Little Frog has got used to his life with just Mummy and Daddy. He likes it just the way it is. So, when nine new tadpoles arrive, things change in the frog household. Little Frog is not impressed with his new brothers and sisters. They can't do the things he likes to do. The only thing they can do is to take up all of Mummy's and Daddy's time. But when the tadpoles turn into froglets, even littler than Little Frog, things start to look up and Little Frog's family is suddenly a lot more fun than it ever used to be. Told with Tatyana Feeney's trademark understated wit and highly individual artwork style, this story captures perfectly the adjustment that any toddler has to go through when they become an older sibling.

Holly Keller has created the archetypal frog pond and we see it through the seasons as the tadpoles grow legs and lungs and eventually hop onto land: bullfrogs at last. In sharply personal prose, Mo Yan depicts a world of desperate families, illegal surrogates, forced abortions, and the guilt of those who must enforce the policy. At once illuminating and devastating, it shines a light into the heart of communist China.
