry. They function as thickening and gelling agents, texturizers, stabilisers and emulsifiers and in addition have application in areas such as edible coatings and flavour release. Products reformulated for fat reduction are particularly dependent on hydrocolloids for satisfactory sensory quality. They now also find increasing applications in the health area as dietary fibre of low calorific value. The first edition of Handbook of Hydrocolloids provided professionals in the food industry with relevant practical information about the range of hydrocolloid ingredients readily and at the same time authoritatively. It was exceptionally well received and has subsequently been used as the substantive reference on these food ingredients. Extensively revised and expanded and containing eight new chapters, this major new edition strengthens that reputation. Edited by two leading international authorities in the field, the second edition reviews over twenty-five hydrocolloids, covering structure and properties, processing, functionality, applications and regulatory status.**

**Since there is now greater emphasis on the protein hydrocolloids, new chapters on vegetable proteins and egg protein have been added. Coverage of microbial polysaccharides has also been increased and the developing role of the exudate gums recognised, with a new chapter on Gum Ghatti. Protein-polysaccharide complexes are finding increased application in food products and a new chapter on this topic as been added. Two additional chapters reviewing the role of hydrocolloids in emulsification and their role as dietary fibre and subsequent health benefits are also included. The second edition of Handbook of hydrocolloids is an essential reference for post-graduate students, research scientists and food manufacturers. Extensively revised and expanded second edition edited by two leading international authorities Provides an introduction to food hydrocolloids considering regulatory aspects and thickening characteristics Comprehensively examines the manufacture, structure, function and applications of over twenty five hydrocolloids**

Lush. Dark. Romantic. Introducing a newly reimagined tale written in the vein of Beauty and the Beast and Hades and Persephone. Long before civilization, there were the gods. And before the gods, there was the earth, the celestial bodies, and air given flesh. They are the Anemoi-the Four Winds-and they have been banished to the four corners of the world. Wren of Edgewood is no stranger to suffering. Her parents are gone. Survival is all she knows. For three hundred years, the land known as the Gray has been encased in ice, surrounded by a great barrier called the Shade, which protects the townsfolk from the Deadlands beyond. But day by day, the Shade weakens. Only one thing can stop the Shade's fall: a mortal woman taken captive across the barrier, bound in wedlock to the dark god who reigns over the Deadlands. He is the North Wind, the Frost King, an immortal whose heart is said to be as frigid as the land he rules. And the time has come for the Frost King to choose his bride. The North Wind is a standalone, enemies-to-lovers fantasy romance, the first in a series

**Honey, does this taste like poison to you? I've never been a fan of murder. The mess, the smell, the whole hiding the body thing after - it always seemed like way too much work. But trust me, when you're married to Richard Morningstar, that "work" starts to feel an awful lot like "play". The man is a snake and king of the fairies. A barbarian. A war monger. A sex god. Uh, I mean a...a sick pod? Doesn't matter. The point is, it's either him or me. Because one of us is going to die, and at the moment, it's my execution scheduled in two weeks. So I just have to figure out a way to kiss him - kill him - before then, take his throne,**

**and turn his whole nightmarish kingdom upside down. Easy right? Maybe - if the guy wasn't freaking immortal. ----- CHAPTER ONE EXCERPT ONE Rules are meant to be followed. Unless you can find a loophole. -Richard I lounged back in my seat, a shot of ambrosia in my scarred hand. Swirling the honey-coloured liquid around the glass, I locked eyes with the High Scholar. "I've crushed the Vylian forces to the north," I said slowly. "I've fended off the Great Beast every year. And now you're telling me that I must bow to a single piece of paper?" The man swallowed, his eyes flicking to the black and purple tiles beneath his feet. "Well, no. I mean, yes. I mean -" "Breathe, Scholar...while you still have the luxury of being able to." The next swallow was damn near audible. "It's not just..." The man pulled at his collar, the bright purple fabric doing little to hide his paling complexion. "Not just a piece of paper that's...that's stopping you," he stammered. "It's a High Law of Oyveni's." My eyes narrowed. I hated hearing that fucking name. If the bitch wasn't already dead, I'd kill her myself. And if I had the power to go back through time, I'd finish her whole damn line, including her pet toad. Oyveni's laws had been a pain in my ass since before I'd taken the throne. It was because of her**

**that I'd been forced to kill my younger sister rather than just banish her. I'd been forced to kill my older sister too, but she at least had deserved it. My fingers tightening on my glass, I forced such memories aside. "Which says what?" I demanded. "That...that the Timeless Laws..." The High Scholar took a deep breath, his hands fidgeting in his traditional robes. He twisted the fabric round and round his pudgy fingers before finally looking up - but his deep blue eyes never did find mine. "They cannot be changed without the signature of a king -" "Which it has," I growled. The man flinched. His eyes darted back down to the floor. "And a...and a queen." Everything inside me stilled. I raised my glass to my lips, fury tightening my brows. For nearly two decades I'd ruled on my own, had protected them from every danger, and now they required me to have a queen? A woman I would be forced to share my power with? My vision? I took a sip from my glass and placed it lightly on the table. Smiling viciously, I drawled, "A queen, you say?" The man's whole head ducked to the floor. "Y-yes." He gulped. "And does the Court have anyone in particular in mind?" "Evangeline." Fucking Petre. The weasel had been trying to secure her daughter on the throne for over four decades. Evangeline was a**

*Lucy London puts the word genius to shame. Having obtained her PhD in microbiology by the age of twenty, she's amassed a wealth of knowledge, but one subject still eludes*

*her—people. The pendulum of passions experienced by those around her both confuses and intrigues her, so when she's offered a grant to study emotion as a pathogen, she jumps on the opportunity. When her attempts to come up with an actual experiment quickly drop from lackluster to nonexistent, she's given a choice: figure out how to conduct a groundbreaking study on passion, or lose both the grant and her position at the university. Put on leave until she can crack the perfect proposal, she finds there's only one way she can study emotions—by experiencing them herself. Enter Jensen Walker, Lucy's neighbor and the one person on the planet she finds strangely and maddeningly appealing. Jensen's life is the stuff of campus legend, messy, emotional, complicated—in short, the perfect starting point for Lucy's study. When her tenaciousness wears him down and he consents to help her, sparks fly. To her surprise, Lucy finds herself battling with her own emotions, as foreign as they are intense. With the clock ticking on her deadline, Lucy must decide what's more important: analyzing her passions...or giving in to them?*
