An exciting book to help you understand yourself and your clients, combining the symbolism of astrology with psychology. Dynamics of the Unconscious shows readers how to understand depression, the astrology and psychology of aggression, and alchemical symbolism for growth. Reginald Hach offers the reader the story of his transition from beginning conservatory music student to performer on the world's stage, to circumvent the debilitating nature of stage fright and go on to a successful career as a composer, performer, and teacher of music. He has relatively small hands from his mother's side, which led him to doing stretching exercises nearly every day of his life and ultimately to developing carpal tunnel syndrome. In spite of his difficulties, he earned three degrees at the New England Conservatory of Music and went on to do his life's work. Playing with a musical score in front of him allowed him to relax and enjoy his many performances.

In this close reading of Freudian theory, Jerome C. Wakefield reconstructs Freud's argument for the Oedipal theory of the psychoneuroses, placing the case of Little Hans into a philosophy-of-science context and critically rethinking the epistemological foundations of psychoanalysis. Wakefield logically evaluates four central Freudian arguments: the "undirected anxiety" argument which contends that Hans suffered from anxiety before he developed his horse phobia; the "day the horse fell down" argument where, engaging in some scholarly detective work, Wakefield resolves a century-old dispute between behaviorists and psychoanalysts about when Hans witnessed a frightening horse accident; the "N=1 sexual repression" argument that the trajectory of Hans's sexual desires matches the Oedipal theory's predictions; and lastly, the "detailed symptom characteristics" argument that the Oedipal theory is needed to understand otherwise inexplicable details of Hans's symptoms. Wakefield demonstrates that, although Freud's arguments are brilliantly conceived, he misread the facts of the Hans case and failed to support the Oedipal theory as judged by his own stated evidential standards. However, this failure creates an opportunity for renewed consideration of psychoanalysis's distinctive contribution: the understanding of an individual's unique meaning system and confrontation with meanings outside of focal awareness in order to reshape an individual's fate. This book will be of interest to psychoanalysts and psychotherapists alike, and will prove essential for scholars working in the fields of psychoanalysis, philosophy of science, and the history of psychiatry.

Humanitarian Interventions - that sounds nice; much nicer than wars, battles and use of military force. Foremost, the phrase makes you think of the delivery of sanitary goods, medication, of soup-kitchens. Here we are not supposed to think of interventions of this kind; we have to have humanitarian interventions in mind which are humanitarian intervention-wars. (I) At exactly what point is the use of military force a humanitarian intervention? What is the humanitarian aspect of those interventions? Their occasion? Their motive? Their alleged as well as their actual consequences? (II) At exactly what point are humanitarian intervention-wars morally justifiable? Are they justifiable even if they are wars of aggression breaching international law? And finally: (III) Was the war which was presented to us as the paradigmatic example of a humanitarian-intervention-war, that is: the war in Kosovo in the spring of 1999 (with over 37,000 bombing missions), really justifiable as a humanitarian intervention? Many of us wanted to believe so at the time. Does our ex ante judgement hold today in an ex post reflection? And which lessons for the future should we learn from the success or failure of this humanitarian war? These are the questions proposed in this book; therefore, it is concerned with problems of semantics (part I), problems of moral assessment (part II) and with the moral, legal and political conclusions we draw from our experiences with the war in Kosovo, our primary example of a humanitarian intervention (part III). International experts in the areas of philosophy, international law, sociology and peace studies debated these questions vigorously for several days. This is the resulting volume.

Using revelatory new material on an event which changed the tide of World War II, Robert Kershaw's ground-breaking history explores the Battle of Dunkirk from the German perspective. 'Military history of the highest order.' Jonathan Dimbleby, author and broadcaster The British evacuation from the beaches of the small French port town of Dunkirk is one of the iconic moments of military history. The battle has captured the popular imagination through LIFE magazine photo spreads, the fiction of Ian McEwan and, of course, Christopher Nolan's hugely successful Hollywood blockbuster. But what is the German view of this stunning Allied escape? Drawing on German interviews, diaries and unit post-action reports, Robert Kershaw creates a page-turning history of a battle that we thought we knew. Dünkirchen 1940 is the first major history on what went wrong for the Germans at Dunkirk. As supreme military commander, Hitler had seemingly achieved a miracle after the swift capitulation of Holland and Belgium, but with just seven kilometres before the panzers captured Dunkirk - the only port through which the trapped British Expeditionary force might escape - they came to a shuddering stop. Hitler had lost control of his stunning advance. Only a detailed interpretation of the German perspective - historically lacking to date - can provide answers as to why. Drawing on his own military experience, his German language skills and his historian's eye for detail, Robert Kershaw creates a new history of this familiar battle. With a fresh angle on this famous conflict, Dünkirchen 1940 delves into the under-evaluated major German miscalculation both strategically and tactically that arguably cost Hitler the war.
